Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.**

## How did the Fund perform in the last year?

The Fund modestly underperformed its benchmark, the Bloomberg Global Aggregate ex-USD Index (Hedged), for the 12-month period ending September 30, 2025.

Fund performance for the period benefited from duration underweights in Japan and Europe, a yield-curve steepening position in the U.S., overweight allocations to select emerging market local rates, including Mexico and Indonesia, and an overweight to Pemex. These gains were pared by a curve flattening bias in Japan and an underweight to China.

Long currency positions in the Swedish krona (SEK), Norwegian krone (NOK), and Mexican peso (MXN), along with a short position in the New Zealand dollar (NZD) enhanced Fund performance. However, these gains were trimmed by short exposures to the euro (EUR) and the Swiss franc (CHF), and long positions in the Japanese yen (JPY) and Korean won (KRW).

Among the Fund's sub-advisers, Wellington Management Company LLP outperformed due to underweight duration positions in Europe and Japan. Colchester Global Investors Limited modestly outperformed, benefiting from long currency positions in the SEK and NOK, and a short position in the NZD, an overweight to Mexican local rates and duration underweights in Europe and Japan. These gains were pared by a short currency position in the EUR, long exposure to the JPY, and an underweight to Chinese bonds. RBC Global Asset Management (UK) Limited (RBC) marginally underperformed because of a Japanese yield curve-flattener position and an underweight to Chinese policy bank bonds. An overweight to Mexican sovereign credit risk contributed positively to RBC's performance.

The Fund employed derivatives during the period for the purposes of efficient portfolio management.
