

Tax-Managed Managed Volatility Fund

SEI Institutional Managed Trust/Class Y Shares - STVYX

Fund Overview

This annual shareholder report contains important information about Class Y Shares of the Tax-Managed Managed Volatility Fund (the "Fund") for the period from October 1, 2023 to September 30, 2024. You can find additional information about the Fund at <https://www.sei.com/mutual-fund-documentation/prospectuses-and-reports>. You can also request this information by contacting us at 610-676-1000. This annual shareholder report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Tax-Managed Managed Volatility Fund, Class Y Shares	\$86	0.75%

How did the Fund perform during the last 10 years?

Total Return Based on \$100,000 Investment

- Tax-Managed Managed Volatility Fund, Class Y Shares - \$274,756
- - - S&P 500® Index (TR)* - \$350,980
- Russell 3000™ Index (USD) - \$334,317

Average Annual Total Returns as of September 30, 2024

Fund/Index Name	1 Year	5 Years	10 Years
Tax-Managed Managed Volatility Fund, Class Y Shares	29.61%	10.99%	10.64%
S&P 500® Index (TR)*	36.35%	15.98%	13.38%
Russell 3000™ Index (USD)	35.19%	15.26%	12.83%

The line graph represents historical performance of a hypothetical investment of \$100,000 in the Fund during the last 10 years. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.** Class Y Shares commenced operations on April 30, 2015. For periods prior to April 30, 2015, the performance of the Fund's Class F Shares has been used. Returns for Class Y Shares would have been substantially similar to those of Class F Shares and would have differed only to the extent that Class Y Shares have lower total annual fund operating expenses than Class F Shares.

* As of September 30, 2024, pursuant to the new regulatory requirements, this index has been added to represent the broad-based securities market index.

How did the Fund perform in the last year?

Class Y Shares underperformed its benchmark, the Russell 3000™ Index, for the 12-month period ending September 30, 2024.

The Fund's exposure to low-volatility and value stocks detracted from performance for the reporting period. Underweights to the mega-cap growth stocks that led the market upturn during the period, as well as defensive sector positioning, also weighed on performance. Exposure to relatively smaller-cap stocks was a common headwind among the Fund's sub-advisors.

Among the Fund's sub-advisors, LSV Asset Management outperformed the benchmark due to select holdings among the strong-performing "Magnificent Seven" mega-cap tech stocks. The strategy's tilt toward value stocks within the low-volatility segment of the market weighed on performance. An overweight to consumer staples also was a detractor, while an underweight to consumer discretionary had a positive impact. Performance was hampered by stock selection in information technology, and benefited from holdings in industrials.

Allspring Global Investments, LLC underperformed over the period largely due to tilts toward low-volatility and value stocks, as well as greater emphasis on defensive sector positioning. An overweight to consumer staples and an underweight to information technology detracted from performance. Underweights to consumer discretionary and energy enhanced performance. Stock selection in health care and information technology weighed on performance, while holdings in energy had a positive impact.

The quantitative investment management (QIM) team within SIMC outperformed the benchmark since it started to directly manage a sleeve of the Fund in July 2024. Tilts toward low-volatility and value stocks contributed slightly to performance as both asset classes performed well in the third quarter of 2024. QIM benefited from an underweight to and stock selection in information technology, while stock selection in health care was a detractor.

The Fund employed equity index futures to provide stock-like performance to a portion of the liquidity reserve account, which contained cash available for fund withdrawals. This enhanced the Fund's absolute return for the period.

Key Fund Statistics as of September 30, 2024

Total Net Assets (000's)	Number of Holdings	Total Advisory Fees Paid (000's)	Portfolio Turnover Rate
\$846,039	131	\$3,516	24%
