How did the Fund perform in the last year?

The Fund outperformed its benchmark, the MSCI ACWI ex USA Index (NR) (USD)—which tracks the performance of both developed-market and emerging market countries, excluding the United States—for the 12-month period ending May 31, 2025.

Alpha source exposures (the investment approach that an active investment manager takes in an effort to generate excess returns relative to a benchmark) contributed positively to Fund performance, particularly value and momentum, as both factors performed well despite the broader underperformance of quality stocks.

Three of the Fund's four sub-advisers outperformed the benchmark MSCI ACWI ex USA Index over the reporting period. Lazard Asset Management LLC's ("Lazard") 130/30 Momentum strategy benefited from a favorable momentum environment and effective short positioning. Notably, Lazard is the only Fund manager utilizing derivatives, which comprise approximately 50% of its 160% gross exposure. Acadian Asset Management LLC's outperformance was attributable to strong returns from value and momentum exposures. Lazard's International Quality Growth strategy also outperformed the Fund's benchmark despite the headwinds faced by quality factors overall. Strong stock selection in the information technology sector and in numerous equity markets globally contributed significantly to performance.

The performance of Brickwood Asset Management LLP ("Brickwood"), the Fund's International Value strategy manager, lagged the benchmark during the reporting period. The manager's underperformance was driven by positions in the consumer discretionary and information technology sectors.
