The line graph represents historical performance of a hypothetical investment of \$100,000 in the Fund during the last 10 years. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund Shares. **Past performance is not indicative of future performance.** Class Y Shares commenced operations on October 30, 2015. For periods prior to October 30, 2015, the performance of the Fund's Class F Shares has been used. Returns for Class Y Shares would have been substantially similar to those of Class F Shares and would have differed only to the extent that Class Y Shares have lower total annual fund operating expenses than Class F Shares.

How did the Fund perform in the last year?

Class Y of the Fund outperformed its benchmark, the Bloomberg Pennsylvania Intermediate Municipal Index, for the 12-month period ending August 31, 2024.

U.S. fixed-income securities experienced volatility early in the reporting period, with bond yields initially rising before markets eventually coalesced around the prospect of significant Federal Reserve (Fed) monetary policy easing in 2024 as inflation data began to improve towards the Fed's 2% target. As a result, November and December 2023 saw two of the strongest monthly performances in the municipal market's history. Optimism began to wane in the first quarter of 2024 due to stronger-than-expected inflation readings, which delayed the market's projection for interest-rate cuts before pricing in the likelihood of its initial cut at the September 2024 Fed meeting.

Within the investment-grade municipal sector, A and BBB rated issues outperformed AA and AAA rated securities during the reporting period, reflecting investor preference for lower-quality, while high yield was the strongest-performing segment across the entire municipal market. The municipal curve was inverted (short-term yields exceeded long-term yields) throughout much of 2023 and 2024, before ending the reporting period with the 2-to-10-year U.S. Treasury curve virtually flat.

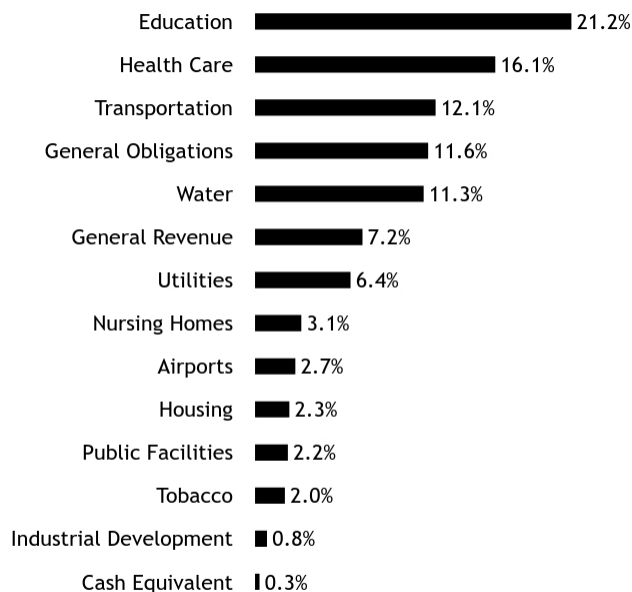

Overall security selection enhanced Fund performance during the reporting period, particularly within local general obligation (GO) bonds, education, transportation, water and sewer, and hospital issues; however, security selection within the revenue sectors weighed on performance during the first quarter of 2024. Additionally, Fund performance benefited from a modestly longer duration position, as well as a barbelled yield-curve position (investing in short- and long-term bonds with no exposure to the intermediate segment of the curve). An overweight to revenue bonds, notably continuing care retirement communities (CCRCs), benefited Fund performance.
