* As of September 30, 2024, pursuant to the new regulatory requirements, this index has been added to represent the broad-based securities market index.

How did the Fund perform in the last year?

Class F Shares underperformed its benchmark, the ICE BofA U.S. 3-Month Treasury Bill Index, for the 12-month period ending September 30, 2024. Although the Fund's performance is benchmarked against the return of the ICE BofA U.S. 3-Month Treasury Bill Index, an investment in the Fund differs from an investment in U.S. Treasury bills as the Fund invests in tax-exempt securities issued by state governments and local municipalities. Among other things, Treasury bills are backed by the full faith and credit of the U.S. government and have a fixed rate of return. Investors in Treasury bills do not risk losing their investment, whereas loss of money is a risk of investing in the Fund.

The reporting period began with the Federal Reserve (Fed) pausing after hiking short-term interest rates 11 times for a cumulative 525 basis points (5.25%) during 2022 and early 2023. Despite some bumps in the road, inflation largely moderated during the first nine months of 2024, and the Fed began its rate-cutting cycle with an aggressive 50-basis-point (0.50%) reduction at its September 2024 meeting. Yields on municipal bonds moved lower along with Treasury yields during the period. The municipal sector continued to benefit from healthy labor and real estate markets, which resulted in strong tax receipts, combined with budget surpluses that were accumulated during the COVID-19 pandemic of the early 2020s.

BlackRock Advisors, LLC, the Fund's sole sub-advisor, recorded a positive absolute return during the reporting period, benefiting from a position in municipal commercial paper and certificates of deposit. The manager increased these allocations during the period as the Fund moved to extend its weighted average maturity. The Fund's positions in variable-rate demand notes (VRDNs) linked to the SIFMA Municipal Swap Index (which tracks the performance of tax-exempt 7-day floating-rate municipal notes) also had a slightly positive impact on performance. Given their floating-rate structure, the Fund's holdings in VRDNs were reduced over the period as yields moved lower.
