The line graph represents historical performance of a hypothetical investment of \$100,000 in the Fund during the last 10 years. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.** Class Y Shares commenced operations on October 30, 2015. For periods prior to October 30, 2015, the performance of the Fund's Class F Shares has been used. Returns for Class Y Shares would have been substantially similar to those of Class F Shares and would have differed only to the extent that Class Y Shares have lower total annual fund operating expenses than Class F Shares.

* As of September 30, 2024, pursuant to the new regulatory requirements, this index has been added to represent the broad-based securities market index.

How did the Fund perform in the last year?

Class Y Shares modestly underperformed its benchmark, the Russell Midcap Index, for the 12-month period ending September 30, 2024.

Regarding the Fund's sub-advisors, Los Angeles Capital Management LLC (LA Capital) outperformed the benchmark Russell Midcap Index over the reporting period. The trend-following manager's performance benefited from positive results for the momentum factor and stock selection in the industrials, consumer discretionary, and energy sectors. LA Capital's performance also was bolstered by sector positioning, namely underweight allocations to consumer staples and materials, and an overweight to financials. Leeward Investments, LLC underperformed the benchmark for the period, attributable largely to value and quality style headwinds. Weak stock selection in the consumer discretionary sector also detracted from the manager's performance.

On a sector basis, Fund performance was enhanced by an overweight position in financials and underweight in materials. This was partially offset by the negative impact of a small overweight to energy. Fund performance benefited from stock selection in the industrials sector, though this was partially offset by weak selection in financials.

The Fund performance generally was bolstered by positive momentum exposure over the reporting period, as this factor garnered the highest returns. A more moderate overweight to the value style had no significant impact on Fund performance, as both the cheapest and most expensive stocks in the Russell Midcap Index underperformed. The Fund's bias towards high-quality stocks within the index detracted somewhat from performance for the reporting period, while an active underweight allocation to the most volatile stocks in the index had a modestly positive impact.
