The line graph represents historical performance of a hypothetical investment of \$100,000 in the Fund during the last 10 years. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.** Class Y Shares commenced operations on October 30, 2015. For periods prior to October 30, 2015, the performance of the Fund's Class F Shares has been used. Returns for Class Y Shares would have been substantially similar to those of Class F Shares and would have differed only to the extent that Class Y Shares have lower total annual fund operating expenses than Class F Shares.

### How did the Fund perform in the last year?

Class Y Shares of the Fund underperformed its benchmark, the Bloomberg Massachusetts Intermediate Municipal Bond Index (USD), for the 12-month period ending August 31, 2025.

The reporting period began with the target range on the federal funds rate at 5.25%-5.50%. The Federal Reserve (Fed) then cut its benchmark interest rate by 50 basis points (0.50%) at its September 2024 meeting. The Fed subsequently reduced the rate by 25 basis points at both its November and December meetings, bringing the target range to 4.25%-4.50%, and thereafter maintained the rate for the first eight months of 2025. Evolving import tariff policy from the Trump administration contributed to significant volatility in risk assets in early April 2025, with subsequent trade deals settling the market's nerves and spreads across spread sectors tightening close to or through pre-April levels. Against this backdrop, performance in the municipal bond market was mixed during the reporting period. Short-term municipal yields followed the Fed and Treasury yields lower. Conversely, long-dated municipal bonds recorded negative returns as municipal yields moved higher. (Bond prices move inversely to yields.) The higher yields were driven in part by strong issuance, which reached record levels in 2024, and has been even higher thus far in 2025, as many municipalities have exhausted COVID 19-era stimulus funds.

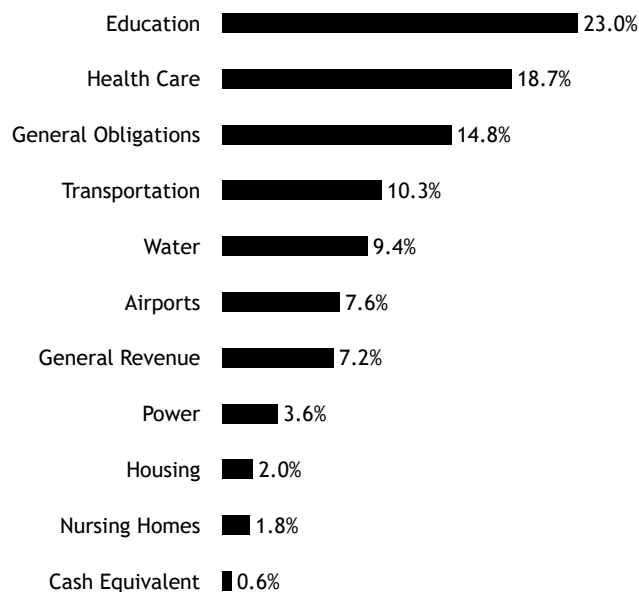

Insight North America LLC is the sub-adviser for the Fund. The manager's underperformance relative to the Fund's benchmark for the reporting period was attributable to a long duration posture and yield-curve positioning as yields in the intermediate to long segments moved higher. Security selection in the revenue sectors was the primary detractor from performance. Security selection in the utility and health care sectors also hampered Fund performance. An overweight to utilities also weighed on performance, while security selection in the education sector was a contributor
