This annual shareholder report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Core Fixed Income Fund, Class Y Shares	\$44	0.41%

How did the Fund perform during the last 10 years?

Total Return Based on \$100,000 Investment

Average Annual Total Returns as of September 30, 2024

Fund/Index Name	1 Year	5 Years	10 Years
Core Fixed Income Fund, Class Y Shares	12.28%	0.42%	2.07%
Bloomberg U.S. Aggregate Bond Index (USD)	11.57%	0.33%	1.84%

The line graph represents historical performance of a hypothetical investment of \$100,000 in the Fund during the last 10 years. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.** Class Y Shares commenced operations on June 30, 2015. For periods prior to June 30, 2015, the performance of the Fund's Class F Shares has been used. Returns for Class Y Shares would have been substantially similar to those of Class F Shares and would have differed only to the extent that Class Y Shares have lower total annual fund operating expenses than Class F Shares.

How did the Fund perform in the last year?

Class Y Shares outperformed its benchmark, the Bloomberg US Aggregate Bond Index, for the 12-month period ending September 30, 2024.

The reporting period began with the Federal Reserve (Fed) pausing after hiking short-term interest rates 11 times for a cumulative 525 basis points (5.25%) during 2022 and early 2023. Despite some bumps in the road, inflation largely moderated during the first nine months of 2024, and the Fed began its rate-cutting cycle with an aggressive 50-basis-point (0.50%) reduction at its September 2024 meeting. Spread sectors benefited from moderating inflation, the Fed pivoting to easing, and solid fundamentals for both corporations and consumers.

A long duration posture contributed to the Fund's outperformance versus the benchmark for the reporting period as yields fell across the U.S. Treasury yield curve. A steepening bias (which employs derivatives to benefit from escalating yield differences that occur as a result of increases in the yield spread between two Treasury securities of different maturities) bolstered Fund performance as short-term yields declined more sharply than long-term yields. An overweight position and security selection in the credit sector was a positive contributor to performance as corporate fundamentals remained relatively strong. An overweight allocation to agency mortgage-backed securities (MBS) also enhanced Fund performance for the period. Additionally, Fund performance was bolstered by both security selection and positioning within high-quality prime credit cards and auto asset-backed securities (ABS), as well as an allocation to AAA rated collateralized loan obligations (CLOs).

Among the Fund's sub-advisors, Metropolitan West Asset Management LLC benefited from a long duration posture and an overweight to agency MBS. Western Asset Management Company Limited's performance was boosted by a long duration posture and an overweight to corporate credit. Allspring Global Investments, LLC and MetLife Investment Management, LLC benefited from security selection in corporate bonds and securitized assets. Jennison Associates LLC's steepening yield curve bias enhanced its performance.
