

SEI INSTITUTIONAL MANAGED TRUST

Multi-Asset Inflation Managed Fund (the “Fund”)

Supplement Dated August 9, 2021 to the Statement of Additional Information (“SAI”) dated January 31, 2021

This Supplement provides new and additional information beyond that contained in the SAI and should be read in conjunction with such SAI.

The SAI is hereby amended and supplemented to reflect the following changes to the Fund.

Change in Portfolio Management of the Fund

QS Investors, LLC no longer serves as a sub-adviser to the Fund. As such, all references to QS Investors, LLC are hereby deleted from the SAI.

In addition, on the cover page of the SAI, “Franklin Advisers, Inc.” is added in the appropriate alphabetical order thereof.

In addition, under the section titled “The Adviser and Sub-Advisers,” under the heading titled “The Sub-Advisers,” the following text is hereby added in the appropriate alphabetical order thereof:

FRANKLIN ADVISERS, INC.—Franklin Advisers, Inc. (“FAV”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Inflation Managed Fund. FAV is a California corporation with its principal offices at One Franklin Parkway, San Mateo, California 94403-1906. It is a wholly owned subsidiary of Franklin Resources, Inc. (referred to as “Franklin Templeton”). Franklin Templeton managed approximately \$1,494.4 billion in assets worldwide as of January 31, 2021.

In addition, under the same section, under the heading titled “Portfolio Management,” the following text is hereby added in the appropriate alphabetical order thereof:

FAV

Compensation. SIMC pays FAV a fee based on the assets under management of the Multi-Asset Inflation Managed Fund as set forth in an investment sub-advisory agreement between FAV and SIMC. FAV pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Inflation Managed Fund. The following information relates to the period ended June 30, 2021.

Franklin Compensation. The investment manager seeks to maintain a compensation program that is competitively positioned to attract, retain and motivate top-quality investment professionals. Portfolio managers receive a base salary, a cash incentive bonus opportunity, an equity compensation opportunity, and a benefits package. Portfolio manager compensation is reviewed annually and the level of compensation is based on individual performance, the salary range for a portfolio manager’s level of responsibility and Franklin Templeton guidelines. Portfolio managers are provided no financial incentive to favor one fund or account over another. Each portfolio manager’s compensation consists of the following three elements:

Base Salary. Each portfolio manager is paid a base salary.

Annual Bonus. Annual bonuses are structured to align the interests of the portfolio manager with those of the Fund’s shareholders. Each portfolio manager is eligible to receive an annual bonus. Bonuses generally are split between cash (50% to 65%) and restricted shares of Resources stock (17.5% to 25%) and fund shares (17.5% to 25%). The deferred equity-based compensation is intended to build a vested interest of the portfolio manager in the financial performance of both Resources and funds advised by the investment manager. The bonus plan is intended to provide a competitive level of annual bonus compensation that is tied to the portfolio manager achieving consistently strong investment performance, which aligns the financial incentives of the portfolio manager and Fund shareholders. The Chief Investment Officer of the investment manager and/or other officers of the investment manager, with responsibility for the Fund, have discretion in the granting of annual bonuses to portfolio managers in accordance with Franklin Templeton guidelines. The following factors are generally used in determining bonuses under the plan:

- **Investment performance.** Primary consideration is given to the historic investment performance over the 1, 3 and 5 preceding years of all accounts managed by the portfolio manager. The pre-tax performance of each fund managed is measured relative to a relevant peer group and/or applicable benchmark as appropriate.
- **Non-investment performance.** The more qualitative contributions of the portfolio manager to the investment manager’s business and the investment management team, including professional knowledge, productivity, responsiveness to client needs and communication, are evaluated in determining the amount of any bonus award.

- **Responsibilities.** The characteristics and complexity of funds managed by the portfolio manager are factored in the investment manager's appraisal. Additional long-term equity-based compensation. Portfolio managers may also be awarded restricted shares or units of Resources stock or restricted shares or units of one or more funds. Awards of such deferred equity-based compensation typically vest over time, so as to create incentives to retain key talent.

Benefits. Portfolio managers also participate in benefit plans and programs available generally to all employees of the investment manager.

Ownership of Fund Shares. As of June 30, 2021, FAV's portfolio managers did not beneficially own any shares of the Multi-Asset Inflation Managed Fund.

Other Accounts. As of June 30, 2021, in addition to the Multi-Asset Inflation Managed Fund, FAV's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in MM)	Number of Accounts	Total Assets (in MM)	Number of Accounts	Total Assets (in MM)
Russell Shtern, CFA	8	\$2,328.59	4	\$331.06	5	\$338.20
Jacqueline Hurley, CFA	13	\$2,413.06	7	\$497.50	6	\$221.68

None of the accounts listed above are subject to a performance-based advisory fee.

Conflicts of Interest. A conflict of interest may arise as a result of the portfolio managers being responsible for multiple accounts, including the Multi-Asset Inflation Managed Fund which may have different investment guidelines and objectives. In addition to the Multi-Asset Inflation Managed Fund, these accounts may include accounts of registered investment companies, private pooled investment vehicles and other accounts. In particular, this conflict of interest may arise as a result of FAV's management of the Multi-Asset Inflation Managed Fund and other accounts, which, in theory, may allow FAV to allocate investment opportunities in a way that favors other accounts over the Multi-Asset Inflation Managed Fund. This conflict of interest may be exacerbated to the extent that FAV or the portfolio managers receive, or expect to receive, greater compensation from their management of the other accounts (some of which receive both a management and incentive fee) than the Multi-Asset Inflation Managed Fund. FAV (or its members, employees and affiliates) may give advice or take action with respect to the other accounts that differs from the advice given with respect to the Multi-Asset Inflation Managed Fund. To the extent a particular investment is suitable for both the Multi-Asset Inflation Managed Fund and the other accounts, such investments will be allocated between the Multi-Asset Inflation Managed Fund and the other accounts in a manner that FAV determines is fair and equitable under the circumstances to all clients, including the Multi-Asset Inflation Managed Fund.

To address and manage these potential conflicts of interest, FAV has adopted compliance policies and procedures to allocate investment opportunities and to ensure that each of their clients is treated on a fair and equitable basis.

There are no other changes to the SAI.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE

World Bank	International Bank of Reconstruction and Development
Yankees	Yankee Obligations

THE TRUST

SEI Institutional Managed Trust (the “Trust”) is an open-end management investment company that offers shares of diversified and non-diversified portfolios (the Multi-Asset Inflation and Multi-Asset Accumulation Funds are diversified, and the Multi-Asset Income and Multi-Asset Capital Stability Funds are non-diversified). The Trust was established as a Massachusetts business trust pursuant to an Agreement and Declaration of Trust dated October 17, 1986. The Agreement and Declaration of Trust permits the Trust to offer separate series (“portfolios”) of units of beneficial interest (“shares”) and separate classes of shares of such portfolios. Currently, the Trust offers two classes of shares of the Multi-Asset Accumulation, Multi-Asset Income, Multi-Asset Inflation Managed and Multi-Asset Capital Stability Funds, although the Trust offers Class I Shares of other series of the Trust. Additional share classes of the Multi-Asset Accumulation, Multi-Asset Income, Multi-Asset Inflation Managed and Multi-Asset Capital Stability Funds may be offered in the future, which may provide for variations in distribution fees, transfer agent fees, shareholder servicing fees, administrative servicing fees, dividends and certain voting rights. Except for differences among the classes pertaining to distribution, shareholder servicing, administrative servicing, voting rights, dividends and transfer agent expenses, each share of each portfolio represents an equal proportionate interest in that portfolio with each other share of that portfolio.

The management and affairs of the Trust are supervised by a Board of Trustees (each member, a “Trustee” and collectively, the “Trustees” or the “Board”) under the laws of the Commonwealth of Massachusetts. The Trustees have approved contracts under which, as described in this Statement of Additional Information (“SAI”), certain companies provide essential management services to the Trust. All consideration received by the Trust for shares of any portfolio, all assets of such portfolio, belong to that portfolio and would be subject to the liabilities related thereto. The Trust pays its expenses, including, among others, the fees of its service providers, audit and legal expenses, expenses of preparing prospectuses, proxy solicitation materials and report to shareholders, costs of custodial services and registering the shares under federal and state securities laws, pricing, insurance expenses, litigation and other extraordinary expenses, brokerage costs, interest charges, taxes and organizational expenses. This SAI relates to Class F and Class Y Shares of the Multi-Asset Inflation Strategy, Multi-Asset Accumulation, Multi-Asset Income and Multi-Asset Capital Stability Funds (each, a “Fund” and together, the “Funds”).

The investment adviser, SEI Investments Management Corporation (“SIMC” or the “Adviser”) and investment sub-advisers (each, a “Sub-Adviser” and, together, the “Sub-Advisers”) to the Funds are referred to collectively as the “advisers.”

INVESTMENT OBJECTIVES AND POLICIES

MULTI-ASSET ACCUMULATION FUND—The investment objective of the Multi-Asset Accumulation Fund is to generate total return, including capital appreciation and income. There can be no assurance that the Fund will achieve its investment objective.

Under normal circumstances, the Fund will seek to generate total return over time by selecting investments from among a broad range of asset classes based upon SIMC’s or the Sub-Advisers’ expectations of risk and return. The asset classes used and the Fund’s allocations among asset classes will be determined based on SIMC’s or the Sub-Advisers’ views of fundamental, technical or valuation measures. The Fund’s allocations among asset classes may be adjusted over short periods of time. At any point in time, the Fund may be diversified across many asset classes or concentrated in a limited number of asset classes. The Fund obtain its exposure to the asset classes by investing directly in securities and other investments or indirectly through the use of other pooled investment vehicles and derivative instruments.

The Fund uses a multi-manager approach under the general supervision of SIMC, allocating its assets among one or more Sub-Advisers using different investment strategies. SIMC may also directly manage a portion of the Fund’s portfolio.

The Fund may allocate all or a portion of its assets using a “risk parity” approach that seeks to balance risk across all capital market exposures, which may result in asset classes with lower perceived risk having a greater notional allocation within the Fund’s portfolio than asset classes with higher perceived risk.

Notional allocation refers to the Fund’s use of one or more derivative contracts to attempt to obtain exposure to a potential gain or loss on the market value of the instruments underlying the Fund’s derivative contracts (e.g., a security, currency or commodity (or a basket or index)). The market value of such underlying instruments generally exceeds the amount of cash or assets required to establish or maintain the derivative contracts. In addition, the Fund may further adjust asset allocations and capital market exposures based on realized and expected measures of volatility with the goal of managing the Fund’s volatility. This may result in the Fund increasing capital market exposures during periods of perceived falling risk and decreasing capital market exposures during periods of perceived rising risk.

The Fund may invest in equity securities, including common stocks, preferred stocks, convertible securities, warrants and depositary receipts of U.S. and non-U.S. issuers (including emerging markets) of various market capitalizations and industries.

The Fund may invest in fixed income securities that are investment or non-investment grade (also known as junk bonds), U.S.- or foreign-issued (including emerging markets) and corporate- or government-issued. The Fund’s fixed income investments may include asset-backed securities, mortgage-backed securities, corporate bonds and debentures, commercial paper, ETNs, money market instruments, mortgage dollar rolls, repurchase and reverse repurchase agreements, when issued/delayed delivery securities, zero coupon bonds, obligations of foreign governments and obligations of either supranational entities issued or guaranteed by certain banks and entities organized to restructure the outstanding debt of such issuers. The Fund’s fixed income investments may also include U.S. Treasury obligations, obligations issued by agencies or instrumentalities of the U.S. Government (including obligations not guaranteed by the U.S. Treasury), such as obligations issued by U.S. Government sponsored entities, Treasury Inflation Protected Securities (“TIPS”) and other inflation-linked debt securities and obligations of U.S. and foreign commercial banks, such as certificates of deposits and time deposits. The Fund may invest in fixed, variable and floating rate fixed income instruments. The Fund’s portfolio and the Fund’s investments in particular fixed income securities are not subject to any maturity or duration restrictions.

The Fund may also invest a portion of its assets in bank loans, which are, generally, non-investment grade floating rate instruments, in the form of participations in the loans or assignments of all or a portion of the loans from third parties.

In addition to direct investment in securities and other instruments, the Fund may invest in affiliated and unaffiliated funds, subject to the limitations of the 1940 Act. Such investment may include open-end funds, money market funds, closed-end funds and ETFs (including leveraged and inverse ETFs). The Fund may also invest in REITs and securities issued by U.S. and non-U.S. real estate companies.

A portion of the Fund’s assets may also be invested in commodity investments to provide exposure to the investment returns of the commodities markets. Commodity investments include notes with interest payments that are tied to an underlying commodity or commodity index, ETFs or other exchange-traded products that are tied to the performance of a commodity or commodity index or other types of investment vehicles or instruments that provide returns that are tied to commodities or commodity indexes. The Fund may also invest in equity securities of issuers in commodity-related industries.

The Fund may also seek to gain exposure to the commodity markets, in whole or in part, through investments in the Subsidiary. The Subsidiary, unlike the Fund, may invest to a significant extent in commodities, commodity contracts, commodity investments and derivative instruments. The Subsidiary may also invest in other instruments in which the Fund is permitted to invest, either as investments or to serve as margin or collateral for its derivative positions. The Fund may invest up to 25% of its total assets in the Subsidiary. The Subsidiary is advised by SIMC.

The Fund, either directly or through its investment in the Subsidiary, may also purchase or sell futures contracts, options, forward contracts and swaps to obtain the Fund's desired exposure to an asset class or for return enhancement or hedging purposes. Futures contracts, forward contracts, options and swaps may be used to synthetically obtain exposure to securities or baskets of securities and to manage the Fund's interest rate duration and yield curve exposure. Due to the Fund's structure and level of turnover, derivative instruments may be an efficient method of obtaining exposure to various types of markets. Interest rate swaps are further used to manage the Fund's yield spread sensitivity. Securities index swaps may be used to obtain exposure to different U.S. and foreign equity markets. Futures and swaps on futures may be used to gain exposure to U.S. and foreign sovereign bond markets, equity markets and commodities markets. The Fund may sell credit default swaps to more efficiently gain credit exposure to a security or basket of securities.

The Fund may invest in U.S. dollar and non-U.S. dollar denominated securities. The Sub-Advisers may also seek to enhance the Fund's return by actively managing the Fund's foreign currency exposure. In managing the Fund's currency exposure, the Sub-Advisers may buy and sell currencies (*i.e.*, take long or short positions) using futures and foreign currency forward contracts. The Fund may take long and short positions in foreign currencies in excess of the value of the Fund's assets denominated in a particular currency or when the Fund does not own assets denominated in that currency. The Fund may also engage in currency transactions in an attempt to take advantage of certain inefficiencies in the currency exchange market, to increase its exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another. In managing the Fund's currency exposure for foreign securities, the Sub-Advisers may buy and sell currencies for hedging or for speculative purposes.

The Fund may purchase shares of ETFs to gain exposure to a particular portion of the market while awaiting an opportunity to purchase shares of securities or other instruments directly. Pursuant to orders issued by the SEC to certain ETF complexes and procedures approved by the Board, the Fund may invest in such ETFs in excess of the limitations otherwise imposed by the federal securities laws, provided that the Fund otherwise complies with the conditions of the applicable SEC order, as it may be amended, and any other investment limitations applicable to the Fund. The particular ETF complexes in which the Fund may invest and additional information about the limitations of such investments are further described under the heading "Exchange-Traded Funds" in the sub-section "Investment Companies" of the "Description of Permitted Investments and Risk Factors" section below.

MULTI-ASSET INCOME FUND—The investment objective of the Multi-Asset Income Fund is to generate total return with an emphasis on current income. There can be no assurance that the Fund will achieve its investment objective.

Under normal circumstances, the Fund will seek to achieve its investment objective by selecting investments from among a broad range of asset classes based upon SIMC's or the Sub-Adviser's expectations for income and, to a lesser extent, capital appreciation. The asset classes used and the Fund's allocations among asset classes will be determined based on SIMC's or the Sub-Adviser's views of fundamental, technical or valuation measures. The Fund's allocations among asset classes may be adjusted over short periods of time. At any point in time, the Fund may be diversified across many asset classes or concentrated in a limited number of asset classes. The Fund may obtain its exposure to the asset classes by investing directly in securities and other investments or indirectly through the use of other pooled investment vehicles and derivative instruments. Due to its investment strategy, the Fund may buy and sell securities and other instruments frequently.

The Fund uses a multi-manager approach under the general supervision of SIMC, allocating its assets among one or more Sub-Advisers using different investment strategies. SIMC may also directly manage a portion of the Fund's portfolio.

The Fund may invest in equity securities, including common stocks, preferred stocks, convertible securities, warrants and depositary receipts, of U.S. and non-U.S. issuers (including emerging markets) of various market capitalizations and industries.

The Fund may invest in fixed income securities that are investment or non-investment grade (also known as junk bonds), U.S.- or foreign-issued (including emerging markets) and corporate- or government-issued. The Fund may invest in a wide range of fixed income investments, including asset-backed securities, mortgage-backed securities, CDOs and CLOs, corporate and municipal bonds and debentures, structured notes, construction loans, commercial paper, ETNs, money market instruments, mortgage dollar rolls, repurchase and reverse repurchase agreements, when issued/delayed delivery securities, zero coupon bonds, obligations of foreign governments and obligations of supranational entities issued or guaranteed by certain banks. The Fund's fixed income investments may also include U.S. Treasury obligations, obligations issued by agencies or instrumentalities of the U.S. Government (including obligations not guaranteed by the U.S. Treasury), such as obligations issued by U.S. Government sponsored entities, and TIPS and other inflation-linked debt securities. The Fund may invest in fixed, variable and floating rate fixed income instruments. The Fund's portfolio and the Fund's investments in particular fixed income securities are not subject to any maturity or duration restrictions.

The Fund may invest up to 25% of its assets in MLP units and may also invest a portion of its assets in bank loans, which are, generally, non-investment grade floating rate instruments, in the form of participations in the loans or assignments of all or a portion of the loans from third parties.

In addition to direct investment in securities and other instruments, the Fund may invest in affiliated and unaffiliated funds, subject to the limitations of the 1940 Act. Such investment may include open-end funds, money market funds, closed-end funds and ETFs (including leveraged and inverse ETFs). The Fund may also invest in REITs and securities issued by U.S. and non-U.S. real estate companies.

The Fund may also purchase or sell futures contracts, options, forward contracts and swaps to obtain the Fund's desired exposure to an asset class or for return enhancement or hedging purposes, including currency or interest rate exposure. Futures contracts and forward contracts may be used to synthetically obtain exposure to securities or baskets of securities. The Fund may use total return swaps to efficiently obtain exposure to segments of the equity or fixed income markets when other means of obtaining exposure, such as through an ETF, are suboptimal. Interest rate swaps may be used to manage the Fund's yield spread sensitivity. The Fund may write (sell) or purchase call options or put options on a security or a basket of securities, and such options may be covered or uncovered (or "naked"). The purchaser of a call option will pay the Fund a premium for undertaking the obligations under the option contract. Options may also provide a partial hedge to another position of the Fund. The Fund may buy credit default swaps in an attempt to manage credit risk where the Fund has credit exposure to an issuer, and the Fund may sell credit default swaps to more efficiently gain credit exposure to a security or basket of securities.

The Fund may invest in U.S. dollar and non-U.S. dollar denominated securities. The Sub-Advisers may also seek to enhance the Fund's return by actively managing the Fund's foreign currency exposure. In managing the Fund's currency exposure, the Sub-Advisers may buy and sell currencies (*i.e.*, take long or short positions) using futures and foreign currency forward contracts. The Fund may take long and short positions in foreign currencies in excess of the value of the Fund's assets denominated in a particular currency or when the Fund does not own assets denominated in that currency. The Fund may also engage in currency transactions in an attempt to take advantage of certain inefficiencies in the currency exchange market, to increase its exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another. In managing the Fund's currency exposure for foreign securities, the Sub-Advisers may buy and sell currencies for hedging or for speculative purposes.

The Fund may purchase shares of ETFs to gain exposure to a particular portion of the market while awaiting an opportunity to purchase shares of securities or other instruments directly. Pursuant to orders issued by the SEC to certain ETF complexes and procedures approved by the Board, the Fund may invest in such ETFs in excess of the limitations otherwise imposed by the federal securities laws, provided that the Fund otherwise complies with the conditions of the applicable SEC order, as it may be amended, and any other investment limitations applicable to the Fund. The particular ETF complexes in which the Fund may invest and additional information about the limitations of such investments are further described

under the heading “Exchange-Traded Funds” in the sub-section “Investment Companies” of the “Description of Permitted Investments and Risk Factors” section below.

MULTI-ASSET INFLATION MANAGED FUND—The investment objective of the Multi-Asset Inflation Managed Fund is to generate total return exceeding the rate of inflation. There can be no assurance that the Fund will achieve its investment objective.

Under normal circumstances, the Fund will seek to generate “real return” (*i.e.*, total returns that exceed the rate of inflation over a full market cycle, regardless of market conditions) by selecting investments from among a broad range of asset classes, including fixed income and equity securities and commodity investments. The asset classes used and the Fund’s allocations among asset classes will be determined based on SIMC’s or the Sub-Advisers’ views of fundamental, technical or valuation measures. The Fund’s allocations among asset classes may be adjusted over short periods of time. At any point in time, the Fund may be diversified across many asset classes or concentrated in a limited number of asset classes. The Fund may obtain its exposure to the asset classes by investing directly in securities and other investments or indirectly through the use of other pooled investment vehicles and derivative instruments.

The Fund uses a multi-manager approach under the general supervision of SIMC, allocating its assets among one or more Sub-Advisers using different investment strategies. SIMC may also directly manage a portion of the Fund’s portfolio.

Equity securities may include common or preferred stocks, warrants, rights, depositary receipts, equity-linked securities and other equity interests. The Fund may invest in securities of issuers of any market capitalization and may invest in both foreign and domestic equity securities. In addition to direct investment in securities and other instruments, the Fund may invest in affiliated and unaffiliated funds, including open-end funds, closed-end funds and ETFs. The Fund may also invest in REITs and U.S. and non-U.S. real estate companies.

In addition to direct investment in securities and other instruments, the Fund may invest in affiliated and unaffiliated funds, subject to the limitations of the 1940 Act. Such investment may include open-end funds, money market funds, closed-end funds and ETFs (including leveraged and inverse ETFs). The Fund may also invest in REITs and securities issued by U.S. and non-U.S. real estate companies.

The Fund may invest in fixed income securities that are investment or non-investment grade (also known as junk bonds), U.S.- or foreign-issued (including emerging markets), and corporate- or government-issued. The Fund may invest in a wide range of fixed income investments, including obligations of U.S. and foreign commercial banks, such as certificates of deposit, time deposits, bankers’ acceptances and bank notes, obligations of foreign governments, U.S. and foreign corporate debt securities, including commercial paper, and fully collateralized repurchase and reverse repurchase agreements with highly rated counterparties (those rated A or better) and securitized issues such as mortgage-backed securities, asset-backed securities, commercial mortgage-backed securities and collateralized debt obligations. The Fund’s fixed income investments may also include U.S. Treasury obligations, obligations issued by agencies or instrumentalities of the U.S. Government (including obligations not guaranteed by the U.S. Treasury), such as obligations issued by U.S. Government sponsored entities, and TIPS and other inflation-linked debt securities, and municipal bonds and debentures. The Fund may invest in fixed, variable and floating rate fixed income instruments. The Fund’s portfolio and the Fund’s investments in particular fixed income securities are not subject to any maturity or duration restrictions. The Fund may also enter into repurchase or reverse repurchase agreements with respect to its investment in the fixed income securities listed above and may use the cash received to enter into a short position on U.S. Treasury bonds.

A portion of the Fund’s assets may also be invested in commodity investments to provide exposure to the investment returns of the commodities markets. Commodity investments include notes with interest payments that are tied to an underlying commodity or commodity index, ETFs or other exchange-traded products that are tied to the performance of a commodity or commodity index or other types of investment vehicles or instruments that provide returns that are tied to commodities or commodity indexes. The Fund may also invest in equity securities of issuers in commodity-related industries.

The Fund may also seek to gain exposure to the commodity markets, in whole or in part, through investments in the Subsidiary. The Subsidiary, unlike the Fund, may invest to a significant extent in commodities, commodity contracts, commodity investments and derivative instruments. The Subsidiary may also invest in other instruments in which the Fund is permitted to invest, either as investments or to serve as margin or collateral for its derivative positions. The Fund may invest up to 25% of its total assets in the Subsidiary. The Subsidiary is advised by SIMC.

The Fund, either directly or through its investment in the Subsidiary, may also purchase or sell futures contracts, options, forward contracts and swaps to obtain the Fund's desired exposure to an asset class or for return enhancement or hedging purposes. Interest rate futures contracts are primarily used to hedge interest rate risk in the Fund's U.S. bond holdings. Commodity futures contracts are primarily used to obtain exposure to a diversified set of commodity markets. Interest rate swaps and swaps on indexes may further be used to manage the Fund's interest rate risk or may be used to manage the inflation-adjusted return of the Fund. The Fund may buy credit default swaps in an attempt to manage credit risk where the Fund has credit exposure to an issuer, and the Fund may sell credit default swaps to more efficiently gain credit exposure to a security or basket of securities. Options may be used to gain exposure to or hedge exposures in the equity and commodity markets. Foreign currency forward rate agreements may be used to hedge all or a portion of the currency risk resulting from investments in non-U.S. equity and fixed income securities.

The Fund may invest in U.S. dollar and non-U.S. dollar denominated securities. The Sub-Advisers may also seek to enhance the Fund's return by actively managing the Fund's foreign currency exposure. In managing the Fund's currency exposure, the Sub-Advisers may buy and sell currencies (*i.e.*, take long or short positions) using futures and foreign currency forward contracts. The Fund may take long and short positions in foreign currencies in excess of the value of the Fund's assets denominated in a particular currency or when the Fund does not own assets denominated in that currency. The Fund may also engage in currency transactions in an attempt to take advantage of certain inefficiencies in the currency exchange market, to increase its exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another. In managing the Fund's currency exposure for foreign securities, the Sub-Advisers may buy and sell currencies for hedging or for speculative purposes.

The Fund may purchase shares of ETFs to gain exposure to a particular portion of the market while awaiting an opportunity to purchase shares of securities or other instruments directly. Pursuant to orders issued by the SEC to certain ETF complexes and procedures approved by the Board, the Fund may invest in such ETFs in excess of the limitations otherwise imposed by the federal securities laws, provided that the Fund otherwise complies with the conditions of the applicable SEC order, as it may be amended, and any other investment limitations applicable to the Fund. The particular ETF complexes in which the Fund may invest and additional information about the limitations of such investments are further described under the heading "Exchange-Traded Funds" in the sub-section "Investment Companies" of the "Description of Permitted Investments and Risk Factors" section below.

The Sub-Advisers may engage in short sales in an attempt to capitalize on equity securities that it believes will underperform the market or their peers. When a Sub-Adviser sells securities short, it may invest the proceeds from the short sales in an attempt to enhance returns. This strategy may effectively result in the Fund having a leveraged investment portfolio, which results in greater potential for loss.

MULTI-ASSET CAPITAL STABILITY FUND—The investment objective of the Multi-Asset Capital Stability Fund is to manage the risk of loss while providing current income and an opportunity for capital appreciation. There can be no assurance that the Fund will achieve its investment objective.

Under normal circumstances, the Fund will attempt to manage the risk of loss while still seeking to generate some growth by selecting investments from among a broad range of asset classes. Managing the risk of loss does not mean preventing losses, but rather managing the Fund in a manner intended to limit the level of losses that the Fund could incur over any particular period. The Fund's investments are expected to include U.S. debt obligations and investment grade bonds, and, to a lesser extent, riskier

asset classes as detailed below, such as equities and non-investment grade securities (also known as junk bonds). The Fund may obtain its exposures to the asset classes by investing directly in securities and other investments or indirectly through the use of other pooled investment vehicles and derivative instruments, principally futures, forwards, options and swaps. The asset classes used and the Fund's allocations among asset classes will be determined based on SIMC's or the Sub-Adviser's views of fundamental, technical or valuation measures. The Fund's allocations among asset classes may be adjusted over short periods of time. At any point in time, the Fund may be diversified across many asset classes or concentrated in a limited number of asset classes. Due to its investment strategy, the Fund may buy and sell securities and other instruments frequently.

The Fund uses a multi-manager approach under the general supervision of SIMC, allocating its assets among one or more Sub-Advisers using different investment strategies. SIMC may also directly manage a portion of the Fund's portfolio.

The Fund may allocate all or a portion of its assets using a "risk parity" approach that seeks to balance anticipated drawdown risk (peak-to-trough decline in asset value) across all capital market exposures in the Fund. This approach may result in asset classes with lower perceived drawdown risk, e.g. high-quality government bonds, having a greater notional allocation within the Fund's portfolio than they would otherwise receive in a non-risk parity approach. Notional allocation generally refers to the Fund's use of one or more derivative contracts to obtain exposure to a potential gain or loss on the market value of the instruments underlying the Fund's derivative contracts (e.g., a security, basket of securities or index). The market value of such underlying instruments generally exceeds the amount of cash or assets required to establish or maintain the derivative contracts.

The Fund may further adjust asset allocations and capital market exposures based on realized and expected measures of drawdown risk with the goal of managing the Fund's total drawdown risk. This may result in the Fund increasing capital market exposures during periods of perceived falling drawdown risk and decreasing capital market exposures during periods of perceived rising drawdown risk.

The Fund may invest in equity securities, including common stocks, preferred stocks, convertible securities and warrants, of U.S. and non-U.S. issuers (including emerging markets) of various market capitalizations and industries.

The Fund may invest in fixed income securities that are investment or non-investment grade (also known as junk bonds), U.S.- or foreign-issued (including emerging markets) and corporate- or government-issued. The Fund's fixed income investments may include asset-backed securities, mortgage-backed securities, corporate bonds and debentures, commercial paper, ETNs, money market instruments, mortgage dollar rolls, repurchase and reverse repurchase agreements, when issued/delayed delivery securities, zero coupon bonds, obligations of foreign governments and obligations of supranational entities issued or guaranteed by certain banks, as well as entities organized to restructure the outstanding debt of such issuers. The Fund's fixed income investments may also include U.S. Treasury obligations, obligations issued by agencies or instrumentalities of the U.S. Government (including obligations not guaranteed by the U.S. Treasury), such as obligations issued by U.S. Government sponsored entities, TIPS and other inflation-linked debt securities and obligations of U.S. and foreign commercial banks, such as certificates of deposit and time deposits. The Fund may invest in fixed, variable and floating rate fixed income instruments. The Fund's portfolio and the Fund's investments in particular fixed income securities are not subject to any maturity or duration restrictions.

The Fund may also invest a portion of its assets in bank loans, which are, generally, non-investment grade floating rate instruments, in the form of participations in the loans or assignments of all or a portion of the loans from third parties.

In addition to direct investment in securities and other instruments, the Fund may invest in affiliated and unaffiliated funds, subject to the limitations of the 1940 Act. Such investment may include open-end funds, money market funds, closed-end funds and ETFs (including leveraged and inverse ETFs). The Fund may also invest in REITs and securities issued by U.S. and non-U.S. real estate companies.

The Fund may also purchase or sell futures contracts, options, forward contracts and swaps to obtain the Fund's desired exposure to an asset class or for return enhancement or hedging purposes. Due to the Fund's structure and level of turnover, derivative instruments may be an efficient method of obtaining exposure to various types of markets. Futures contracts may be used to gain exposure to U.S. and foreign sovereign bond markets. Index futures and securities index swaps may be used to gain exposure to U.S. and foreign equity markets. Interest rate swaps may be used to manage the Fund's yield spread sensitivity. Options may be used to gain exposure to or hedge risks in U.S. and foreign equity and fixed income markets. The Fund may buy credit default swaps in an attempt to manage credit risk where the Fund has credit exposure to an issuer, and the Fund may sell credit default swaps to more efficiently gain credit exposure to a security or basket of securities. Foreign currency forward rate agreements may be used to hedge all or a portion of the currency risk resulting from investments in non-U.S. equity and fixed income securities.

The Fund may invest in U.S. dollar and non-U.S. dollar denominated securities. The Sub-Adviser may also seek to enhance the Fund's return by actively managing the Fund's foreign currency exposure. In managing the Fund's currency exposure, the Sub-Adviser may buy and sell currencies (*i.e.*, take long or short positions) using futures contracts, foreign currency forward contracts and options. The Fund may take long and short positions in foreign currencies in excess of the value of the Fund's assets denominated in a particular currency or when the Fund does not own assets denominated in that currency. The Fund may also engage in currency transactions in an attempt to take advantage of certain inefficiencies in the currency exchange market, to increase its exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another. In managing the Fund's currency exposure for foreign securities, the Sub-Adviser may buy and sell currencies for hedging or for speculative purposes.

The Fund may purchase shares of ETFs to gain exposure to a particular portion of the market while awaiting an opportunity to purchase shares of securities or other instruments directly. Pursuant to orders issued by the SEC to certain ETF complexes and procedures approved by the Board, the Fund may invest in such ETFs in excess of the limitations otherwise imposed by the federal securities laws, provided that the Fund otherwise complies with the conditions of the applicable SEC order, as it may be amended, and any other investment limitations applicable to the Fund. The particular ETF complexes in which the Fund may invest and additional information about the limitations of such investments are further described under the heading "Exchange-Traded Funds" in the sub-section "Investment Companies" of the "Description of Permitted Investments and Risk Factors" section below.

DESCRIPTION OF PERMITTED INVESTMENTS AND RISK FACTORS

The following are descriptions of the permitted investments and investment practices of the Funds, including those discussed in the applicable Prospectus and the Funds' "Investment Objectives and Policies" section of this SAI and the associated risk factors. A Fund may purchase any of these instruments and/or engage in any of these investment practices if, in the opinion of the advisers, such investments or investment practices will be advantageous to the Fund. A Fund is free to reduce or eliminate its activity in any of these areas. An adviser may invest in any of the following instruments or engage in any of the following investment practices unless such investment or activity is inconsistent with or is not permitted by a Fund's stated investment policies, including those stated below. There is no assurance that any of these strategies or any other strategies and methods of investment available to a Fund will result in the achievement of the Fund's investment objective.

References to "Fund," where applicable, also refer to the underlying funds in which the Funds may invest.

ALTERNATIVE STRATEGIES—The Funds employ a diversified investment approach using various strategies simultaneously to realize short- and long-term gains. Such strategies are primarily designed to reduce fluctuations in the value of traditional assets and are distinguishable from traditional strategies (*i.e.*, strategies generally investing in long only equity, fixed-income securities or money market instruments) employed by mutual funds. The following alternative strategies can be implemented by the Funds.

Directional (Tactical) Strategies. Directional trading strategies are based upon speculating on the direction of market prices of currencies, commodities, equities and bonds in the futures and cash markets. A Sub-Adviser may rely on model-based systems to generate buy and sell signals. Others use a more subjective approach, ultimately using their own discretionary judgment in implementing trades. Strategies include long/short equity, long/short credit and global tactical asset allocation.

Long/Short Equity Strategy invests in securities believed to be undervalued or offer high growth opportunities while also attempting to take advantage of an anticipated decline in the price of an overvalued company or index by using short sales or options on common stocks or indexes. A Sub-Adviser may also use leverage and derivatives, including options, financial futures and options on futures contracts. The Sub-Adviser seeks returns from strong security selection on both the long and short sides. These long and short positions may be completely unrelated. The primary risk in this strategy is that the Sub-Adviser may exhibit poor security selection, losing money on both the long and short sides.

Long/Short Credit Strategy focuses on short positions by utilizing credit default swaps to anticipate the decline in the price of an overvalued security or by utilizing treasury futures to hedge interest rate risk. Strategies may also involve leverage and hedging through the use of ETFs or various derivatives, such as futures contracts, credit default swaps or total return swaps or committed term reverse repurchase facilities or other financings in order to enhance total return. The Fund may use certain derivatives to obtain greater leverage than would otherwise be achievable.

Global Tactical Asset Allocation is an investment strategy that attempts to exploit short-term market inefficiencies by taking positions in various markets with a view to profit from relative movements across those markets. The strategy focuses on general movements in the markets rather than on performance of individual securities. Generally, the strategy implements long and short positions in highly liquid futures and forward contracts across an investment universe of equity indexes, fixed income and currencies.

Event-Driven Strategies seek to exploit pricing inefficiencies that may occur before or after a corporate event, such as a bankruptcy, merger, acquisition or spinoff. A Sub-Adviser will analyze the potential event and determine the likelihood of the event actually occurring and purchase the stock of the target company with a view of selling it after its price has risen in connection with that event. Many corporate events, however, do not occur as planned. If a Sub-Adviser fails to accurately assess whether a corporate event will actually occur, it can ultimately reduce the price of a company's stock and cause the Fund to lose its investment.

Arbitrage Strategies focus on relative pricing discrepancies between instruments including equities, debt, futures contracts and options. A Sub-Adviser may employ mathematical, technical or fundamental analysis to determine incorrectly valued investments. Investments may be mispriced relative to an underlying security, related securities, groups of securities or the overall market. Positions are frequently hedged to isolate the discrepancy and to minimize market risk. Investments may represent either short-term trading opportunities or longer-term fundamental judgment on the relative performance of a security.

Fixed income or interest rate arbitrage aims to profit from price anomalies between related interest rate securities. This strategy includes interest rate swap arbitrage, U.S. and non-U.S. government bond arbitrage, forward yield curve arbitrage and mortgage-backed securities arbitrage, offsetting long and short positions in financial instruments likely to be affected by changes in interest rates.

Convertible arbitrage involves buying convertible bonds (bonds that are convertible into common stock) or shares of convertible preferred stock (stock that is convertible into common stock) that are believed to be undervalued. In addition to taking "long" positions (*i.e.*, owning the security) in convertible bonds or convertible preferred stock, a Sub-Adviser may take "short" positions (*i.e.*, borrowing and later selling the security) in the underlying common stock into which the convertible securities are exchangeable in order to hedge against market risk. The strategy is intended to capitalize on relative pricing inefficiencies between the related securities. This strategy may be employed with a directional bias (the Sub-Adviser anticipates the direction of the market) or on a market neutral basis (the direction of the market does not

have a significant impact on returns). The source of return from this strategy arises from the fact that convertible bonds may be undervalued relative to other securities due to the complexity of investing in these securities. The primary risk associated with this strategy is that, in the event of an issuer bankruptcy, the short position may not fully cover the loss on the convertible security. Convertible bond hedging strategies may also be adversely affected by changes in the level of interest rates, downgrades in credit ratings, credit spread fluctuations, defaults and lack of liquidity.

Pairs trading combines a long position in a particular security with a short position in a similar security in the same or related industry or sector. A Sub-Adviser identifies a pair of securities that are correlated (*i.e.*, the price of one security moves in the same direction of the price of the other security) and looks for divergence of correlation between shares of a pair. When a divergence is noticed, the Sub-Adviser takes the opposite position for securities in a pair. For stocks, currencies and futures, the Sub-Adviser would take a long position for the underperforming security and a short position for the over-performing security. For options, the Sub-Adviser would write a put option for underperforming stock and a call option for outperforming stock. A profit can be realized when the divergence is corrected and the securities are brought to original correlation by market forces. Although the strategy does not have much downside risk, there is a scarcity of opportunities.

Equity value neutral seeks to buy an undervalued stock and, essentially simultaneously, short a similar overvalued stock against it, thereby taking advantage of pricing differences between the related equity securities. The strategy is designed to neutralize sector risks and will generally seek to have low correlation to major market indexes. The strategy is based on the relative difference between such companies, not whether the companies are overvalued or undervalued in absolute terms. The primary risk inherent in the strategy is that weaker companies may gain value or stronger companies may lose value relative to their peers and it is possible to lose money on both the long position and the short position.

AMERICAN DEPOSITORY RECEIPTS—ADRs, as well as other “hybrid” forms of ADRs, including EDRs, CDRs and GDRs, are certificates evidencing ownership of shares of a foreign issuer. Depositary receipts may be sponsored or unsponsored. These certificates are issued by depositary banks and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution in the issuer’s home country. The depositary bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities.

Investments in the securities of foreign issuers may subject a Fund to investment risks that differ in some respects from those related to investments in securities of U.S. issuers. Such risks include future adverse political and economic developments, possible imposition of withholding taxes on income, possible seizure, nationalization or expropriation of foreign deposits, possible establishment of exchange controls or taxation at the source or greater fluctuation in value due to changes in exchange rates. Foreign issuers of securities often engage in business practices different from those of domestic issuers of similar securities, and there may be less information publicly available about foreign issuers. In addition, foreign issuers are, generally, subject to less government supervision and regulation and different accounting treatment than are those in the United States.

Although the two types of depositary receipt facilities (unsponsored and sponsored) are similar, there are differences regarding a holder’s rights and obligations and the practices of market participants. A depositary may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer. Typically, however, the depositary requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depositary receipts generally bear all the costs of the facility. The depositary usually charges fees upon the deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash

distributions and the performance of other services. The depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the underlying issuer or to pass through voting rights to depositary receipt holders with respect to the underlying securities.

Sponsored depositary receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depositary receipts are established jointly by a depositary and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depositary and the depositary receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depositary receipts (such as dividend payment fees of the depositary), although most sponsored depositary receipt holders may bear costs such as deposit and withdrawal fees. Depositaries of most sponsored depositary receipts agree to distribute notices of shareholder meetings, voting instructions and other shareholder communications and information to the depositary receipt holders at the underlying issuer's request.

ASSET-BACKED SECURITIES—Asset-backed securities are securities that are backed primarily by the cash flows of a discrete pool of fixed or revolving receivables or other financial assets that by their terms convert into cash within a finite time period. Asset-backed securities include mortgage-backed securities, but the term is more commonly used to refer to securities supported by non-mortgage assets such as auto loans, motor vehicle leases, student loans, credit card receivables, floorplan receivables, equipment leases and peer-to-peer loans. The assets are removed from any potential bankruptcy estate of an operating company through the true sale of the assets to an issuer that is a special purpose entity, and the issuer obtains a perfected security interest in the assets. Payments of principal of and interest on asset-backed securities rely entirely on the performance of the underlying assets. Asset-backed securities are generally not insured or guaranteed by the related sponsor or any other entity and therefore, if the assets or sources of funds available to the issuer are insufficient to pay those securities, the Funds will incur losses. In addition, asset-backed securities entail prepayment risk that may vary depending on the type of asset, but is generally less than the prepayment risk associated with mortgage-backed securities. Additional risks related to collateralized risk obligations, CLOs and mortgage-backed securities are described below.

Losses may be greater for asset-backed securities that are issued as “pass-through certificates” rather than as debt securities, because those types of certificates only represent a beneficial ownership interest in the related assets and their payment is based primarily on collections actually received. For asset-backed securities as a whole, if a securitization issuer defaults on its payment obligations due to losses or shortfalls on the assets held by the issuer, a sale or liquidation of the assets may not be sufficient to support payments on the securities and the Funds, as securityholders, may suffer a loss.

Recent changes in legislation, together with uncertainty about the nature and timing of regulations that will be promulgated to implement such legislation, has created uncertainty in the credit and other financial markets and other unknown risks. The Dodd-Frank Act, for example, imposes a new regulatory framework on the U.S. financial services industry and the consumer credit markets in general. As a result of the Dodd-Frank Act and similar measures to re-regulate the credit markets and, in particular, the structured finance markets, the manner in which asset-backed securities are issued and structured has been altered and the reporting obligations of the issuers of such securities may be significantly increased or may become costlier. The value or liquidity of any asset-backed securities held or acquired by the Funds may be adversely affected as a result of these changes.

In particular, the implementation of Section 619 of the Dodd-Frank Act (and related regulations) prohibiting certain banking entities from engaging in proprietary trading (the so-called Volcker Rule) and of Section 941 of the Dodd-Frank Act (and related regulations) requiring the “sponsor” of a securitization to retain no less than 5% of the credit risk of the assets collateralizing the asset-backed securities, could have a negative effect on the marketability and liquidity of asset-backed securities (including mortgage-backed securities and CDOs and CLOs), whether in the primary issuance or in secondary trading. It is possible that the risk retention rules may reduce the number of new issuances of private-label mortgage

backed securities or the number of collateral managers active in the CDO and CLO markets, which also may result in fewer new issue securities. A contraction or reduced liquidity in the asset-backed, CDO or CLO markets could reduce opportunities for the Funds to sell their securities and might adversely affect the management flexibility of the Funds in relation to the respective portfolios.

In addition to the changes required by the Dodd-Frank Act, the SEC adopted rules in August 2014 that substantially revise “Regulation AB” (the SEC’s principal source of rules for asset-backed securities) and other rules governing the offering process, disclosure and reporting for asset-backed securities issued in registered transactions. Among other things, those rules require enhanced disclosure of asset-level information at the time of the securitization and on an ongoing basis. Certain elements of proposed Regulation AB remain outstanding, including the proposal that issuers of structured finance products offered privately provide the same initial and ongoing information as would be required if the offering were public. It is not clear when or whether any of the proposed revisions to Regulation AB that remain outstanding will be adopted, how those standards will be implemented, or what effect those standards will have on securitization transactions. The rules may, for example, have the effect of impeding new issuances and reducing the availability of investments for the Funds, or adversely affecting the market value of legacy securities that do not conform with the new rules.

There is a limited secondary market for asset-backed securities. Consequently, it may be difficult for the Funds to sell or realize profits on those securities at favorable times or for favorable prices.

CDO and CLO securities are non-recourse obligations of their issuer payable solely from the related underlying collateral or its proceeds. Therefore, as a holder of CDOs and CLOs, the Funds must rely only on distributions on the underlying collateral or related proceeds for payment. If distributions on the underlying collateral are insufficient to make payments on the CDO or CLO securities, no other assets will be available for payment of the deficiency. As a result, the amount and timing of interest and principal payments in respect of CDO and CLO securities will depend on the performance and characteristics of the related underlying collateral.

Recent legislation, such as the Dodd-Frank Act, together with uncertainty about the nature and timing of regulations that will be promulgated to implement such legislation, may continue to create uncertainty in the credit and other financial markets. Given that all applicable final implementing rules and regulations have not yet been published or are not yet in effect, the potential impact of these actions on CDOs and CLOs owned by the Funds is unknown. If existing transactions are not exempted from the new rules or regulations, compliance with those rules and regulations could impose significant costs on the issuers of CDOs and CLOs and ultimately adversely impact the holders (including the Funds) of those types of securities.

COMMERCIAL PAPER—Commercial paper is the term used to designate unsecured short-term promissory notes issued by corporations and other entities to finance short-term credit needs. Commercial paper is usually sold on a discount basis and has a maturity at the time of issuance generally not exceeding 270 days. The value of commercial paper may be affected by changes in the credit rating or financial condition of the issuing entities. The value of commercial paper will tend to fall when interest rates rise and rise when interest rates fall.

COMMODITY INVESTMENTS—Certain Funds may seek to provide exposure to the investment returns of real assets that trade in the commodity markets through investments in commodity-linked instruments, which are designed to provide this exposure without direct investment in physical commodities or commodities futures contracts. Real assets are assets such as oil, gas, industrial and precious metals, livestock, agricultural or meat products or other items that have tangible properties, as compared to stocks or bonds, which are financial instruments. The Sub-Advisers and, to the extent it directly manages the assets of a Fund, SIMC, seek to provide exposure to various commodities and commodity sectors. The value of commodity-linked instruments may be affected by a variety of factors, including, but not limited to, overall market movements and other factors affecting the value of particular industries or commodities, such as weather, disease, embargoes, acts of war or terrorism, or political and regulatory developments.

The prices of commodity-linked instruments may move in different directions than investments in traditional equity and debt securities when the value of those traditional securities is declining due to adverse economic conditions. For example, during periods of rising inflation, debt securities have historically tended to decline in value due to the general increase in prevailing interest rates. Conversely, during those same periods of rising inflation, the prices of certain commodities, such as oil and metals, have historically tended to increase in value. Of course, there cannot be any guarantee that these investments will perform in the same manner in the future, and at certain times the price movements of commodity-linked instruments have been parallel to those of debt and equity securities. In general, commodities have historically tended to increase and decrease in value during different parts of the business cycle than financial assets. Nevertheless, at various times, commodity prices may move in tandem with the prices of financial assets and thus may not provide overall portfolio diversification benefits.

Commodity-linked instruments in which a Fund invests may not produce “qualifying income” for purposes of the Qualifying Income Test (as defined below in the section titled “Taxes”), which must be met in order for a Fund to maintain its status as a RIC under the Code. To the extent a Fund invests in commodity-linked instruments directly, such Fund will seek to restrict the resulting income from such instruments so that, when combined with its other non-qualifying income, such Fund’s non-qualifying income is less than 10% of its gross income. However, a Fund may generate more non-qualifying income than anticipated, may not be able to generate qualifying income in a particular taxable year at levels sufficient to meet the Qualifying Income Test, or may not be able to accurately predict the non-qualifying income from these investments. Accordingly, the extent to which a Fund invests in commodities or commodity-linked instruments directly may be limited by the Qualifying Income Test, which a Fund must continue to satisfy to maintain its status as a RIC. Failure to comply with the Qualifying Income Test would have significant negative tax consequences to Fund shareholders. Under certain circumstances, the a Fund may be able to cure a failure to meet the Qualifying Income Test, but in order to do so the Fund may incur significant Fund-level taxes, which would effectively reduce (and could eliminate) the Fund’s returns.

CONSTRUCTION LOANS—In general, construction loans are mortgages on multifamily homes that are insured by the FHA under various federal programs of the National Housing Act of 1934 and its amendments. Several FHA programs have evolved to insure the construction financing and permanent mortgage financing on multifamily residences, nursing homes, elderly residential facilities and health care units. Project loans typically trade in two forms: either as FHA-insured or GNMA insured pass-through securities. In this case, a qualified issuer issues the pass-through securities while holding the underlying mortgage loans as collateral. Regardless of form, all projects are government-guaranteed by the U.S. Department of Housing and Urban Development through the FHA insurance fund. The credit backing of all FHA and GNMA projects derives from the FHA insurance fund, so projects issued in either form enjoy the full faith and credit backing of the U.S. Government.

Most project pools consist of one large mortgage loan rather than numerous smaller mortgages, as is typically the case with agency single-family mortgage securities. As such, prepayments on projects are driven by the incentives most mortgagors have to refinance and are very project-specific in nature. However, to qualify for certain government programs, many project securities contain specific prepayment restrictions and penalties.

Under multifamily insurance programs, the government insures the construction financing of projects as well as the permanent mortgage financing on the completed structures. This is unlike the single-family mortgage market, in which the government only insures mortgages on completed homes. Investors purchase new projects by committing to fund construction costs on a monthly basis until the project is built. Upon project completion, an investor’s construction loan commitments are converted into a proportionate share of the final permanent project mortgage loan. The construction financing portion of a project trades in the secondary market as an insured CLC. When the project is completed, the investor exchanges all the monthly CLCs for an insured PLC. The PLC is an insured pass-through security backed by the final mortgage on the completed property. As such, PLCs typically have a thirty-five to forty year maturity, depending on the type of final project. There are vastly more PLCs than CLCs in the market,

owing to the long economic lives of the project structures. While neither CLCs nor PLCs are as liquid as agency single-family mortgage securities, both are traded on the secondary market and would generally not be considered illiquid. The benefit to owning these securities is a relatively high yield combined with significant prepayment protection, which generally makes these types of securities more attractive when prepayments are expected to be high in the mortgage market. CLCs typically offer a higher yield due to the fact that they are somewhat more administratively burdensome to account for.

CREDIT-LINKED NOTES—Credit-linked notes and similarly structured products typically are issued by a limited purpose trust or other vehicle that, in turn, enters into a credit protection agreement or invests in a derivative instrument or basket of derivative instruments, such as credit default swaps or interest rate swaps, to obtain exposure to certain fixed-income markets or to remain fully invested when more traditional income producing securities are not available. Additional information about derivatives and the risks associated with them is provided under “Swaps, Caps, Floors, Collars and Swaptions.” Like an investment in a bond, an investment in credit-linked notes represents the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the security. However, these payments are conditioned on the issuer’s receipt of payments from, and the issuer’s potential obligations to, the counterparties to certain credit protection agreements or derivative instruments entered into by the issuer of the credit-linked note. For example, the issuer may sell one or more credit default swaps entitling the issuer to receive a stream of payments over the term of the swap agreements provided that no event of default has occurred with respect to the referenced debt obligation upon which the swap is based. If a default occurs, the stream of payments may stop and the issuer would be obligated to pay the counterparty the par (or other agreed upon value) of the referenced debt obligation. An investor holding a credit-linked note generally receives a fixed or floating coupon and the note’s par value upon maturity, unless the referenced creditor defaults or declares bankruptcy, in which case the investor receives the amount recovered. In effect, investors holding credit-linked notes receive a higher yield in exchange for assuming the risk of a specified credit event.

DEMAND INSTRUMENTS—Certain instruments may entail a demand feature that permits the holder to demand payment of the principal amount of the instrument. Demand instruments may include variable amount master demand notes. Demand instruments with demand notice periods exceeding seven days are considered to be illiquid securities. Additional information about illiquid securities is provided under “Illiquid Securities” below.

DERIVATIVES—In an attempt to reduce systemic and counterparty risks associated with OTC derivatives transactions, the Dodd-Frank Act requires that a substantial portion of OTC derivatives be executed in regulated markets and submitted for clearing to regulated clearinghouses. The CFTC also requires a substantial portion of derivative transactions that have historically been executed on a bilateral basis in the OTC markets to be executed through a regulated swap execution facility or designated contract market. The SEC is expected to impose a similar requirement with respect to security-based swaps. Such requirements could limit the ability of the Funds to invest or remain invested in derivatives and may make it more difficult and costly for investment funds, including the Funds, to enter into highly tailored or customized transactions. They may also render certain strategies in which a Fund might otherwise engage impossible or so costly that they will no longer be economical to implement.

OTC trades submitted for clearing will be subject to minimum initial and variation margin requirements set by the relevant clearinghouse, as well as possible SEC- or CFTC-mandated margin requirements. The regulators also have broad discretion to impose margin requirements on non-cleared OTC derivatives. Under regulations adopted by the CFTC and federal banking regulators, a Fund is required to post collateral (known as variation margin) to cover the mark-to-market exposure in respect of its uncleared swaps. These rules also mandate that collateral in the form of initial margin be posted to cover potential future exposure attributable to uncleared swap transactions for certain entities, which may include the Funds. In the event a Fund is required to post collateral in the form of initial margin in respect of its uncleared swap transactions, all such collateral will be posted with a third party custodian pursuant to a triparty custody agreement between the Fund, its dealer counterparty and an unaffiliated custodian.

Although the Dodd-Frank Act requires many OTC derivative transactions previously entered into on a principal-to-principal basis to be submitted for clearing by a regulated clearinghouse, certain of the derivatives that may be traded by a Fund may remain principal-to-principal or OTC contracts between the Fund and third parties. The risk of counterparty non-performance can be significant in the case of these OTC instruments, and “bid-ask” spreads may be unusually wide in these markets. To the extent not mitigated by implementation of the Dodd-Frank Act, if at all, the risks posed by such instruments and techniques, which can be complex, may include: (1) credit risks (the exposure to the possibility of loss resulting from a counterparty’s failure to meet its financial obligations), as further discussed below; (2) market risk (adverse movements in the price of a financial asset or commodity); (3) legal risks (the characterization of a transaction or a party’s legal capacity to enter into it could render the transaction unenforceable, and the insolvency or bankruptcy of a counterparty could pre-empt otherwise enforceable contract rights); (4) operational risk (inadequate controls, deficient procedures, human error, system failure or fraud); (5) documentation risk (exposure to losses resulting from inadequate documentation); (6) liquidity risk (exposure to losses created by inability to prematurely terminate derivative transactions); (7) systemic risk (the risk that financial difficulties in one institution or a major market disruption will cause uncontrollable financial harm to the financial system); (8) concentration risk (exposure to losses from the concentration of closely related risks such as exposure to a particular industry or exposure linked to a particular entity); and (9) settlement risk (the risk faced when one party to a transaction has performed its obligations under a contract but has not yet received value from its counterparty).

Dealers and major swap participants with whom a Fund may trade will be subject to minimum capital and margin requirements. These requirements may apply irrespective of whether the OTC derivatives in question are traded bilaterally or cleared. OTC derivatives dealers are subject to business conduct standards, disclosure requirements, reporting and recordkeeping requirements, transparency requirements, position limits, limitations on conflicts of interest, and other regulatory burdens. These requirements may increase the overall costs for OTC derivative dealers, which are likely to be passed along, at least partially, to market participants in the form of higher fees or less advantageous dealer marks. The full impact of the Dodd-Frank Act on the Funds remains uncertain, and it is unclear how the OTC derivatives markets will ultimately adapt to this new regulatory regime.

More information about particular types of derivatives instruments is included below in the sections titled “Forward Foreign Currency Contracts,” “Futures Contracts and Options on Futures Contracts,” “Options” and “Swaps, Caps, Floors, Collars and Swaptions.”

DISTRESSED SECURITIES—Distressed securities are securities of issuers that are in transition, out of favor, financially leveraged or troubled or potentially troubled, and may be, or have recently been, involved in major strategic actions, restructurings, bankruptcy, reorganization or liquidation. Distressed securities are considered risky investments, although they may also offer the potential for correspondingly high returns.

Such issuers’ securities may be considered speculative, and the ability of such issuers to pay their debts on schedule could be affected by adverse interest rate movements, changes in the general economic climate, economic factors affecting a particular industry or specific developments within such issuers.

ECONOMIC RISKS OF GLOBAL HEALTH EVENTS—An outbreak of respiratory disease caused by a novel coronavirus was first detected in China in December 2019 and has spread internationally. The transmission of COVID-19 and efforts to contain its spread have resulted in international, national and local border closings and other significant travel restrictions and disruptions, significant disruptions to business operations, disruptions to supply chains and customer activity, enhanced health screenings, significant challenges in healthcare service preparation and delivery, quarantines, event cancellations and restrictions, service cancellations, reductions and other changes, as well as general concern and uncertainty that has negatively affected the economic environment. These impacts also have caused significant volatility and declines in global financial markets, which have caused losses for investors. The impact of this COVID-19 pandemic may be short term or may last for an extended period of time, and in either case could result in a substantial economic downturn or recession.

The United States has responded to the COVID-19 pandemic and resulting economic distress with fiscal and monetary stimulus packages. In late March 2020, Congress passed, and President Trump signed, the Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”), a stimulus package providing for over \$2.2 trillion in resources to small businesses, state and local governments, and individuals that have been adversely impacted by the COVID-19 pandemic. In addition, in mid-March 2020 the Federal Reserve cut interest rates, taking the federal funds rate to a range of 0-0.25%, and has promised unlimited and open-ended quantitative easing, including purchases of corporate and municipal government bonds. The Federal Reserve also enacted various programs to support liquidity operations and funding in the financial markets, including massively expanding its reverse repurchase agreement operations, adding \$1.5 trillion of liquidity to the banking system; establishing swap lines with other major central banks to provide dollar funding; establishing a program to support money market funds; easing various bank capital buffers; providing funding backstops for businesses to provide bridging loans for up to four years; and providing funding to help credit flow in asset-backed securities markets. The Federal Reserve also plans to extend credit to small- and medium-sized businesses. In December 2020, a second stimulus package was signed to provide \$900 billion in resources to small businesses and individuals that have been adversely impacted by the COVID-19 pandemic. The effectiveness of the current legislative responses, and whether additional stimulus packages will be enacted in response to the continuing adverse economic effects of the COVID-19 pandemic, are uncertain.

The current market conditions, as well as various social and political tensions in the United States and around the world, may continue to contribute to increased market volatility, may have long-term effects on the U.S. and global financial markets, and may cause further economic uncertainties or deterioration in the United States and worldwide. The prolonged continuation or further deterioration of the current U.S. and global economic downturn could adversely impact the Funds. It is not known how long the financial markets will continue to be affected by these events nor can the effects of these or similar events in the future on the U.S. economy, the securities markets and issuers held in the Funds’ investments be predicted. Fiscal stimulus packages such as the CARES Act serve to further increase the federal budget deficit, which could lead to the downgrading of the long-term sovereign credit rating for the United States. Federal Reserve policy in response to market conditions, including with respect to certain interest rates, may adversely affect the value, volatility and liquidity of dividend and interest paying securities. Market volatility, dramatic changes to interest rates and/or a return to unfavorable economic conditions may lower the Fund’s performance or impair the Funds’ ability to achieve its investment objective.

EQUITY-LINKED WARRANTS—Equity-linked warrants provide a way for investors to access markets where entry is difficult and time consuming due to regulation. Typically, a broker issues warrants to an investor and then purchases shares in the local market and issues a call warrant hedged on the underlying holding. If the investor exercises his call and closes his position, the shares are sold and the warrant is redeemed with the proceeds.

Each warrant represents one share of the underlying stock. Therefore, the price, performance and liquidity of the warrant are all directly linked to the underlying stock. The warrant can be redeemed for 100% of the value of the underlying stock (less transaction costs). As American-style warrants, they can be exercised at any time. The warrants are U.S. dollar-denominated and priced daily on several international stock exchanges.

There are risks associated with equity-linked warrants. The investor will bear the full counterparty risk to the issuing broker; however, an adviser may select to mitigate this risk by only purchasing from issuers with high credit ratings. Equity-linked warrants also have a longer settlement period because they go through the same registration process as the underlying shares (about three weeks) and during this time the shares cannot be sold. There is currently no active trading market for equity-linked warrants. Certain issuers of such warrants may be deemed to be “investment companies” as defined in the 1940 Act. As a result, a Fund’s investment in such warrants may be limited by certain investment restrictions contained in the 1940 Act.

EQUITY SECURITIES—Equity securities represent ownership interests in a company and include common stocks, preferred stocks, warrants to acquire common stock and securities convertible into common stock.

In general, investments in equity securities are subject to market risks, which may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which a Fund invests will cause the NAV of the Fund to fluctuate. The Funds purchase and sell equity securities in various ways, including through recognized foreign exchanges, registered exchanges in the United States or the OTC market. Equity securities are described in more detail below:

Common Stock. Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.

Preferred Stock. Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock. A Fund may purchase preferred stock of all ratings as well as unrated stock.

Warrants. Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.

Convertible Securities. Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged by the holder or by the issuer into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by a Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields that are higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk and are often lower-quality securities. The Funds that invest in convertible securities may purchase convertible securities of all ratings, as well as unrated securities.

Small and Medium Capitalization Issuers. Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and the frequent lack of depth of management associated with small and medium capitalization companies. The securities of small and medium capitalization companies typically have lower trading volumes than large capitalization companies and consequently are often less liquid. Such securities may also have less market stability and may be subject to more severe, abrupt or erratic market movements than securities of larger, more established companies or the market averages in general.

Initial Public Offerings (“IPOs”). Certain Funds may purchase securities of companies that are offered pursuant to an IPO. An IPO is a company’s first offering of stock to the public in the primary market, typically to raise additional capital. Like all equity securities, IPO securities are subject to market risk and liquidity risk, but those risks may be heightened for IPO securities. The market value of IPO securities may fluctuate considerably due to factors such as the absence of a prior public market for the security, unseasoned trading of the security, the small number of shares available for trading, limited information about the issuer, and aberrational trading activity and market interest surrounding the IPO. There is also the possibility of losses resulting from the difference between the issue price and potential diminished value of the security once it is traded in the secondary market. In addition, the purchase of IPO securities may involve high transaction costs. The Funds’ investment in IPO securities may have a significant positive or negative impact on the Funds’ performance and may result in significant capital gains.

EUROBONDS—A Eurobond is a fixed income security denominated in U.S. dollars or another currency and sold to investors outside of the country whose currency is used. Eurobonds may be issued by government or corporate issuers and are typically underwritten by banks and brokerage firms from numerous countries. Although Eurobonds typically pay principal and interest in Eurodollars or U.S. dollars held in banks outside of the United States, they may pay principal and interest in other currencies.

EXCHANGE-TRADED PRODUCTS—Certain Funds may directly purchase shares of or interests in ETPs (including ETFs, ETNs and exchange-traded commodity pools). A Fund will only invest in ETPs to the extent consistent with its investment objectives, policies, strategies and limitations.

The risks of owning interests of ETPs generally reflect the risks of owning the underlying securities or other instruments that the ETP is designed to track. The shares of certain ETPs may trade at a premium or discount to their intrinsic value (*i.e.*, the market value may differ from the NAV of an ETP’s shares). For example, supply and demand for shares of an ETF or market disruptions may cause the market price of the ETF to deviate from the value of the ETF’s investments, which may be emphasized in less liquid markets. The value of an ETN may also differ from the valuation of its reference market or instrument due to changes in the issuer’s credit rating. By investing in an ETP, a Fund indirectly bears the proportionate share of any fees and expenses of the ETP in addition to the fees and expenses that the Fund and its shareholders directly bear in connection with the Fund’s operations. Because certain ETPs may have a significant portion of their assets exposed directly or indirectly to commodities or commodity-linked instruments, developments affecting commodities may have a disproportionate impact on such ETPs and may subject the ETPs to greater volatility than investments in traditional securities.

ETFs. ETFs are investment companies that are registered under the 1940 Act as open-end funds or unit investment trusts. ETFs are actively traded on national securities exchanges and are generally based on specific domestic and foreign market indexes. An “index-based ETF” seeks to track the performance of an index by holding in its portfolio either the contents of the index or a representative sample of the securities in the index. Because ETFs are based on an underlying basket of stocks or an index, they are subject to the same market fluctuations as these types of securities in volatile market swings.

ETNs. ETNs are generally senior, unsecured, unsubordinated debt securities issued by a sponsor. ETNs are designed to provide investors with a different way to gain exposure to the returns of market benchmarks, particularly those in the natural resource and commodity markets. An ETN’s returns are based

on the performance of a market index minus fees and expenses. ETNs are not equity investments or investment companies, but they do share some characteristics with those investment vehicles. As with equities, ETNs can be shorted, and as with ETFs and index funds, ETNs are designed to track the total return performance of a benchmark index. Like ETFs, ETNs are traded on an exchange and can be bought and sold on the listed exchange. However, unlike an ETF, an ETN can be held until the ETN's maturity, at which time the issuer will pay a return linked to the performance of the market index to which the ETN is linked minus certain fees. Unlike regular bonds, ETNs do not make periodic interest payments, and principal is not protected. The market value of an ETN is determined by supply and demand, the current performance of the market index to which the ETN is linked and the credit rating of the ETN issuer.

The market value of ETN shares may differ from their NAV. This difference in price may be due to the fact that the supply and demand in the market for ETN shares at any point in time is not always identical to the supply and demand in the market for the securities/commodities/instruments underlying the index that the ETN seeks to track. The value of an ETN may also change due to a change in the issuer's credit rating. As a result, there may be times when an ETN share trades at a premium or discount to its NAV.

Certain ETNs may not produce qualifying income for purposes of the Qualifying Income Test (as defined below in the section titled "Taxes"), which must be met in order for a Fund to maintain its status as a RIC under the Code. The Funds intend to monitor such investments to ensure that any non-qualifying income does not exceed permissible limits, but the Funds may not be able to accurately predict the non-qualifying income from these investments (see more information in the "Taxes" section of this SAI).

Exchange-Traded Commodity Pools. Exchange-traded commodity pools are similar to ETFs in some ways, but are not structured as registered investment companies. Shares of exchange-traded commodity pools trade on an exchange and are registered under the 1933 Act. Unlike mutual funds, exchange-traded commodity pools generally will not distribute dividends to shareholders. There is a risk that the changes in the price of an exchange-traded commodity pool's shares on the exchange will not closely track the changes in the price of the underlying commodity or index that the pool is designed to track. This could happen if the price of shares does not correlate closely with the pool's NAV, the changes in the pool's NAV do not correlate closely with the changes in the price of the pool's benchmark, or the changes in the benchmark do not correlate closely with the changes in the cash or spot price of the commodity that the benchmark is designed to track. Exchange-traded commodity pools are often used as a means of investing indirectly in a particular commodity or group of commodities, and there are risks involved in such investments. Commodity prices are inherently volatile, and the market value of a commodity may be influenced by many unpredictable factors which interrelate in complex ways, such that the effect of one factor may offset or enhance the effect of another. Supply and demand for certain commodities tends to be particularly concentrated. Commodity markets are subject to temporary distortions or other disruptions due to various factors, including periodic illiquidity in the markets for certain positions, the participation of speculators, and government regulation and intervention. In addition, U.S. futures exchanges and some foreign exchanges have regulations that limit the amount of fluctuation in some futures contract prices that may occur during a single business day. These and other risks and hazards that are inherent in a commodity or group of commodities may cause the price of that commodity or group of commodities to fluctuate widely, which will, in turn, affect the price of the exchange-traded commodity pool that invests in that commodity or group of commodities. The regulation of commodity interest transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. Considerable regulatory attention has been focused on non-traditional investment pools that are publicly distributed in the United States. There is a possibility of future regulatory changes within the United States altering, perhaps to a material extent, the nature of an investment in exchange-traded commodity pools or the ability of an exchange-traded commodity pool to continue to implement its investment strategy. In addition, various national governments outside of the United States have expressed concern regarding the disruptive effects of speculative trading in the commodities markets and the need to regulate the derivatives markets in general. The effect of any future regulatory change on exchange-traded commodity pools is impossible to predict, but could be substantial and adverse.

Exchange-traded commodity pools generally do not produce qualifying income for purposes of the Qualifying Income Test (as defined below in the section titled “Taxes”), which must be met in order for a Fund to maintain its status as a RIC under the Code. The Funds intend to monitor such investments to ensure that any non-qualifying income does not exceed permissible limits, but the Funds may not be able to accurately predict the non-qualifying income from these investments (see more information in the “Taxes” section of this SAI).

FIXED INCOME SECURITIES—Fixed income securities consist primarily of debt obligations issued by governments, corporations, municipalities and other borrowers, but may also include structured securities that provide for participation interests in debt obligations. The market value of the fixed income securities in which a Fund invests will change in response to interest rate changes and other factors. During periods of falling interest rates, the value of outstanding fixed income securities generally rises. Conversely, during periods of rising interest rates, the value of such securities generally declines. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal also affect the value of these investments. Changes in the value of these securities will not necessarily affect cash income derived from these securities, but will affect a Fund’s NAV.

Securities held by a Fund that are guaranteed by the U.S. Government, its agencies or instrumentalities guarantee only the payment of principal and interest and do not guarantee the yield or value of the securities or the yield or value of the Fund’s shares.

There is a risk that the current interest rate on floating and variable rate instruments may not accurately reflect existing market interest rates.

Additional information regarding fixed income securities is described below:

Duration. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security’s price to changes in interest rates. For example, if a fixed income security has a five-year duration, it will decrease in value by approximately 5% if interest rates rise 1% and increase in value by approximately 5% if interest rates fall 1%. Fixed income instruments with longer duration typically have higher risk and higher volatility. Longer-term fixed income securities in which a portfolio may invest are more volatile than shorter-term fixed income securities. A portfolio with a longer average portfolio duration is typically more sensitive to changes in interest rates than a portfolio with a shorter average portfolio duration.

Investment Grade Fixed Income Securities. Fixed income securities are considered investment grade if they are rated in one of the four highest rating categories by a NRSRO, or, if not rated, are determined to be of comparable quality by a Fund’s adviser, as applicable. See “Appendix A—Description of Ratings” for a description of the bond rating categories of several NRSROs. Ratings of each NRSRO represent its opinion of the safety of principal and interest payments, not the market risk, of bonds and other fixed income securities it undertakes to rate at the time of issuance. Ratings are not absolute standards of quality and may not reflect changes in an issuer’s creditworthiness. Securities rated Baa3 or higher by Moody’s or BBB- or higher by S&P are considered by those rating agencies to be “investment grade” securities, although securities rated Baa3 or BBB- lack outstanding investment characteristics and have speculative characteristics. Although issuers of bonds rated BBB by S&P are considered to have adequate capacity to meet their financial commitments, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and principal for debt in this category than debt in higher-rated categories. In the event a security owned by a Fund is downgraded below investment grade, an adviser, as applicable, will review the situation and take appropriate action with regard to the security.

Lower-Rated Securities. Lower-rated bonds or non-investment grade bonds are commonly referred to as “junk bonds” or high yield/high-risk securities. Lower-rated securities are defined as securities rated below the fourth highest rating category by an NRSRO. Such obligations are speculative and may be in default.

Fixed income securities are subject to the risk of an issuer’s ability to meet principal and interest payments on the obligation (known as “credit risk”) and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (known as “market risk”). Lower-rated or unrated (*i.e.*, high yield) securities are more likely to react to developments affecting market and credit risk than are more highly rated securities, which primarily react to movements in the general level of interest rates. Yields and market values of high yield securities will fluctuate over time, reflecting not only changing interest rates but also the market’s perception of credit quality and the outlook for economic growth. When economic conditions appear to be deteriorating, medium- to lower-rated securities may decline in value due to heightened concern over credit quality, regardless of prevailing interest rates.

Investors should carefully consider the relative risks of investing in high yield securities and understand that such securities are not generally meant for short-term investing.

Adverse economic developments can disrupt the market for high yield securities and severely affect the ability of issuers, especially highly leveraged issuers, to service their debt obligations or to repay their obligations upon maturity, which may lead to a higher incidence of default on such securities. In addition, the secondary market for high yield securities may not be as liquid as the secondary market for more highly rated securities. As a result, it may be more difficult for a Fund to sell these securities, or a Fund may only be able to sell the securities at prices lower than if such securities were highly liquid. Furthermore, a Fund may experience difficulty in valuing certain high yield securities at certain times. Under these circumstances, prices realized upon the sale of such lower-rated or unrated securities may be less than the prices used in calculating the Fund’s NAV. Prices for high yield securities may also be affected by legislative and regulatory developments.

Lower-rated or unrated fixed income obligations also present risks based on payment expectations. If an issuer calls the obligations for redemption, a Fund may have to replace the security with a lower-yielding security, resulting in a decreased return for investors. If a Fund experiences unexpected net redemptions, it may be forced to sell its higher-rated securities, resulting in a decline in the overall credit quality of the Fund’s investment portfolio and increasing the Fund’s exposure to the risks of high yield securities.

A Fund may invest in securities rated as low as “C” by Moody’s or “D” by S&P and may invest in unrated securities that are of comparable quality as “junk bonds.”

Sensitivity to Interest Rate and Economic Changes. Lower-rated bonds are very sensitive to adverse economic changes and corporate developments. During an economic downturn, highly leveraged issuers may experience financial stress that would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals and to obtain additional financing. If the issuer of a bond defaulted on its obligations to pay interest or principal or entered into bankruptcy proceedings, a Fund may incur losses or expenses in seeking recovery of amounts owed to it. In addition, periods of economic uncertainty and change can be expected to result in increased volatility of market prices of high-yield, high-risk bonds and a Fund’s NAV.

Payment Expectations. High-yield, high-risk bonds may contain redemption or call provisions. If an issuer exercised these provisions in a declining interest rate market, a Fund would have to replace the security with a lower-yielding security, resulting in a decreased return for investors. Conversely, a high-yield, high-risk bond’s value may decrease in a rising interest rate market, as will the value of a Fund’s assets. If a Fund experiences significant unexpected net redemptions, it may be forced to sell high-yield, high-risk bonds without regard to their investment merits, thereby decreasing the asset base upon which expenses can be spread and possibly reducing the Fund’s rate of return.

Liquidity and Valuation. There may be little trading in the secondary market for particular bonds, which may adversely affect a Fund's ability to value accurately or dispose of such bonds. Adverse publicity and investor perception, whether or not based on fundamental analysis, may decrease the value and liquidity of high-yield, high-risk bonds, especially in a thin market.

Taxes. A Fund may purchase debt securities (such as zero coupon or pay-in-kind securities) that contain original issue discount. Original issue discount that accretes in a taxable year is treated as earned by a Fund and is therefore subject to the distribution requirements applicable to RICs under Subchapter M of the Code. Because the original issue discount earned by a Fund in a taxable year may not be represented by cash income, the Fund may have to dispose of other securities and use the proceeds to make distributions to shareholders.

FOREIGN SECURITIES AND EMERGING AND FRONTIER MARKETS—Foreign securities are securities issued by non-U.S. issuers. Investments in foreign securities may subject a Fund to investment risks that differ in some respects from those related to investments in securities of U.S. issuers. Such risks include future adverse political and economic developments, possible imposition of withholding taxes on income, possible seizure, nationalization or expropriation of foreign deposits, possible establishment of exchange controls or taxation at the source or greater fluctuations in value due to changes in exchange rates. Foreign issuers of securities often engage in business practices that differ from those of domestic issuers of similar securities, and there may be less information publicly available about foreign issuers. In addition, foreign issuers are, generally, subject to less government supervision and regulation and different accounting treatment than those in the United States. Foreign branches of U.S. banks and foreign banks may be subject to less stringent reserve requirements than those applicable to domestic branches of U.S. banks.

The value of a Fund's investments denominated in foreign currencies will depend on the relative strengths of those currencies and the U.S. dollar, and a Fund may be affected favorably or unfavorably by changes in the exchange rates or exchange or currency control regulations between foreign currencies and the U.S. dollar. Changes in foreign currency exchange rates may also affect the value of dividends and interest earned, gains and losses realized on the sale of securities and net investment income and gains, if any, to be distributed to shareholders by a Fund. Such investments may also entail higher custodial fees and sales commissions than domestic investments.

A Fund's investments in emerging and frontier markets can be considered speculative and therefore may offer higher potential for gains and losses than investments in developed markets. With respect to an emerging market country, there may be a greater potential for nationalization, expropriation or confiscatory taxation, political changes, government regulation, social instability or diplomatic developments (including war), which could adversely affect the economies of such countries or investments in such countries. "Frontier market countries" are a subset of emerging market countries with even smaller national economies, so these risks may be magnified further. The economies of emerging and frontier countries are generally heavily dependent upon international trade and, accordingly, have been and may continue to be adversely affected by trade barriers, exchange or currency controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

The economies of frontier market countries tend to be less correlated to global economic cycles than the economies of more developed countries and their markets have lower trading volumes and may exhibit greater price volatility and illiquidity. A small number of large investments in these markets may affect these markets to a greater degree than more developed markets. Frontier market countries may also be affected by government activities to a greater degree than more developed countries. For example, the governments of frontier market countries may exercise substantial influence within the private sector or subject investments to government approval, and governments of other countries may impose or negotiate trade barriers, exchange controls, adjustments to relative currency values and other measures that adversely affect a frontier market country. Governments of other countries may also impose sanctions

or embargoes on frontier market countries. Although all of these risks are generally heightened with respect to frontier market countries, they also apply to emerging market countries.

In addition to the risks of investing in debt securities of emerging and frontier markets, a Fund's investment in government or government-related securities of emerging and frontier market countries and restructured debt instruments in emerging and frontier markets are subject to special risks, including the inability or unwillingness to repay principal and interest, requests to reschedule or restructure outstanding debt and requests to extend additional loan amounts. A Fund may have limited recourse in the event of default on such debt instruments.

Investments in the United Kingdom. In June 2016, the UK voted in a referendum to leave the EU. Although the Funds are established in the United States, the withdrawal of the UK from the EU, or "Brexit," may cause the Funds to face a number of associated risks that could adversely affect returns to investors, including, but not limited to, risks associated with an uncertain regulatory landscape, currency fluctuation risks, and risks associated with general market disruption.

The UK formally notified the European Council of its intention to withdraw from the EU by invoking article 50 of the Lisbon Treaty in March 2017. On January 31, 2020, the UK officially withdrew from the EU and entered into a transition phase that expired on December 31, 2020. On January 1, 2021, the free movement of people and goods and services between the UK and EU ended and a Trade and Customs Agreement became provisionally effective. As such, there will be changes to: European travel rules, duty-free shopping, rules for UK citizens moving to the EU and EU citizens living in the UK, the UK immigration system and trading between the UK and EU. Northern Ireland will become an exception to many of these changes. Brexit may also cause additional member states to contemplate departing from the EU, which would likely perpetuate political and economic instability in the region and cause additional market disruption in global financial markets. These changes could cause market disruptions, could change consumer demand for certain goods and services or alter the way in which goods and services are consumed, could cause some operating companies to sell components of their business or change their operating footprint, or could affect the operations and revenue of certain operating companies in which the Funds invest, all of which could impact the performance of the Funds.

In particular, the UK leaving the EU has led to a decline in the value of sterling against other currencies, including the euro and the U.S. dollar, which decline could continue for an indeterminate length of time. Accordingly, the sterling cost of potential investments denominated in euros, the U.S. dollar and other non-sterling currencies has increased and may continue to increase, making such investments more expensive. In addition, underlying investment funds in which a Fund holds an interest could be similarly and adversely impacted.

Investments in China—China is an emerging market, and as a result, investments in securities of companies organized and listed in China may be subject to liquidity constraints and significantly higher volatility, from time to time, than investments in securities of more developed markets. China may be subject to considerable government intervention and varying degrees of economic, political and social instability. These factors may result in, among other things, a greater risk of stock market, interest rate, and currency fluctuations, as well as inflation. Accounting, auditing and financial reporting standards in China are different from U.S. standards and, therefore, disclosure of certain material information may not be made, may be less available, or may be less reliable. It may also be difficult or impossible for the Fund to obtain or enforce a judgment in a Chinese court. In addition, periodically there may be restrictions on investments in Chinese companies. For example, on November 12, 2020, the President of the United States of America signed an Executive Order prohibiting U.S. persons from purchasing or investing in publicly-traded securities of companies identified by the U.S. Government as "Communist Chinese military companies" or in instruments that are derivative of, or are designed to provide investment exposure to, those companies. The universe of affected securities can change from time to time. As a result of an increase in the number of investors looking to sell such securities, or because of an inability to participate in an investment that the Adviser or a Sub-Adviser otherwise believes is attractive, a Fund may incur

losses. Certain securities that are or become designated as prohibited securities may have less liquidity as a result of such designation and the market price of such prohibited securities may decline, potentially causing losses to a Fund. In addition, the market for securities of other Chinese-based issuers may also be negatively impacted, resulting in reduced liquidity and price declines.

Investments in the China A-Shares. A Fund may invest in People's Republic of China ("PRC") A-Shares through the Shanghai-Hong Kong Stock Connect program or Shenzhen-Hong Kong Stock Connect program (collectively, the "Stock Connect") subject to any applicable laws, rules and regulations. The Stock Connect is a securities trading and clearing linked program developed by Hong Kong Exchanges and Clearing Limited ("HKEx"), the Hong Kong Securities Clearing Company Limited ("HKSCC"), Shanghai Stock Exchange ("SSE"), Shenzhen Stock Exchange ("SZSE") and China Securities Depository and Clearing Corporation Limited ("ChinaClear") with the aim of achieving mutual stock market access between PRC and Hong Kong. This program allows foreign investors to trade certain SSE-listed or SZSE-listed PRC A-Shares through their Hong Kong based brokers. All Hong Kong and overseas investors in the Stock Connect will trade and settle SSE or SZSE securities in the offshore Renminbi ("CNH") only. A Fund will be exposed to any fluctuation in the exchange rate between the U.S. Dollar and CNH in respect of such investments.

By seeking to invest in the domestic securities markets of the PRC via the Stock Connect a Fund is subject to the following additional risks:

General Risks. The relevant regulations are relatively untested and subject to change which may have potential retrospective effect. There is no certainty as to how they will be applied, which could adversely affect a Fund. The program requires the use of new information technology systems which may be subject to operational risk due to the program's cross-border nature. If the relevant systems fail to function properly, trading in both Hong Kong and PRC markets through the program could be disrupted.

Stock Connect will only operate on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. There may be occasions when it is a normal trading day for the PRC market but the Stock Connect is not trading. As a result, a Fund may be subject to the risk of price fluctuations in PRC A-Shares when the Fund cannot carry out any PRC A-Shares trading.

Each of the Hong Kong Stock Exchange ("SEHK"), SSE and SZSE reserves the right to suspend trading if necessary for ensuring an orderly and fair market and that risks are managed prudently. In case of a suspension, the Fund's ability to access the PRC market will be adversely affected.

PRC regulations impose restrictions on selling and buying certain Stock Connect securities from time to time. In the event that a Stock Connect security is recalled from the scope of eligible securities for trading via Stock Connect, the ability of the Fund to invest in Stock Connect securities will be adversely affected.

Clearing and Settlement Risk. HKSCC and ChinaClear have established the clearing links and each will become a participant of each other to facilitate clearing and settlement of cross-boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants and on the other hand undertake to fulfill the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

In the event ChinaClear defaults, HKSCC's liabilities under its market contracts with clearing participants may be limited to assisting clearing participants with claims. It is anticipated that HKSCC will act in good faith to seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or the liquidation of ChinaClear. As ChinaClear does not contribute to the HKSCC guarantee fund, HKSCC will not use the HKSCC guarantee fund to cover any residual loss as a result of closing out any of ChinaClear's positions. HKSCC will in turn distribute the Stock Connect Securities and/or monies recovered to clearing participants on a pro-rata basis. The relevant broker through whom a Fund trades shall in turn distribute Stock Connect securities and/or monies to the extent recovered directly or indirectly

from HKSCC. As such, a Fund may not fully recover their losses or their Stock Connect Securities and/or the process of recovery could be delayed.

Legal/Beneficial Ownership. The Stock Connect securities purchased by a Fund will be held by the relevant sub-custodian in accounts in the Hong Kong Central Clearing and Settlement System (“CCASS”) maintained by the HKSCC, as central securities depository in Hong Kong. The HKSCC will be the “nominee holder” of the Funds’ Stock Connect Securities traded through Stock Connect. The Stock Connect regulations as promulgated by the China Securities Regulatory Commission (“CSRC”) expressly provide that HKSCC acts as nominee holder and that the Hong Kong and overseas investors (such as the Funds) enjoy the rights and interests with respect to the Stock Connect Securities acquired through Stock Connect in accordance with applicable laws. While the distinct concepts of nominee holder and beneficial owner are referred to under such regulations, as well as other laws and regulations in PRC, the application of such rules is untested, and there is no assurance that PRC courts will recognise such concepts, for instance in the liquidation proceedings of PRC companies. Therefore, although the Funds’ ownership may be ultimately recognised, it may suffer difficulties or delays in enforcing its rights over its Stock Connect securities.

To the extent that HKSCC is deemed to be performing safekeeping functions with respect to assets held through it, it should be noted that a Fund and its custodian will have no legal relationship with HKSCC and no direct legal recourse against HKSCC in the event that the Fund suffers losses resulting from the performance or insolvency of HKSCC.

Participation in corporate actions and shareholder meetings. Hong Kong and overseas investors (including the Fund) are holding Stock Connect securities traded via the Stock Connect through their brokers or custodians, and they need to comply with the arrangement and deadline specified by their respective brokers or custodians (i.e. CCASS participants). The time for them to take actions for some types of corporate actions of Stock Connect Securities may be as short as one business day only. Therefore, the Fund may not be able to participate in some corporate actions in a timely manner. According to existing mainland practice, multiple proxies are not available. Therefore, the Fund may not be able to appoint proxies to attend or participate in shareholders’ meetings in respect of the Stock Connect securities.

Operational Risk. The HKSCC provides clearing, settlement, nominee functions and other related services in respect of trades executed by Hong Kong market participants. PRC regulations which include certain restrictions on selling and buying will apply to all market participants. In the case of a sale, pre-delivery of shares to the broker is required, increasing counterparty risk. As a result, a Fund may not be able to purchase and/or dispose of holdings of PRC A-Shares in a timely manner.

Quota Limitations. The Stock Connect program is subject to daily quota limitations which may restrict a Fund’s ability to invest in PRC A-Shares through the program on a timely basis.

Investor Compensation. A Fund will not benefit from Hong Kong’s Investor Compensation Fund and the PRC local investor compensation schemes.

Investments in the China Interbank Bond Market—A Fund may invest in the China Interbank Bond Market (the “CIBM”) through the Bond Connect program (the “Bond Connect”) subject to any applicable regulatory limits. Bond Connect is a bond trading and settlement linked program developed by the People’s Bank of China (“PBOC”), the Hong Kong Monetary Authority (“HKMA”), China Foreign Exchange Trade System & National Interbank Funding Centre (“CFETS”), China Central Depository & Clearing Co., Ltd. (“CCDC”), Shanghai Clearing House (“SHCH”), HKEx and Central Money Markets Unit (“CMU”), with the aim of achieving mutual bond market access between the PRC and Hong Kong. For the time being, this program allows eligible Hong Kong and overseas investors to invest in the bonds traded in the CIBM through the northbound trading of Bond Connect (the “Northbound Trade Link”) only.

Starting July 3, 2017, eligible Hong Kong and overseas investors may use their own sources of Renminbi in the PRC offshore market CNH or convert foreign currencies into the Renminbi to invest in CIBM bonds under Bond Connect. A Fund will be exposed to any fluctuation in the exchange rate between

the U.S. Dollar and Renminbi in respect of such investments. Currently, there is no investment quota for the Northbound Trade Link.

By seeking to invest in the CIBM via Bond Connect, a Fund is subject to the following additional risks:

General Risk. Although there is no quota limitation regarding investment via the Bond Connect, a Fund is required to make further filings with the PBOC if it wishes to increase its anticipated investment size or if there is any material change to the filed information. There is no guarantee the PBOC will accept such further filings. In the event any further filings for an increase in the anticipated investment size are not accepted by the PBOC, a Fund's ability to invest in the CIBM will be limited and the performance of the Fund may be unfavourably affected as a result. The PBOC will exercise on-going supervision of the onshore settlement agent and the Fund's trading under the CIBM rules. The PBOC may take relevant administrative actions such as suspension of trading and mandatory exit against the Fund in the event of non-compliance with the CIBM Rules.

Market Risk. A Fund investing in the CIBM is subject to liquidity and volatility risks. Market volatility and potential lack of liquidity due to possible low trading volume of certain bonds in the CIBM may result in prices of certain bonds traded in the CIBM fluctuating significantly. The bid and offer spreads of the prices of such bonds may be large, and the Fund may therefore incur significant trading and realization costs and may even suffer losses when selling such investments.

To the extent that a Fund transacts in the CIBM, the Fund may also be exposed to risks associated with settlement procedures and default of counterparties. The counterparty which has entered into a transaction with the Fund may default in its obligation to settle the transaction by failing to deliver relevant securities or to make payment.

Third Party Agent Risk. Under the Northbound Trading Link, CFETS or other institutions recognized by PBOC (as the registration agents) shall apply for registration with PBOC for the eligible Hong Kong and overseas investors. In addition, CMU (as the offshore custody agent recognized by the HKMA) shall open a nominee account with CCD/C/SHCH (as the onshore custody agent) as nominee holder of the CIBM bonds purchased by Hong Kong and overseas investors through Bond Connect.

As the relevant filings, registration with PBOC, and account opening have to be carried out by an onshore settlement agent, offshore custody agent, registration agent or other third parties (as the case may be), a Fund is subject to the risks of default or errors on the part of such third parties.

Operational Risk. Bond Connect provides a relatively new channel for investors from Hong Kong and overseas to access the CIBM directly. It is premised on the functioning of the operational systems of the relevant market participants. Market participants are able to participate in this program subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant authorities.

The "connectivity" in Bond Connect requires routing of orders across the border. This requires the development of new information technology systems. There is no assurance that the systems of market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading in the CIBM through Bond Connect could be disrupted. A Fund's ability to access the CIBM (and hence to pursue its investment strategy) will be adversely affected.

Regulatory Risk. The PBOC Bond Connect rules are departmental regulations having legal effect in the PRC. However, the application of such rules is untested, and there is no assurance that PRC courts will recognize such rules.

Bond Connect is novel in nature and is subject to regulations promulgated by regulatory authorities and implementation rules made by the relevant authorities in the PRC and Hong Kong. Further, new regulations may be promulgated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under Bond Connect.

The regulations are untested so far and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change which may have potential retrospective effect. In the event that the relevant PRC authorities suspend account opening or trading under the Bond Connect, the ability of the Fund to invest in the CIBM and the ability of the Fund to achieve its investment objective will be adversely affected. In addition, there can be no assurance that Bond Connect will not be abolished. A Fund which may invest in the CIBM through Bond Connect may be adversely affected as a result of such changes.

Legal/Beneficial Ownership Risk. CIBM bonds will be held by CMU as a nominee holder of the bonds purchased by foreign investors through Bond Connect. The PBOC has made it clear that the ultimate investors are the beneficial owners of the relevant bonds and shall exercise their rights against the bond issuer through CMU as the nominee holder. The PBOC also made various references to Stock Connect and indicated the position is essentially the same. Please refer to the *Investments in the China A-Shares* section for more information. While the distinct concepts of nominee holder and beneficial owner are referred to under PBOC rules or regulations, as well as other laws and regulations in the PRC, the application of such rules is untested, and there is no assurance that PRC courts will recognize such concepts. Therefore, although the Funds' ownership may be ultimately recognized, it may suffer difficulties or delays in enforcing its rights over CIBM bonds.

Tax within the PRC. Uncertainties in the PRC tax rules governing taxation of income and gains from investments in PRC securities could result in unexpected tax liabilities for a Fund. A Fund's investments in securities, including A-Shares and CIBM bonds, issued by PRC companies may cause the Fund to become subject to withholding and other taxes imposed by the PRC.

If a Fund were considered to be a tax resident enterprise of the PRC, it would be subject to PRC corporate income tax at the rate of 25% on its worldwide taxable income. If a Fund were considered to be a non-tax resident enterprise with a "permanent establishment" in the PRC, it would be subject to PRC corporate income tax on the profits attributable to the permanent establishment. The advisers intend to operate the Funds in a manner that will prevent them from being treated as tax resident enterprises of the PRC and from having a permanent establishment in the PRC. It is possible, however, that the PRC could disagree with that conclusion, or that changes in PRC tax law could affect the PRC corporate income tax status of a Fund.

Unless reduced or exempted by the applicable tax treaties, the PRC generally imposes withholding income tax at the rate of 10% on dividends, premiums, interest and capital gains originating in the PRC and paid to a company that is not a resident of the PRC for tax purposes and that has no permanent establishment in China.

The advisers or a Fund may also potentially be subject to PRC value added tax at the rate of 6% on capital gains derived from trading of A-Shares, CIBM bonds and interest income (if any). Existing guidance provides a temporary value added tax exemption for Hong Kong and overseas investors in respect of their gains derived from the trading of Chinese securities through Stock Connect and Bond Connect. Because there is no indication how long the temporary exemption will remain in effect, the Funds may be subject to such value added tax in the future. In addition, urban maintenance and construction tax (currently at rates ranging from 1% to 7%), educational surcharge (currently at the rate of 3%) and local educational surcharge (currently at the rate of 2%) (collectively, the "surtaxes") are imposed based on value added tax liabilities, so if the advisers or a Fund were liable for value added tax it would also be required to pay the applicable surtaxes.

Taxation of A-Shares. The Ministry of Finance of the PRC, the State Administration of Taxation of the PRC and the CSRC (collectively, the "PRC Tax Authorities") issued the "Notice on the Pilot Program of Shanghai-Hong Kong Stock Connect" Caishui [2014] No.81 ("Notice 81"), on October 31, 2014, which states that the capital gain from disposal of A-Shares by foreign investors enterprises via the Shanghai-Hong Kong Stock Connect program will be temporarily exempt from withholding income tax. Notice 81 also states that the dividends derived from A-Shares by foreign investors enterprises are subject to 10% withholding income tax.

The PRC Tax Authorities issued the “Notice on the Pilot Program of Shenzhen-Hong Kong Stock Connect” Caishui [2016] No.127 (“Notice 127”) on November 5, 2016, which states that the capital gain from disposal of A-Shares by foreign investors enterprises via the Shenzhen-Hong Kong Stock Connect program will be temporarily exempt from withholding income tax. Notice 127 also states that the dividends derived from A-Shares by foreign investors enterprises are subject to 10% withholding income tax.

Because there is no indication how long the temporary exemption will remain in effect, the Funds may be subject to such withholding tax in future. If in the future China begins applying tax rules regarding the taxation of income from A-Shares investment through the Stock Connect, and/or begins collecting capital gains taxes on such investments, a Fund could be subject to withholding tax liability if the Fund determines that such liability cannot be reduced or eliminated by applicable tax treaties. The negative impact of any such tax liability on a Fund’s return could be substantial.

The PRC rules for taxation of Stock Connect are evolving, and the tax regulations to be issued by the PRC State Administration of Taxation and/or PRC Ministry of Finance to clarify the subject matter may apply retrospectively, even if such rules are adverse to a Fund and its shareholders.

Taxation of CIBM Bonds. The Ministry of Finance of the PRC and the State Administration of Taxation of the PRC issued Caishui No. 108 on November 7, 2018 (“Notice 108”), which states that foreign investors will be temporarily exempt from the withholding income tax on their gains derived from CIBM bond interest.

The temporary exemption of withholding tax and value added tax will remain in effect until November 6, 2021. If, in the future, China begins to apply tax rules regarding the taxation of bond interest income derived by foreign investment in CIBM, and/or begins to collect withholding tax and other taxes on such investment, the advisers or a Fund could be subject to such withholding tax and value added tax.

The above information is only a general summary of the potential Chinese tax consequences that may be imposed on the Funds and their shareholders either directly or indirectly and should not be taken as a definitive, authoritative or comprehensive statement of the relevant matter. Shareholders should seek their own tax advice on their tax position with regard to their investment in the Funds.

The Chinese government has implemented a number of tax reform policies in recent years. The current tax laws and regulations may be revised or amended in the future. Any revision or amendment in tax laws and regulations may affect the after-taxation profit of Chinese companies and foreign investors in such companies, such as the Funds.

FORWARD FOREIGN CURRENCY CONTRACTS—A forward foreign currency contract involves a negotiated obligation to purchase or sell a specific currency at a future date or range of future dates (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are generally traded in the interbank market conducted directly between currency traders (usually large, commercial banks) and their customers. A forward foreign currency contract generally has no deposit requirement, and no commissions are charged at any stage for trades.

Forward contracts generally may not be liquidated prior to the stated maturity date, although the parties to a contract may agree to enter into a second offsetting transaction with the same maturity, thereby fixing each party’s profit or loss on the two transactions. Nevertheless, each position must still be maintained to maturity unless the parties separately agree on an earlier settlement date. As a result, a party to a forward contract must be prepared to perform its obligations under each such contract in full. Parties to a forward contract may also separately agree to extend the contract by “rolling” it over prior to the originally scheduled settlement date. A Fund may use forward contracts for cash equitization purposes, which allows a Fund to invest consistent with its investment strategy while managing daily cash flows, including significant client inflows and outflows.

The Funds may use currency instruments as part of a hedging strategy, as described below.

Transaction Hedging. Transaction hedging is entering into a currency transaction with respect to specific assets or liabilities of a Fund, which will generally arise in connection with the purchase or sale of its portfolio securities or the receipt of income therefrom. A Fund may enter into transaction hedging out of a desire to preserve the U.S. dollar price of a security when it enters into a contract for the purchase or sale of a security denominated in a foreign currency. A Fund may be able to protect itself against possible losses resulting from changes in the relationship between the U.S. dollar and foreign currencies during the period between the date the security is purchased or sold and the date on which payment is made or received by entering into a forward contract for the purchase or sale, for a fixed amount of U.S. dollars, of the amount of the foreign currency involved in the underlying security transactions.

Position Hedging. A Fund may sell a non-U.S. currency and purchase U.S. currency to reduce exposure to the non-U.S. currency (called “position hedging”). A Fund may use position hedging when an adviser reasonably believes that the currency of a particular foreign country may suffer a substantial decline against the U.S. dollar. A Fund may enter into a forward foreign currency contract to sell, for a fixed amount of U.S. dollars, the amount of foreign currency approximating the value of some or all of its portfolio securities denominated in such foreign currency. The forward foreign currency contract amount and the value of the portfolio securities involved may not have a perfect correlation because the future value of the securities hedged will change as a consequence of the market between the date the forward contract is entered into and the date it matures.

Cross Hedges. A Fund may also cross-hedge currencies by entering into transactions to purchase or sell one or more currencies that are expected to decline in value relative to other currencies to which the Fund has, or in which the Fund expects to have, portfolio exposure.

Proxy Hedges. Proxy hedging is often used when the currency to which a Fund’s portfolio is exposed is difficult to hedge or to hedge against the U.S. dollar. Proxy hedging entails entering into a forward contract to sell a currency whose changes in value are generally considered to be linked to a currency or currencies in which some or all of a Fund’s portfolio securities are, or are expected to be denominated, and to buy U.S. dollars. The amount of the contract would not exceed the value of the Fund’s securities denominated in linked currencies.

In addition to the hedging transactions described above, the Funds may also engage in currency transactions in an attempt to take advantage of certain inefficiencies in the currency exchange market, to increase their exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one currency to another.

Unless consistent with and permitted by its stated investment policies, a Fund will not enter into a transaction to hedge currency exposure to an extent greater, after netting all transactions intended wholly or partially to offset other transactions, than the aggregate market value (at the time of entering into the transaction) of the securities held in its portfolio that are denominated or generally quoted in or currently convertible into such currency, other than with respect to proxy hedging, described above. If consistent with and permitted by its stated investment policies, a Fund may take long and short positions in foreign currencies in excess of the value of the Fund’s assets denominated in a particular currency or when the Fund does not own assets denominated in that currency. Certain Funds may engage in currency transactions for hedging purposes as well as to enhance the Fund’s returns.

A non-deliverable forward transaction is a transaction that represents an agreement between a Fund and a counterparty (usually a commercial bank) to buy or sell a specified (notional) amount of a particular currency at an agreed-upon foreign exchange rate on an agreed upon future date. The non-deliverable forward transaction position is closed using a fixing rate, as defined by the central bank in the country of the currency being traded, that is generally publicly stated within one or two days prior to the settlement date. Unlike other currency transactions, there is no physical delivery of the currency on the settlement of a non-deliverable forward transaction. Rather, a Fund and the counterparty agree to net the settlement by making a payment in U.S. dollars or another fully convertible currency that represents any differential between the foreign exchange rate agreed upon at the inception of the non-deliverable forward agreement

and the actual exchange rate on the agreed-upon future date. Thus, the actual gain or loss of a given non-deliverable forward transaction is calculated by multiplying the transaction's notional amount by the difference between the agreed-upon forward exchange rate and the actual exchange rate when the transaction is completed. Although forward foreign currency transactions are exempt from the definition of "swap" under the Commodity Exchange Act, non-deliverable forward transactions are not, and, thus, are subject to the jurisdiction of the CFTC.

Trading options on currency futures contracts is relatively new, and the ability to establish and close out positions on such options is subject to the maintenance of a liquid market, which may not always be available. An option on a currency provides the purchaser, or "holder," with the right, but not the obligation, to purchase, in the case of a "call" option, or sell, in the case of a "put" option, a stated quantity of the underlying currency at a fixed exchange rate up to a stated expiration date (or, in the case of certain options, on such date). The holder generally pays a nonrefundable fee for the option, referred to as the "premium," but cannot lose more than this amount, plus related transaction costs. Thus, where a Fund is a holder of options contracts, such losses will be limited in absolute amount. In contrast to a forward contract, an option imposes a binding obligation only on the seller, or "writer." If the holder exercises the option, the writer is obligated to complete the transaction in the underlying currency. An option generally becomes worthless to the holder when it expires. In addition, in the context of an exchange-traded option, the writer is often required to deposit initial margin and may be required to increase the margin on deposit if the market moves against the writer's position. Options on currencies may be purchased in the OTC market between commercial entities dealing directly with each other as principals. In purchasing an OTC currency option, the holder is subject to the risk of default by the writer and, for this reason, purchasers of options on currencies may require writers to post collateral or other forms of performance assurance.

Buyers and sellers of currency futures contracts are subject to the same risks that apply to the use of futures contracts generally, which are described elsewhere in this SAI. Further, settlement of a currency futures contract for the purchase of most currencies must occur at a bank based in the issuing nation, which may subject a Fund to additional risk.

Risks. Currency transactions are subject to risks that are different from those of other portfolio transactions. Currency exchange rates may fluctuate based on factors extrinsic to that country's economy. Although forward foreign currency contracts and currency futures tend to minimize the risk of loss due to a decline in the value of the hedged currency, at the same time they may limit any potential gain which might result should the value of such currency increase. Because currency control is of great importance to the issuing governments and influences economic planning and policy, purchase and sales of currency and related instruments can be negatively affected by government exchange controls, blockages, and manipulations or exchange restrictions imposed by governments. These can result in losses to a Fund if it is unable to deliver or receive currency or funds in the settlement of obligations and could also cause hedges it has entered into to be rendered useless, resulting in full currency exposure as well as incurring transaction costs. Buyers and sellers of currency futures are subject to the same risks that apply to the use of futures generally. Further, settlement of a currency futures contract for the purchase of most currencies must occur at a bank based in the issuing nation. Trading options on currency futures is relatively new, and the ability to establish and close out positions on such options is subject to the maintenance of a liquid market, which may not always be available.

The Funds may take active positions in currencies, which involve different techniques and risk analyses than the Funds' purchase of securities. Active investment in currencies may subject the Funds to additional risks, and the value of the Funds' investments may fluctuate in response to broader macroeconomic risks than if the Funds invested only in fixed income securities. The Funds may take long and short positions in foreign currencies in excess of the value of the Funds' assets denominated in a particular currency or when the Funds do not own assets denominated in that currency. If a Fund enters into currency transactions when it does not own assets denominated in that currency, the Fund's volatility may increase and losses on such transactions will not be offset by increases in the value of the Fund's assets.

Currency hedging involves some of the same risks and considerations as other transactions with similar instruments. Currency transactions can result in losses to a Fund if the currency being hedged fluctuates in value to a degree in a direction that is not anticipated. Furthermore, there is a risk that the perceived linkage between various currencies may not be present or may not be present during the particular time that a Fund is engaging in proxy hedging. Suitable hedging transactions may not be available in all circumstances. Hedging transactions may also eliminate any chance for a Fund to benefit from favorable fluctuations in relevant foreign currencies. If a Fund enters into a currency transaction, the Fund will “cover” its position as required by the 1940 Act.

Risks associated with entering into forward foreign currency contracts include the possibility that the market for forward foreign currency contracts may be limited with respect to certain currencies and, upon a contract’s maturity, the inability of a Fund to negotiate with the dealer to enter into an offsetting transaction. As mentioned above, forward foreign currency contracts may be closed out only by the parties entering into an offsetting contract. This creates settlement risk in forward foreign currency contracts, which is the risk of loss when one party to the forward foreign currency contract delivers the currency it sold but does not receive the corresponding amount of the currency it bought. Settlement risk arises in deliverable forward foreign currency contracts where the parties have not arranged to use a mechanism for payment-versus-payment settlement, such as an escrow arrangement. In addition, the correlation between movements in the prices of those contracts and movements in the price of the currency hedged or used for cover will not be perfect. There is no assurance an active forward foreign currency contract market will always exist. These factors will restrict a Fund’s ability to hedge against the risk of devaluation of currencies in which the Fund holds a substantial quantity of securities and are unrelated to the qualitative rating that may be assigned to any particular security. In addition, if a currency devaluation is generally anticipated, the Fund may not be able to contract to sell currency at a price above the devaluation level it anticipates. The successful use of forward foreign currency contracts as a hedging technique draws upon special skills and experience with respect to these instruments and usually depends on the ability of an adviser to forecast interest rate and currency exchange rate movements correctly. Should interest or exchange rates move in an unexpected manner, the Fund may not achieve the anticipated benefits of forward foreign currency contracts or may realize losses and thus be in a worse position than if those strategies had not been used. Many forward foreign currency contracts are subject to no daily price fluctuation limits so adverse market movements could continue with respect to those contracts to an unlimited extent over a period of time.

FUTURES CONTRACTS AND OPTIONS ON FUTURES CONTRACTS—Futures contracts (also called “futures”) provide for the future sale by one party and purchase by another party of a specified amount of a specific security at a specified future time and at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made, and generally contracts are closed out prior to the expiration date of the contract.

A Fund may also invest in Treasury futures, interest rate futures, interest rate swaps, and interest rate swap futures. A Treasury futures contract involves an obligation to purchase or sell Treasury securities at a future date at a price set at the time of the contract. The sale of a Treasury futures contract creates an obligation by the Fund to deliver the amount of certain types of Treasury securities called for in the contract at a specified future time for a specified price. A purchase of a Treasury futures contract creates an obligation by the Fund to take delivery of an amount of securities at a specified future time at a specific price. Interest rate futures can be sold as an offset against the effect of expected interest rate increases and purchased as an offset against the effect of expected interest rate declines. Interest rate swaps are an agreement between two parties where one stream of future interest rate payments is exchanged for another based on a specified principal amount. Interest rate swaps often exchange a fixed payment for a

floating payment that is linked to a particular interest rate. Interest rate swap futures are instruments that provide a way to gain swap exposure and the structure features of a futures contract in a single instrument. Swap futures are futures contracts on interest rate swaps that enable purchasers to cash settle at a future date at the price determined by the benchmark rate at the end of a fixed period.

A Fund will reduce the risk that it will be unable to close out a futures contract by only entering into futures contracts that are traded on national futures exchanges regulated by the CFTC. Subject to their permitted investment strategies, certain Funds may use futures contracts and related options for either hedging purposes or risk management purposes, or to gain exposure to currencies, as well as to enhance the Fund's returns. Instances in which a Fund may use futures contracts and related options for risk management purposes include: (i) attempting to offset changes in the value of securities held or expected to be acquired or be disposed of; (ii) attempting to minimize fluctuations in foreign currencies; (iii) attempting to gain exposure to a particular market, index or instrument; or (iv) other risk management purposes. A Fund may use futures contracts for cash equitization purposes, which allows a Fund to invest consistent with its investment strategy while managing daily cash flows, including significant client inflows and outflows.

When a Fund purchases or sells a futures contract, or sells an option thereon, the Fund is required to "cover" its position as required by the 1940 Act. A Fund may also "cover" its long position in a futures contract by purchasing a put option on the same futures contract with a strike price (*i.e.*, an exercise price) as high as or higher than the price of the futures contract. In the alternative, if the strike price of the put is less than the price of the futures contract, the Fund will earmark on the books of the Fund or place in a segregated account cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. A Fund may also "cover" its long position in a futures contract by taking a short position in the instruments underlying the futures contract or by taking positions in instruments with prices that are expected to move relatively consistently with the futures contract. A Fund may "cover" its short position in a futures contract by taking a long position in the instruments underlying the futures contract or by taking positions in instruments with prices that are expected to move relatively consistently with the futures contract. A Fund may enter into agreements with broker-dealers which require the broker-dealers to accept physical settlement for certain futures contracts. If this occurs, the Fund would treat the futures contract as being cash-settled for purposes of determining the Fund's coverage requirements.

A Fund may also "cover" its sale of a call option on a futures contract by taking a long position in the underlying futures contract at a price less than or equal to the strike price of the call option. In the alternative, if the long position in the underlying futures contract is established at a price greater than the strike price of the written (sold) call, the Fund will earmark on the books of the Fund or place in a segregated account cash or liquid securities equal in value to the difference between the strike price of the call and the price of the futures contract. A Fund may also "cover" its sale of a call option by taking positions in instruments with prices that are expected to move relatively consistently with the call option. A Fund may "cover" its sale of a put option on a futures contract by taking a short position in the underlying futures contract at a price greater than or equal to the strike price of the put option or, if the short position in the underlying futures contract is established at a price less than the strike price of the written put, the Fund will earmark on the books of the Fund or place in a segregated account cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. A Fund may also "cover" its sale of a put option by taking positions in instruments with prices that are expected to move relatively consistently with the put option.

There are significant risks associated with a Fund's use of futures contracts and options on futures contracts, including: (i) the success of a hedging strategy may depend on an adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (ii) there may be an imperfect or no correlation between the changes in market value of the securities held by a Fund and the prices of futures and options on futures; (iii) there may not be a liquid secondary market for a futures contract or option; (iv) trading restrictions or limitations may be imposed by an exchange; and

(v) government regulations may restrict trading in futures contracts and options on futures contracts. In addition, some strategies reduce a Fund's exposure to price fluctuations, while others tend to increase its market exposure.

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION SECURITIES—Certain Funds may invest in securities issued by GNMA, a wholly owned U.S. Government corporation that guarantees the timely payment of principal and interest. However, any premiums paid to purchase these instruments are not subject to GNMA guarantees.

GNMA securities represent ownership in a pool of federally insured mortgage loans. GNMA certificates consist of underlying mortgages with a maximum maturity of 30 years. However, due to scheduled and unscheduled principal payments, GNMA certificates have a shorter average maturity and, therefore, less principal volatility than a comparable 30-year mortgage-backed bond. Because prepayment rates vary widely, it is not possible to accurately predict the average maturity of a particular GNMA pool. The scheduled monthly interest and principal payments relating to mortgages in the pool will be "passed through" to investors. GNMA securities differ from conventional bonds in that principal is paid back to the certificate holders over the life of the loan rather than at maturity. As a result, a Fund will receive monthly scheduled payments of principal and interest. In addition, a Fund may receive unscheduled principal payments representing prepayments on the underlying mortgages. Any prepayments will be reinvested at the then-prevailing interest rate.

Although GNMA certificates may offer yields higher than those available from other types of U.S. Government securities, GNMA certificates may be less effective than other types of securities as a means of "locking in" attractive long-term rates because of the prepayment feature. The market value and interest yield of these instruments can vary due to market interest rate fluctuations and early prepayments of underlying mortgages. Due to this prepayment feature, GNMA certificates tend not to increase in value as much as most other debt securities when interest rates decline.

HIGH YIELD FOREIGN SOVEREIGN DEBT SECURITIES—Investing in fixed and floating rate high yield foreign sovereign debt securities will expose a Fund to the direct or indirect consequences of political, social or economic changes in the countries that issue the securities. The ability of a foreign sovereign obligor to make timely payments on its external debt obligations will also be strongly influenced by the obligor's balance of payments, including export performance, its access to international credits and investments, fluctuations in interest rates and the extent of its foreign reserves. Countries such as those in which a Fund may invest have historically experienced, and may continue to experience, high rates of inflation, high interest rates, exchange rate or trade difficulties and extreme poverty and unemployment. Many of these countries are also characterized by political uncertainty or instability. Additional factors that may influence the ability or willingness to service debt include, but are not limited to, a country's cash flow situation, the availability of sufficient foreign exchange on the date a payment is due, the relative size of its debt service burden to the economy as a whole and its government's policy towards the International Monetary Fund, the World Bank and other international agencies. A country whose exports are concentrated in a few commodities or whose economy depends on certain strategic imports could be vulnerable to fluctuations in international prices of these commodities or imports. To the extent that a country receives payment for its exports in currencies other than U.S. dollars, its ability to make debt payments denominated in U.S. dollars could be adversely affected. If a foreign sovereign obligor cannot generate sufficient earnings from foreign trade to service its external debt, it may need to depend on continuing loans and aid from foreign governments, commercial banks and multilateral organizations and inflows of foreign investment. The commitment on the part of these foreign governments, multilateral organizations and others to make such disbursements may be conditioned on the government's implementation of economic reforms and/or economic performance and the timely service of its obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds, which may further impair the obligor's ability or willingness to timely service its debts.

ILLIQUID SECURITIES—Illiquid securities are investments that cannot be sold or disposed of in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. If, subsequent to purchase, a security held by a Fund becomes illiquid, the Fund may continue to hold the security. Because of their illiquid nature, illiquid securities must be priced at fair value as determined in good faith pursuant to procedures approved by the Board. Despite such good faith efforts to determine fair value prices, a Fund's illiquid securities are subject to the risk that the security's fair value price may differ from the actual price that the Fund may ultimately realize upon its sale or disposition. Difficulty in selling illiquid securities may result in a loss or may be costly to a Fund. Under the supervision of the Board, SIMC or the Sub-Adviser, as applicable, determines the liquidity of a Fund's investments. In determining the liquidity of a Fund's investments, SIMC or the Sub-Adviser, as applicable, may consider various factors, including: (i) the frequency and volume of trades and quotations; (ii) the number of dealers and prospective purchasers in the marketplace; (iii) dealer undertakings to make a market; and (iv) the nature of the security and the market in which it trades (including any demand, put or tender features, the mechanics and other requirements for transfer, any letters of credit or other credit enhancement features, any ratings, the number of holders, the method of soliciting offers, the time required to dispose of the security, and the ability to assign or offset the rights and obligations of the security).

INSURANCE FUNDING AGREEMENTS—An IFA is normally a general obligation of the issuing insurance company and not a separate account. The purchase price paid for an IFA becomes part of the general assets of the insurance company, and the obligation is repaid from the company's general assets. Generally, IFAs are not assignable or transferable without the permission of the issuing insurance company, and an active secondary market in IFAs may not exist. Therefore, IFAs will be subject to the Fund's limitation on investment in illiquid securities when the Fund may not demand payment of the principal amount within seven days and a reliable trading market is absent. Additional information about illiquid securities is provided under "Illiquid Securities."

INTERFUND LENDING AND BORROWING ARRANGEMENTS—The SEC has granted an exemption that permits the Funds to participate in the Program with the SEI Funds. The Program allows the SEI Funds to lend money to and borrow money from each other for temporary or emergency purposes. Participation in the Program is voluntary for both borrowing and lending funds. Interfund loans may be made only when the rate of interest to be charged is more favorable to the lending fund than the Repo Rate and more favorable to the borrowing fund than the Bank Loan Rate. The Bank Loan Rate will be determined using a formula approved by the SEI Funds' Board of Trustees. The interest rate imposed on interfund loans is the average of the Repo Rate and the Bank Loan Rate.

All interfund loans and borrowings must comply with the conditions set forth in the exemption, which are designed to ensure fair and equitable treatment of all participating funds. Each Fund's participation in the Program must be consistent with its investment policies and limitations and is subject to certain percentage limitations. SIMC administers the Program according to procedures approved by the SEI Funds' Board of Trustees. In addition, the Program is subject to oversight and periodic review by the SEI Funds' Board of Trustees.

INVESTMENT COMPANIES—Securities of other investment companies, including shares of closed-end investment companies, unit investment trusts, open-end investment companies and REITs, represent interests in professionally managed portfolios that may invest in various types of instruments. Investing in other investment companies involves substantially the same risks as investing directly in the underlying instruments, but may involve additional expenses at the investment company-level, such as portfolio management fees and operating expenses. When a Fund invests in an affiliated or unaffiliated investment company, it will bear a pro rata portion of the investment company's expenses in addition to directly bearing the expenses associated with its own operations. Certain types of investment companies, such as closed-end investment companies, issue a fixed number of shares that trade on a stock exchange or over-the-counter at a premium or a discount to their NAV. Others are continuously offered at NAV, but may also be traded in the secondary market at a premium or discount to their NAV.

Because of restrictions on direct investment by U.S. entities in certain countries, investment in other investment companies may be the most practical or only manner in which an international and global fund can invest in the securities markets of those countries.

Generally, the federal securities laws limit the extent to which investment companies can invest in securities of other investment companies. Subject to certain statutory, regulatory and other exceptions, a Fund is generally prohibited under Section 12(d)(1)(A) of the 1940 Act from acquiring the securities of another investment company if, as a result of such acquisition: (i) the Fund would own more than 3% of the total voting stock of the other company; (ii) securities issued by any one investment company represent more than 5% of the Fund's total assets; or (iii) securities (other than treasury stock) issued by all investment companies represent more than 10% of the total assets of the Fund.

A Fund may invest in other investment companies, including those managed by an adviser, to the extent permitted by any rule or regulation of the SEC or any order or interpretation thereunder. Pursuant to Rule 12d1-1 under the 1940 Act, the Funds may invest in one or more affiliated or unaffiliated investment companies that comply with Rule 2a-7 under the 1940 Act (to the extent required by Rule 12d1-1 under the 1940 Act) in excess of the limits of Section 12(d)(1)(A) of the 1940 Act.

A Fund may invest in Rule 2a-7 compliant investment companies for cash management purposes and to serve as collateral for derivatives positions.

Recently adopted Rule 12d1-4 under the 1940 Act will permit a Fund to invest in other investment companies beyond the statutory limits of Section 12(d)(1)(A), subject to certain conditions that are similar to those currently imposed on the Funds through exemptive orders. In connection with its adoption of Rule 12d1-4, the SEC announced it will rescind certain other rules and exemptive orders on January 19, 2022, which currently permit the Funds to invest in excess of statutory limits. Accordingly, the Funds will have to transition to the new rule on or before January 19, 2022.

Exchange-Traded Funds. ETFs are investment companies that are registered under the 1940 Act as open-end funds or unit investment trusts. ETFs are actively traded on national securities exchanges and are generally based on specific domestic and foreign market indexes. An index-based ETF seeks to track the performance of an index by holding in its portfolio either the contents of the index or a representative sample of the securities in the index. Because ETFs are based on an underlying basket of stocks or an index, they are subject to the same market fluctuations as these types of securities in volatile market swings.

Leveraged ETFs contain all of the risks that non-leveraged ETFs present. Additionally, to the extent a Fund invests in ETFs that achieve leveraged exposure to their underlying indexes through the use of derivative instruments, the Fund will indirectly be subject to leverage risk and other risks associated with derivatives. The more these ETFs invest in derivative instruments that give rise to leverage, the more this leverage will magnify any losses on those investments. Because leverage tends to exaggerate the effect of any increase or decrease in the value of an ETF's portfolio securities or other investments, leverage will cause the value of an ETF's shares to be more volatile than if the ETF did not use leverage. A leveraged ETF will engage in transactions and purchase instruments that give rise to forms of leverage, including, among others, the use of reverse repurchase agreements and other borrowings, the investment of collateral from loans of portfolio securities, the use of when issued, delayed-delivery or forward commitment transactions or short sales. The use of leverage may also cause a leveraged ETF to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations or to meet segregation requirements. Certain types of leveraging transactions, such as short sales that are not "against the box," could theoretically be subject to unlimited losses in cases where a leveraged ETF, for any reason, is unable to close out the transaction. In addition, to the extent a leveraged ETF borrows money, interest costs on such borrowed money may not be recovered by any appreciation of the securities purchased with the borrowed funds and could exceed the ETF's investment income, resulting in greater losses. Such ETFs often "reset" daily, meaning that they are designed to achieve their stated objectives on a daily

basis. Due to the effect of compounding, their performance over longer periods of time can differ significantly from the performance (or inverse of the performance) of their underlying index or benchmark during the same period of time, which may be enhanced during the periods of increased market volatility. Consequently, leveraged ETFs may not be suitable as long-term investments.

Leveraged inverse ETFs contain all of the risks that regular ETFs present. Additionally, to the extent a Fund invests in ETFs that seek to provide investment results that match a negative multiple of the performance of an underlying index, the Fund will indirectly be subject to the risk that the performance of such ETF will fall as the performance of that ETF's benchmark rises—a result that is the opposite from traditional mutual funds. Leveraged inverse ETFs contain all of the risks that regular ETFs present, but also pose all of the risks associated with other leveraged ETFs as well as other inverse ETFs. These investment vehicles may be extremely volatile and can expose an investing Fund to losses.

Currently, pursuant to orders issued by the SEC to certain ETFs and procedures approved by the Board, a Fund may invest in such ETFs in excess of the 3% limitation prescribed by Section 12(d)(1)(A) described above, provided that the Fund otherwise complies with the conditions of the applicable SEC order, as it may be amended, and any other applicable investment limitations. On January 19, 2022, in connection with the adoption of Rule 12d1-4, the SEC will rescind the exemptive orders issued to the Exemption ETFs and the Funds will then need to rely on Rule 12d1-4 for investments in these ETFs. This may require the Funds and the Exemption ETFs to enter into new investment agreements and make certain adjustments to their compliance policies and procedures, but is not expected to materially affect the Funds' ability to invest in the Exemption ETFs. Neither such ETFs nor their investment advisers make any representations regarding the advisability of investing in the ETFs.

Certain ETFs that in general do not register as investment companies under the 1940 Act may not produce qualifying income for purposes of the "Qualifying Income Test" or the shares of such ETFs may not be considered "securities" for purposes of the "Asset Test" (as defined below under the heading "Taxes"), which must be met in order for a Fund to maintain its status as a RIC under the Code. If one or more ETFs generate more non-qualifying income for purposes of the Qualifying Income Test or if a Fund is not considered to be holding sufficient amounts of "securities" than the advisers expect, it could cause a Fund to inadvertently fail the Qualifying Income Test or Asset Test, thereby causing the Fund to inadvertently fail to qualify as a RIC under the Code, unless certain relief provisions (described in more detail under the heading "Taxes") are available to the Fund.

INVESTMENT IN SUBSIDIARY—Each of the Multi-Asset Accumulation and Multi-Asset Inflation Managed Funds (each, a "Commodity Fund" and, collectively, the "Commodity Funds") may seek to gain exposure to the commodity markets, in whole or in part, through investments in a Subsidiary. Each Subsidiary, unlike the applicable Commodity Fund, may invest to a significant extent in commodity-linked securities and derivative instruments. A Commodity Fund may invest up to 25% of its total assets in the applicable Subsidiary. The derivative instruments in which a Subsidiary primarily intends to invest are instruments linked to certain commodity indexes and instruments linked to the value of a particular commodity or commodity futures contract or a subset of commodities or commodity futures contracts.

With respect to its investments, a Subsidiary will generally be subject to the same fundamental, non-fundamental and certain other investment restrictions as the applicable Commodity Fund; however, each Subsidiary (unlike the applicable Commodity Fund) may invest significantly in commodity-linked swap agreements and other commodity-linked derivative instruments. With respect to their investments in certain securities that may involve leverage, a Subsidiary will comply with asset segregation or "earmarking" requirements to the same extent as the applicable Commodity Fund.

Each Subsidiary is not registered under the 1940 Act and is not subject to all of the investor protections of the 1940 Act. Thus, each Commodity Fund, as an investor in its Subsidiary, will not have all of the protections offered to investors in registered investment companies. In addition, changes in the laws of the United States and/or the Cayman Islands, under which the Commodity Funds and the Subsidiaries,

respectively, are organized, could result in the inability of the Commodity Funds and/or the Subsidiaries to operate as intended and could negatively affect the Commodity Funds and their shareholders.

In order for each of the Commodity Funds to qualify as a RIC under the Code, the Commodity Funds must, amongst other requirements, derive at least 90% of their gross income for each taxable year from sources generating “qualifying income” for purposes of the Qualifying Income Test (as defined in the section titled “Taxes”). The Commodity Funds’ investment in their respective Subsidiary is expected to provide the Commodity Funds with exposure to the commodities markets within the limitations of the federal tax requirements of Subchapter M of the Code for qualification as a RIC. The “Subpart F” income (defined in Section 951 of the Code to include passive income, including from commodity-linked derivatives) of the Commodity Funds attributable to their investment in a Subsidiary is “qualifying income” to the Commodity Funds to the extent that such income is derived with respect to the Commodity Fund’s business of investing in stock, securities or currencies. Each Commodity Fund expects its “Subpart F” income attributable to its investment in its Subsidiary to be derived with respect to the Commodity Fund’s business of investing in stock, securities or currencies and to be treated as “qualifying income.” The Adviser will carefully monitor the Commodity Funds’ investments in their respective Subsidiary to ensure that no more than 25% of the Commodity Fund’s assets are invested in its Subsidiary.

LIBOR REPLACEMENT—LIBOR is intended to represent the rate at which contributing banks may obtain short-term borrowings from each other in the London interbank market. The regulatory authority that oversees financial services firms and financial markets in the U.K. has announced that, after the end of 2021, it would no longer persuade or compel contributing banks to make rate submissions for purposes of determining the LIBOR rate. However, there has been recent discussion that the most commonly used LIBOR rates may continue to be calculated beyond the initial 2021 termination date. At some point in the near future, LIBOR may no longer be available or no longer deemed an appropriate reference rate upon which to determine the interest rate on or impacting certain loans, notes, and other instruments or investments comprising some or all of the Funds’ investments. In light of this eventuality, public and private sector industry initiatives are currently underway to identify new or alternative reference rates to be used in place of LIBOR. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve’s Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), has begun publishing a Secured Overnight Financing Rate (“SOFR”), which is intended to replace U.S. dollar LIBOR. Alternative reference rates for other currencies have also been announced or have already begun publication. There is no assurance that the composition or characteristics of any such alternative reference rate will be similar to or produce the same value or economic equivalence as LIBOR or that it will have the same volume or liquidity as did LIBOR prior to its discontinuance or unavailability. This, in turn, may affect the value or liquidity or return on certain Fund investments, result in costs incurred in connection with closing out positions and entering into new trades and reduce the effectiveness of related fund transactions such as hedges. These risks may also apply with respect to potential changes in connection with other interbank offering rates (e.g., Euribor) and other indices, rates and values that may be used as “benchmarks” and are the subject of recent regulatory reform. Questions around liquidity impacted by these rates, and how to appropriately adjust these rates at the time of transition, remain a concern for the Funds. The effect of any changes to, or discontinuation of, LIBOR on the Funds will vary depending on, among other things, (1) existing fallback or termination provisions in individual contracts and (2) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new products and instruments. The expected discontinuation of LIBOR could have a significant impact on the financial markets in general and may also present heightened risk to market participants, including public companies, investment advisers, other investment companies, and broker-dealers. The risks associated with this discontinuation and transition will be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. Accordingly, it is difficult to predict the full impact of the transition away from LIBOR on the Funds until new reference rates and fallbacks for both legacy and new products, instruments and contracts are commercially accepted.

LOAN PARTICIPATIONS AND ASSIGNMENTS—Loan participations are interests in loans to corporations or governments that are administered by the lending bank or agent for a syndicate of lending banks and sold by the lending bank, financial institution or syndicate member (so-called “intermediary bank”). In a loan participation, the borrower will be deemed to be the issuer of the participation interest, except to the extent that a Fund derives its rights from the intermediary bank. Because the intermediary bank does not guarantee a loan participation in any way, a loan participation is subject to the credit risks generally associated with the underlying borrower. In the event of the bankruptcy or insolvency of the borrower, a loan participation may be subject to certain defenses that can be asserted by such borrower as a result of improper conduct by the intermediary bank. In addition, in the event the underlying borrower fails to pay principal and interest when due, a Fund may be subject to delays, expenses and risks that are greater than those that would have been involved if the Fund had purchased a direct obligation of such borrower. Under the terms of a loan participation, a Fund may be regarded as a creditor of the intermediary bank (rather than of the underlying borrower), so that the Fund may also be subject to the risk that the intermediary bank may become insolvent.

Loan assignments are investments in assignments of all or a portion of certain loans from third parties. When a Fund purchases assignments from lenders, it will acquire direct rights against the borrower on the loan. Because assignments are arranged through private negotiations between potential assignees and assignors, however, the rights and obligations acquired by the Fund may differ from, and be more limited than, those held by the assigning lender. Loan participations and assignments may be considered liquid, as determined by the advisers based on criteria approved by the Board.

MiFID II—MiFID II took effect in Member States of the EU on January 3, 2018. MiFID II forms the legal framework governing the requirements applicable to EU investment firms and trading venues and third-country firms providing investment services or activities in the EU. The extent to which MiFID II will have an indirect impact on markets and market participants outside the EU is unclear and yet to fully play out in practice. It will likely impact pricing, liquidity and transparency in most asset classes and certainly impact the research market.

MiFID II prohibits an EU authorized investment firm from receiving investment research unless it is paid for directly by the firm out of its own resources or from a separate research payment account regulated under MiFID II and funded either by a specific periodic research charge to the client or by a research charge that is not collected from the client separately but instead alongside a transaction commission. Specifically, MiFID II will have practical ramifications outside the EU in certain areas such as payment for equity research and fixed income, currency and commodities research. For example, US asset managers acting under the delegated authority of an EU-based asset manager and US asset managers that are part of a global asset management group with one or more EU affiliates may, in practice, have to restructure the way they procure, value and pay for research under US laws and regulations to more closely align with the requirements under MiFID II. Absent appropriate relief or guidance from US regulators, certain aspects of the research payment regime under MiFID II may be incompatible with US law and regulation. Accordingly, it is difficult to predict the full impact of MiFID II on the Funds and the advisers, but it could include an increase in the overall costs of entering into investments. Shareholders should be aware that the regulatory changes arising from MiFID II may affect each Fund’s ability to adhere to its investment approach and achieve its investment objective.

EU research providers that are MiFID II firms will be obliged to price their research services separately from their execution services. It is uncertain whether these changes will lead to an overall increase in the price of research and/or lead to reduced access to research for the advisers. While the exact impact of MiFID II and the related Markets in Financial Instruments Regulation on certain Funds and the advisers remain unclear and will take time to quantify, the impact on them and on the EU financial markets may be material.

MASTER LIMITED PARTNERSHIPS—Investments in units of MLPs involve risks that differ from an investment in common stock. Holders of the units of MLPs have more limited control and limited rights to vote on matters affecting the partnership. There are also certain tax risks associated with an investment in units of MLPs. In addition, conflicts of interest may exist between common unit holders, subordinated unit holders and the general partner of an MLP, including a conflict arising as a result of incentive distribution payments. The benefit a Fund derives from investment in MLP units is largely dependent on the MLPs being treated as partnerships and not as corporations for federal income tax purposes. If an MLP were classified as a corporation for federal income tax purposes, there would be reduction in the after-tax return to a Fund of distributions from the MLP, likely causing a reduction in the value of the Fund's shares. MLP entities are typically focused in the energy, natural resources and real estate sectors of the economy. A downturn in the energy, natural resources or real estate sectors of the economy could have an adverse impact on a Fund. At times, the performance of securities of companies in the energy, natural resources and real estate sectors of the economy may lag the performance of other sectors or the broader market as a whole. The Code provides that a Fund is permitted to invest up to 25% of its assets in one or more QPTPs, which includes certain MLPs, and treat the income distributed by such QPTPs as qualifying income for purposes of the RIC annual qualifying income requirements described in the "Taxes" section below.

MONEY MARKET SECURITIES—Money market securities include: (i) short-term U.S. Government securities; (ii) custodial receipts evidencing separately traded interest and principal components of securities issued by the U.S. Treasury; (iii) commercial paper determined by an adviser to be of the highest short-term credit quality at the time of purchase; (iv) short-term bank obligations (certificates of deposit, time deposits and bankers' acceptances) of U.S. commercial banks with assets of at least \$1 billion as of the end of their most recent fiscal year; and (v) repurchase agreements involving such securities. For a description of ratings, see Appendix A to this SAI.

MORTGAGE-BACKED SECURITIES—Mortgage-backed securities are a class of asset-backed securities representing an interest in a pool or pools of whole mortgage loans (which may be residential mortgage loans or commercial mortgage loans). Mortgage-backed securities held or acquired by the Funds could include (i) obligations guaranteed by federal agencies of the U.S. Government, such as GNMA, which are backed by the "full faith and credit" of the United States, (ii) securities issued by Fannie Mae and Freddie Mac, which are not backed by the "full faith and credit" of the United States but are guaranteed by the U.S. Government as to timely payment of principal and interest, (iii) securities (commonly referred to as "private-label RMBS") issued by private issuers that represent an interest in or are collateralized by whole residential mortgage loans without a government guarantee and (iv) CMBS, which are multi-class or pass-through securities backed by a mortgage loan or a pool of mortgage loans secured by commercial property such as industrial and warehouse properties, office buildings, retail space and shopping malls, multifamily properties and cooperative apartments. Because private-label RMBS and CMBS are not issued or guaranteed by the U.S. Government, those securities generally are structured with one or more types of credit enhancement. There can be no assurance, however, that credit enhancements will support full payment to the Funds of the principal and interest on such obligations. In addition, changes in the credit quality of the entity that provides credit enhancement could cause losses to the Funds and affect their share prices.

A Fund may invest in mortgage-backed securities in the form of debt or in the form of "pass-through" certificates. Pass-through certificates, which represent the beneficial ownership interests in the related mortgage loans, differ from debt securities, which generally provide for periodic fixed payments of interest on and principal of the related notes. Mortgage pass-through securities provide for monthly payments that are a "pass-through" of the monthly interest and principal payments (including any prepayments) made by the individual borrowers on the pooled mortgage loans, net of any fees and expenses owed to the servicers of the mortgage loans and other transaction parties that receive payment from collections on the mortgage loans.

The performance of mortgage loans and, in turn, the mortgage-backed securities acquired by a Fund, is influenced by a wide variety of economic, geographic, social and other factors, including general economic conditions, the level of prevailing interest rates, the unemployment rate, the availability of alternative financing and homeowner behavior. Beginning in late 2006, delinquencies, defaults and foreclosures on residential and commercial mortgage loans increased significantly, and they may again increase in the future. In addition, beginning in late 2006, numerous originators and servicers of residential mortgage loans experienced serious financial difficulties and, in many cases, went out of business or were liquidated in bankruptcy proceedings. Those difficulties resulted, in part, from declining markets for their mortgage loans as well as from claims for repurchases of mortgage loans previously sold under provisions that require repurchase in the event of early payment defaults or for breaches of representations and warranties regarding loan characteristics.

Since mid-2007, the residential mortgage market has been subject to extensive litigation and legislative and regulatory scrutiny. The result has been extensive reform legislation and regulations including with respect to loan underwriting, mortgage loan servicing, foreclosure practices and timing, loan modifications, enhanced disclosure and reporting obligations and risk retention. Numerous laws, regulations and rules related to residential mortgage loans generally, and foreclosure actions particularly, have been proposed or enacted by federal, state and local governmental authorities, which may result in delays in the foreclosure process, reduced payments by borrowers, modification of the original terms of mortgage loans, permanent forgiveness of debt, increased prepayments due to the availability of government-sponsored refinancing initiatives and/or increased reimbursable servicing expenses. Any of these factors could result in delays and reductions in distributions to residential mortgage-backed securities and may reduce the amount of investment proceeds to which a Fund would be entitled.

The conservatorship of Fannie Mae and Freddie Mac and the current uncertainty regarding the future status of these organizations may also adversely affect the mortgage market and the value of mortgage-related assets. It remains unclear to what extent the ability of Fannie Mae and Freddie Mac to act as the primary sources of liquidity in the residential mortgage markets, both by purchasing mortgage loans for their own portfolios and by guaranteeing mortgage-backed securities, may be curtailed. Legislators have repeatedly unveiled various plans to reduce and reform the role of Fannie Mae and Freddie Mac in the mortgage market and, possibly, wind down both institutions. Although it is unclear whether, and if so how, those plans may be implemented or how long any such wind-down or reform of Fannie Mae and Freddie Mac, if implemented, would take, a reduction in the ability of mortgage loan originators to access Fannie Mae and Freddie Mac to sell their mortgage loans may adversely affect the financial condition of mortgage loan originators. In addition, any decline in the value of agency securities may affect the value of residential mortgage-backed securities as a whole.

Since March 13, 2020, there have been a number of government initiatives applicable to federally backed mortgage loans in response to the economic impacts of the COVID-19 outbreak. For instance, on March 18, 2020, the Federal Housing Finance Agency (“FHFA”) directed Fannie Mae and Freddie Mac to suspend foreclosures and evictions for at least 60 days due to the COVID-19 pandemic. This foreclosure and eviction suspension applies to homeowners with a Fannie Mae- or Freddie Mac-backed single family mortgage. In addition, the FHFA instructed Fannie Mae and Freddie Mac to provide payment forbearance to single family borrowers, which will allow mortgage payments to be suspended for up to 12 months (without incurring late fees) due to hardship caused by COVID-19.

Following the FHFA directives, on March 27, 2020, the CARES Act was enacted into law. The CARES Act provides, among other things, that a borrower with a federally backed one- to four-family residential mortgage loan (e.g., a loan purchased or securitized by Fannie Mae or Freddie Mac) experiencing financial hardship due to the COVID-19 pandemic may request forbearance regardless of delinquency status. Upon receipt of a borrower’s request for forbearance, the forbearance must be granted for up to 180 days, and must be extended for a further 180 days at the request of the borrower. Multifamily loan borrowers are also entitled to forbearance provided they were current on their payments as of February 1, 2020. Upon receipt of a request for forbearance, the servicer must provide forbearance for up to 30 days and upon

request of the borrower, extend the forbearance period for up to two additional 30-day periods. Further, under the CARES Act, servicers of covered one- to four-family residential loans are also prohibited from initiating foreclosure for the 60-day period beginning March 18, 2020, and no owner of a covered property may initiate eviction proceedings against a residential tenant for nonpayment of rent during the 120-day period after enactment of the statute.

It is difficult to predict how the CARES Act or other government initiatives relating to COVID-19 may affect the federally backed mortgage market, the U.S. mortgage market as a whole and the price of securities relating to the mortgage markets. However, high forbearance rates create a real possibility of billions of dollars of loan servicers' obligations to advance payment to investors in securities backed by mortgages in the absence of borrower payments on the underlying loans. In response to this possibility, the FHFA announced on April 21, 2020 that loan servicers' obligation to advance scheduled monthly payments for Fannie Mae and Freddie Mac backed single-family mortgage loans in forbearance will be limited to four months. After the four-month period, Fannie Mae and Freddie Mac will stand ready to take over advancing payments to investors in MBS pool. This FHFA action clarifies that mortgage loans with COVID-19 payment forbearances shall be treated similar to a natural disaster event and will remain in the MBS pool. This change is intended to reduce the potential liquidity demands on Fannie Mae and Freddie Mac resulting from loans in COVID-19 forbearance and delinquent loans, but there is no assurance that such change will reduce the liquidity demands on Fannie Mae and Freddie Mac or prevent financial hardship on Fannie Mae and Freddie Mac generally as a result of the mandated COVID-19 payment forbearances and resulting obligation to advance payments to investors. Accordingly, the Funds cannot predict with certainty the extent to which these or similar initiatives in the future may adversely impact the value of the Funds' investments in securities issued by Fannie Mae or Freddie Mac and in investments in securities in the U.S. mortgage industry as a whole.

The rate and aggregate amount of distributions on mortgage-backed securities, and therefore the average lives of those securities and the yields realized by a Fund, will be sensitive to the rate of prepayments (including liquidations) and modifications of the related mortgage loans, any losses and shortfalls on the related mortgage loans allocable to the tranches held by a Fund and the manner in which principal payments on the related mortgage loans are allocated among the various tranches in the particular securitization transaction. Furthermore, mortgage-backed securities are sensitive to changes in interest rates, but may respond to those changes differently from other fixed income securities due to the possibility of prepayment of the mortgage loans. Among other factors, a significant amount of defaults, rapid prepayments or prepayment interest shortfalls may erode amounts available for distributions to a Fund. The timing of changes in the rate of prepayments of the mortgage loans may significantly affect the Funds' actual yield to maturity, even if the average rate of principal payments is consistent with a Fund's expectations. If prepayments of mortgage loans occur at a rate faster than that anticipated by a Fund, payments of interest on the mortgage-backed securities could be significantly less than anticipated. Similarly, if the number of mortgage loans that are modified is larger than that anticipated by a Fund, payments of principal and interest on the mortgage-backed securities could be significantly less than anticipated.

Uniform Mortgage-Backed Securities ("UMBS"). Fannie Mae and Freddie Mac have entered into a joint initiative to develop a common securitization platform for the issuance of UMBS (the "Single Security Initiative") that aligns the characteristics of Fannie Mae and Freddie Mac certificates. The Single Security Initiative seeks to support the overall liquidity of the to-be-announced ("TBA") market. Fannie Mae and Freddie Mac began issuing UMBS in June 2019. While Fannie Mae and Freddie Mac have taken steps for a smooth transition to the issuance of UMBS, the effects of the issuance of UMBS on the mortgage-backed securities and TBA markets are uncertain and there may be factors that affect the timing of the transition to UMBS or the ability of market participants, including a Fund, to adapt to the issuance of UMBS. The Funds may need to consider the tax and accounting issues raised by investments in UMBS and/or the exchange of legacy Freddie Mac securities for UMBS. Additionally, there could be divergence in prepayment rates of UMBS issued by Fannie Mae and Freddie Mac, which could lead to differences in the

prices of Fannie Mae- and Freddie Mac-issued UMBS if Fannie Mae and Freddie Mac fail to align programs, policies and practices that affect prepayments. The initial effects of the issuance of UMBS on the market for mortgage-related securities have been relatively minimal, however the long-term effects are still uncertain.

Collateralized Mortgage Obligations. CMOs are securities collateralized by mortgages, mortgage pass-throughs, mortgage pay-through bonds (bonds representing an interest in a pool of mortgages where the cash flow generated from the mortgage collateral pool is dedicated to bond repayment) and mortgage-backed bonds (general obligations of the issuers payable out of the issuers' general funds and additionally secured by a first lien on a pool of single family detached properties). To the extent a Fund invests in CMOs, the Fund typically will seek to invest in CMOs rated in one of the two highest categories by S&P or Moody's. Many CMOs are issued with a number of classes or series that have different expected maturities. Investors purchasing such CMOs are credited with their portion of the scheduled payments of interest and principal on the underlying mortgages plus all unscheduled prepayments of principal based on a predetermined priority schedule. Accordingly, the CMOs in the longer maturity series are less likely than other mortgage pass-through securities to be prepaid prior to their stated maturity. Although some of the mortgages underlying CMOs may be supported by various types of insurance and some CMOs may be backed by GNMA certificates or other mortgage pass-through securities issued or guaranteed by U.S. Government agencies or instrumentalities, the CMOs themselves are not generally guaranteed.

Real Estate Mortgage Investment Conduits. REMICs are private entities formed for the purpose of holding a fixed pool of mortgages secured by interests in real property. REMIC Certificates issued by Fannie Mae or Freddie Mac represent beneficial ownership interests in a REMIC trust consisting principally of mortgage loans or Fannie Mae, Freddie Mac or GNMA-guaranteed mortgage pass-through certificates. For Freddie Mac REMIC Certificates, Freddie Mac guarantees the timely payment of interest. GNMA REMIC Certificates are backed by the full faith and credit of the U.S. Government.

Parallel Pay Securities; Planned Amortization Class CMOs. Parallel pay CMOs and REMICs are structured to provide payments of principal on each payment date to more than one class. These simultaneous payments are taken into account in calculating the stated maturity date or final distribution date of each class, which must be retired by its stated maturity date or final distribution date but may be retired earlier. PAC Bonds generally require payments of a specified amount of principal on each payment date. PAC Bonds are always parallel pay CMOs, with the required principal payment on such securities having the highest priority after interest has been paid to all classes.

Adjustable Rate Mortgage Securities. ARMS are a form of pass-through security representing interests in pools of mortgage loans whose interest rates are adjusted from time to time. The adjustments are usually determined in accordance with a predetermined interest rate index and may be subject to certain limits. Although the value of ARMS, like other debt securities, generally varies inversely with changes in market interest rates (increasing in value during periods of declining interest rates and decreasing in value during periods of increasing interest rates), the value of ARMS should generally be more resistant to price swings than other debt securities because the interest rates of ARMS move with market interest rates. The adjustable rate feature of ARMS will not, however, eliminate fluctuations in the prices of ARMS, particularly during periods of extreme fluctuations in interest rates. Also, because many adjustable rate mortgages only reset on an annual basis, it can be expected that the prices of ARMS will fluctuate to the extent that changes in prevailing interest rates are not immediately reflected in the interest rates payable on the underlying adjustable rate mortgages.

Stripped Mortgage-Backed Securities. Stripped mortgage-backed securities are securities that are created when a U.S. Government agency or a financial institution separates the interest and principal components of a mortgage-backed security and sells them as individual securities. The holder of the PO receives the principal payments made by the underlying mortgage-backed security, while the holder of the IO receives interest payments from the same underlying security. The prices of stripped mortgage-backed securities may be particularly affected by changes in interest rates. As interest rates fall, prepayment

rates tend to increase, which tends to reduce prices of IOs and increase prices of POs. Rising interest rates can have the opposite effect.

Estimated Average Life. Due to the possibility of prepayments of the underlying mortgage instruments, mortgage-backed securities generally do not have a known maturity. In the absence of a known maturity, market participants generally refer to an “average life estimate.” An average life estimate is a function of an assumption regarding anticipated prepayment patterns and is based upon current interest rates, current conditions in the relevant housing markets and other factors. The assumption is necessarily subjective, and thus different market participants can produce different average life estimates with regard to the same security. There can be no assurance that the estimated average life will be a security’s actual average life.

MORTGAGE DOLLAR ROLLS—Mortgage dollar rolls, or “covered rolls,” are transactions in which a Fund sells securities (usually mortgage-backed securities) and simultaneously contracts to repurchase, typically in 30 or 60 days, substantially similar, but not identical, securities on a specified future date. During the roll period, a Fund forgoes principal and interest paid on such securities. A Fund is compensated by the difference between the current sales price and the forward price for the future purchase (often referred to as the “drop”), as well as by the interest earned on the cash proceeds of the initial sale. At the end of the roll commitment period, a Fund may or may not take delivery of the securities it has contracted to purchase. Mortgage dollar rolls may be renewed prior to cash settlement and initially may involve only a firm commitment agreement by the Fund to buy a security. A “covered roll” is a specific type of mortgage dollar roll for which there is an offsetting cash position or cash equivalent securities position that matures on or before the forward settlement date of the mortgage dollar roll transaction. As used herein, the term “mortgage dollar roll” refers to mortgage dollar rolls that are not “covered rolls.” If the broker-dealer to whom a Fund sells the security becomes insolvent, the Fund’s right to repurchase the security may be restricted. Other risks involved in entering into mortgage dollar rolls include the risk that the value of the security may change adversely over the term of the mortgage dollar roll and that the security a Fund is required to repurchase may be worth less than the security that the Fund originally held. To avoid senior security concerns, a Fund will “cover” any mortgage dollar roll as required by the 1940 Act.

MUNICIPAL SECURITIES—Municipal securities consist of: (i) debt obligations issued by or on behalf of public authorities to obtain funds to be used for various public facilities, refunding outstanding obligations, general operating expenses and lending such funds to other public institutions and facilities, and (ii) certain private activity and industrial development bonds issued by or on behalf of public authorities to obtain funds to provide for the construction, equipment, repair or improvement of privately operated facilities. Additional information regarding municipal securities is described below:

Municipal Bonds. Municipal bonds are debt obligations issued to obtain funds for various public purposes. Municipal bonds include general obligation bonds, revenue or special obligation bonds, private activity and industrial development bonds, moral obligation bonds and participation interests in municipal bonds. General obligation bonds are backed by the taxing power of the issuing municipality. Revenue bonds are backed by the revenues of a project or facility, such as tolls from a toll bridge. Certificates of participation represent an interest in an underlying obligation or commitment, such as an obligation issued in connection with a leasing arrangement. The payment of principal and interest on private activity and industrial development bonds is generally dependent solely on the ability of the facility’s user to meet its financial obligations and the pledge, if any, of real and personal property so financed as security for such payment. A Fund may purchase private activity or industrial development bonds if, in the opinion of counsel for the issuers, the interest paid is exempt from federal income tax. Municipal bonds are issued by or on behalf of public authorities to raise money to finance various privately-owned or operated facilities for business and manufacturing, housing, sports and pollution control. These bonds are also used to finance public facilities such as airports, mass transit systems, ports, parking, sewage or solid waste disposal facilities and certain other facilities. The payment of the principal and interest on such bonds is dependent solely on the ability of the facility’s user to meet its financial obligations and the pledge, if any, of real and personal property so financed as security for such payment. Moral obligation bonds are normally issued

by special purpose authorities. Moral obligation bonds are not backed by the full faith and credit of the state, but are generally backed by the agreement of the issuing authority to request appropriations from the state legislative body.

Municipal Leases. Municipal leases are instruments, or participations in instruments, issued in connection with lease obligations or installment purchase contract obligations of municipalities (so-called “municipal lease obligations”). Although municipal lease obligations do not constitute general obligations of the issuing municipality, a lease obligation may be backed by the municipality’s covenant to budget for, appropriate funds for and make the payments due under the lease obligation. However, certain lease obligations contain “non-appropriation” clauses, which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose in the relevant years. Municipal lease obligations are a form of financing, and the market for such obligations is still developing. Municipal leases will be treated as liquid only if they satisfy criteria set forth in guidelines established by the Board, and there can be no assurance that a market will exist or continue to exist for any municipal lease obligation. Information regarding illiquid securities is provided under the section “Illiquid Securities” above.

Municipal Notes. Municipal notes consist of general obligation notes, tax anticipation notes (notes sold to finance working capital needs of the issuer in anticipation of receiving taxes on a future date), revenue anticipation notes (notes sold to provide needed cash prior to receipt of expected non-tax revenues from a specific source), bond anticipation notes, tax and revenue anticipation notes, certificates of indebtedness, demand notes and construction loan notes. The maturities of the instruments at the time of issue will generally range from three months to one year.

SIMC and/or the Sub-Adviser, as applicable, may rely on the opinion of the issuer’s counsel, which is rendered at the time the security is issued, to determine whether the security is fit, with respect to its validity and tax status, to be purchased by a Fund. SIMC, the Sub-Advisers and the Funds do not guarantee this opinion is correct, and there is no assurance that the IRS will agree with such counsel’s opinion.

NON-DIVERSIFICATION—As indicated in the Investment Limitations section, certain Funds are non-diversified investment companies as defined in the 1940 Act, which means that a relatively high percentage of such Fund’s assets may be invested in the obligations of a limited number of issuers. The value of shares of each such Fund may be more susceptible to any single economic, political or regulatory occurrence than the shares of a diversified investment company would be. Each of these Funds intends to satisfy the diversification requirements necessary to qualify as a RIC under the Code, which generally requires that the Fund be diversified (*i.e.*, not invest more than 5% of its assets in the securities in any one issuer and not more than 10% of the outstanding voting securities of such issuer) as to 50% of its assets as described more fully in the “Taxes” section of this SAI.

OBLIGATIONS OF DOMESTIC BANKS, FOREIGN BANKS AND FOREIGN BRANCHES OF U.S. BANKS—Investments in bank obligations include obligations of domestic branches of foreign banks and foreign branches of domestic banks. Such investments in domestic branches of foreign banks and foreign branches of domestic banks may involve risks that are different from investments in securities of domestic branches of U.S. banks. These risks may include future unfavorable political and economic developments, possible withholding taxes on interest income, seizure or nationalization of foreign deposits, currency controls, interest limitations, or other governmental restrictions that might affect the payment of principal or interest on the securities held by a Fund. Additionally, these institutions may be subject to less stringent reserve requirements and to different accounting, auditing, reporting and recordkeeping requirements than those applicable to domestic branches of U.S. banks. Bank obligations include the following:

Bankers’ Acceptances. Bankers’ acceptances are bills of exchange or time drafts drawn on and accepted by a commercial bank. Corporations use bankers’ acceptances to finance the shipment and storage of goods and to furnish dollar exchange. Maturities are generally six months or less.

Bank Notes. Bank notes are notes used to represent debt obligations issued by banks in large denominations.

Certificates of Deposit. Certificates of deposit are interest-bearing instruments with a specific maturity. They are issued by banks and savings and loan institutions in exchange for the deposit of funds and can normally be traded in the secondary market prior to maturity. Certificates of deposit with penalties for early withdrawal will be considered illiquid. Additional information about illiquid securities is provided under the section “Illiquid Securities” above.

Time Deposits. Time deposits are non-negotiable receipts issued by a bank in exchange for the deposit of funds. Like a certificate of deposit, a time deposit earns a specified rate of interest over a definite period of time; however, it cannot be traded in the secondary market. Time deposits with a withdrawal penalty or that mature in more than seven days are considered to be illiquid. Additional information about illiquid securities is provided under the section “Illiquid Securities” above.

OBLIGATIONS OF SUPRANATIONAL ENTITIES—Supranational entities are entities established through the joint participation of several governments, including the Asian Development Bank, the Inter-American Development Bank, the World Bank, the African Development Bank, the European Economic Community, the European Investment Bank and the Nordic Investment Bank. The governmental members, or “stockholders,” usually make initial capital contributions to the supranational entity and, in many cases, are committed to make additional capital contributions if the supranational entity is unable to repay its borrowings. There is no guarantee that one or more stockholders of a supranational entity will continue to make any necessary additional capital contributions. If such contributions are not made, the entity may be unable to pay interest or repay principal on its debt securities, and a Fund may lose money on such investments.

OPTIONS—A Fund may purchase and write put and call options on indexes and enter into related closing transactions. A put option on a security gives the purchaser of the option the right to sell, and the writer of the option the obligation to buy, the underlying security at any time during the option period, or for certain types of options, at the conclusion of the option period or only at certain times during the option period. A call option on a security gives the purchaser of the option the right to buy, and the writer of the option the obligation to sell, the underlying security at any time during the option period, or for certain types of options, at the conclusion of the option period or only at certain times during the option period. The premium paid to the writer is the consideration for undertaking the obligations under the option contract.

A Fund may purchase and write put and call options on foreign currencies (traded on U.S. and foreign exchanges or OTC markets) to manage its exposure to exchange rates. Call options on foreign currency written by a Fund will be “covered” as required by the 1940 Act.

Put and call options on indexes are similar to options on securities except that options on an index give the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the underlying index is greater than (or less than, in the case of puts) the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option, expressed in dollars multiplied by a specified number. Thus, unlike options on individual securities, all settlements are in cash, and gain or loss depends on price movements in the particular market represented by the index generally rather than the price movements in individual securities. All options written on indexes or securities must be “covered” as required by the 1940 Act. Options on indexes may, depending on circumstances, involve greater risk than options on securities. Because stock index options are settled in cash, when a Fund writes a call on an index it may not be able to provide in advance for its potential settlement obligations by acquiring and holding the underlying securities.

Each Fund may trade put and call options on securities, securities indexes and currencies, as an adviser determines is appropriate in seeking to achieve the Fund’s investment objective, unless otherwise restricted by the Fund’s investment limitations.

The initial purchase (sale) of an option contract is an “opening transaction.” In order to close out an option position, a Fund may enter into a “closing transaction,” which is simply the sale (purchase) of an option contract on the same security with the same exercise price and expiration date as the option contract originally opened. If a Fund is unable to effect a closing purchase transaction with respect to an option it has written, it will not be able to sell the underlying security until the option expires or the Fund delivers the security upon exercise.

A Fund may purchase put and call options on securities for any lawful purpose, including to protect against a decline in the market value of the securities in its portfolio or to anticipate an increase in the market value of securities that the Fund may seek to purchase in the future. A Fund purchasing put and call options pays a premium for such options. If price movements in the underlying securities are such that exercise of the options would not be profitable for the Fund, loss of the premium paid may be offset by an increase in the value of the Fund’s securities or by a decrease in the cost of the acquisition of securities by the Fund.

A Fund may write (*i.e.*, sell) call options on securities for any lawful purpose, including as a means of increasing the yield on its assets and as a means of providing limited protection against decreases in its market value. Certain Funds may engage in writing (selling) uncovered (or “naked”) options for hedging purposes, including currency or interest rate exposure. A call option is uncovered if the Fund does not own the underlying instrument or have a right (such as a call with the same or a later expiration date) to acquire that instrument. The underlying instruments of such uncovered call options may consist of fixed income securities. Certain Funds may engage in a “covered” call option writing (selling) program in an attempt to generate additional income or provide a partial hedge to another position of the Fund. A call option is “covered” if the Fund either owns the underlying instrument or has a right to acquire that instrument. The underlying instruments of such covered call options may consist of individual equity securities, pools of equity securities, ETFs or indexes.

The writing of covered call options is a more conservative investment technique than writing of uncovered options, but capable of enhancing the Fund’s total return. When a Fund writes a covered call option, it profits from the premium paid by the buyer but gives up the opportunity to profit from an increase in the value of the underlying security above the exercise price. At the same time, the Fund retains the risk of loss from a decline in the value of the underlying security during the option period. Although the Fund may terminate its obligation by executing a closing purchase transaction, the cost of effecting such a transaction may be greater than the premium received upon its sale, resulting in a loss to the Fund. If such an option expires unexercised, the Fund realizes a gain equal to the premium received. Such a gain may be offset or exceeded by a decline in the market value of the underlying security during the option period. If an option is exercised, the exercise price, the premium received and the market value of the underlying security determine the gain or loss realized by the Fund.

When a Fund writes an option, if the underlying securities do not increase or decrease, as applicable, to a price level that would make the exercise of the option profitable to the holder thereof, the option will generally expire without being exercised and the Fund will realize as profit the premium received for such option. When a call option of which a Fund is the writer is exercised, the Fund will be required to sell the underlying securities to the option holder at the strike price and will not participate in any increase in the price of such securities above the strike price. When a put option of which a Fund is the writer is exercised, the Fund will be required to purchase the underlying securities at a price in excess of the market value of such securities.

A Fund may purchase and write options on an exchange or OTC. OTC options differ from exchange-traded options in several respects. They are transacted directly with dealers and not with a clearing corporation or futures commission merchant, and therefore entail the risk of non-performance by the dealer. OTC options are available for a greater variety of securities and for a wider range of expiration dates and exercise prices than are available for exchange-traded options. Because OTC options are not traded on an exchange, pricing is normally done by reference to information from a market maker. It is the

SEC's position that OTC options are generally illiquid. The market value of an option generally reflects the market price of an underlying security. Other principal factors affecting market value include supply and demand, interest rates, the pricing volatility of the underlying security and the time remaining until the expiration date.

Risks. Risks associated with options transactions include: (i) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (ii) there may be an imperfect correlation between the movement in prices of options and the securities underlying them; (iii) there may not be a liquid secondary market for options; and (iv) though a Fund will receive a premium when it writes covered call options, it may not participate fully in a rise in the market value of the underlying security.

PAY-IN-KIND BONDS—Pay-in-kind bonds are securities that, at the issuer's option, pay interest in either cash or additional securities for a specified period. Pay-in-kind bonds, like zero coupon bonds, are designed to give an issuer flexibility in managing cash flow. Pay-in-kind bonds are expected to reflect the market value of the underlying debt plus an amount representing accrued interest since the last payment.

Pay-in-kind bonds are usually less volatile than zero coupon bonds, but more volatile than cash pay securities.

PRIVATIZATIONS—Privatizations are foreign government programs for selling all or part of the interests in government owned or controlled enterprises. The ability of a U.S. entity to participate in privatizations in certain foreign countries may be limited by local law, or the terms on which a Fund may be permitted to participate may be less advantageous than those applicable for local investors. There can be no assurance that foreign governments will continue to sell their interests in companies currently owned or controlled by them or that privatization programs will be successful.

PUT TRANSACTIONS—A Fund may purchase securities at a price that would result in a yield to maturity lower than generally offered by the seller at the time of purchase when the Fund can simultaneously acquire the right to sell the securities back to the seller, the issuer or a third party (the "writer") at an agreed-upon price at any time during a stated period or on a certain date. Such a right is generally denoted as a "standby commitment" or a "put." The purpose of engaging in transactions involving puts is to maintain flexibility and liquidity to permit a Fund to meet redemptions and remain as fully invested as possible in municipal securities. The right to put the securities depends on the writer's ability to pay for the securities at the time the put is exercised. A Fund would limit its put transactions to institutions that an adviser believes present minimum credit risks, and an adviser would use its best efforts to initially determine and continue to monitor the financial strength of the sellers of the options by evaluating their financial statements and such other information as is available in the marketplace. It may, however, be difficult to monitor the financial strength of the writers because adequate current financial information may not be available. In the event that any writer is unable to honor a put for financial reasons, a Fund would be a general creditor (*i.e.*, on a parity with all other unsecured creditors) of the writer. Furthermore, particular provisions of the contract between a Fund and the writer may excuse the writer from repurchasing the securities; for example, a change in the published rating of the underlying municipal securities or any similar event that has an adverse effect on the issuer's credit or a provision in the contract that the put will not be exercised except in certain special cases, such as to maintain Fund liquidity. A Fund could, however, at any time sell the underlying portfolio security in the open market or wait until the portfolio security matures, at which time it should realize the full par value of the security.

The securities purchased subject to a put may be sold to third persons at any time, even though the put is outstanding, but the put itself, unless it is an integral part of the security as originally issued, may not be marketable or otherwise assignable. Therefore, the put would have value only to that particular Fund. Sale of the securities to third parties or lapse of time with the put unexercised may terminate the right to put the securities. Prior to the expiration of any put option, a Fund could seek to negotiate terms for the extension of such an option. If such a renewal cannot be negotiated on terms satisfactory to the Fund, the

Fund could, of course, sell the portfolio security. The maturity of the underlying security will generally be different from that of the put. For the purpose of determining the “maturity” of securities purchased subject to an option to put, and for the purpose of determining the dollar-weighted average maturity of a Fund including such securities, the Fund will consider “maturity” to be the first date on which it has the right to demand payment from the writer of the put (although the final maturity of the security is later than such date).

QUANTITATIVE INVESTING—A quantitative investment style generally involves the use of computers to implement a systematic or rules-based approach to selecting investments based on specific measurable factors. Due to the significant role technology plays in such strategies, they carry the risk of unintended or unrecognized issues or flaws in the design, coding, implementation or maintenance of the computer programs or technology used in the development and implementation of the quantitative strategy. These issues or flaws, which can be difficult to identify, may result in the implementation of a portfolio that is different from that which was intended, and could negatively impact investment returns. Such risks should be viewed as an inherent element of investing in an investment strategy that relies heavily upon quantitative models and computerization.

REAL ESTATE INVESTMENT TRUSTS—REITs are trusts that invest primarily in commercial real estate or real estate-related loans. A REIT is not taxed on income distributed to its shareholders or unitholders if it complies with certain requirements under the Code relating to its organization, ownership, assets and income, as well as with a requirement that it distribute to its shareholders or unitholders at least 90% of its taxable income for each taxable year. Generally, REITs can be classified as Equity REITs, Mortgage REITs and Hybrid REITs. Equity REITs invest the majority of their assets directly in real property and derive their income primarily from rents and capital gains from appreciation realized through property sales. Mortgage REITs invest the majority of their assets in real estate mortgages and derive their income primarily from interest payments. Hybrid REITs combine the characteristics of both Equity and Mortgage REITs. By investing in REITs indirectly through a Fund, shareholders will bear not only the proportionate share of the expenses of the Fund, but also, indirectly, similar expenses of underlying REITs.

A Fund may be subject to certain risks associated with the direct investments of REITs. REITs may be affected by changes in the value of their underlying properties and by defaults by borrowers or tenants. Mortgage REITs may be affected by the quality of the credit extended. Furthermore, REITs are dependent on specialized management skills. Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs generally depend on their ability to generate cash flow to make distributions to shareholders or unitholders and may be subject to defaults by borrowers and to self-liquidations. In addition, a REIT may be affected by its failure to qualify for tax-free pass-through of income under the Code or its failure to maintain exemption from registration under the 1940 Act.

REAL ESTATE OPERATING COMPANIES—REOCs are real estate companies that engage in the development, management or financing of real estate. Typically, REOCs provide services such as property management, property development, facilities management and real estate financing. REOCs are publicly traded corporations that have not elected to be taxed as REITs. The three primary reasons for such an election are: (i) availability of tax loss carryforwards, (ii) operation in non-REIT-qualifying lines of business, and (iii) the ability to retain earnings.

RECEIPTS—Receipts are interests in separately traded interest and principal component parts of U.S. Government obligations that are issued by banks or brokerage firms and are created by depositing U.S. Government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. Receipts include TRs, TIGRs, LYONs and CATS. LYONs, TIGRs and CATS are interests in private proprietary accounts, while TRs and STRIPS (see “U.S. Treasury Obligations” below) are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities, which means that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of

interest or principal. This discount is accreted over the life of the security, and such accretion will constitute the income earned on the security for both accounting and tax purposes. For tax purposes, original issue discount that accretes in a taxable year is treated as earned by a Fund and therefore is subject to the distribution requirements applicable to RICs under Subchapter M of the Code. Because of these features, such securities may be subject to greater interest rate volatility than interest paying fixed income securities.

REPURCHASE AGREEMENTS—A repurchase agreement is an agreement in which one party sells securities to another party in return for cash, with an agreement to repurchase equivalent securities at an agreed-upon price and on an agreed-upon future date. A Fund may enter into repurchase agreements with financial institutions. The Funds follow certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with large, well-capitalized and well-established financial institutions deemed creditworthy by an adviser. The repurchase agreements entered into by a Fund will provide that the underlying collateral at all times shall have a value at least equal to 102% of the resale price stated in the agreement at all times. SIMC and the applicable Sub-Advisers monitor compliance with this requirement as well as the ongoing financial condition and creditworthiness of the counterparty.

Under all repurchase agreements entered into by a Fund, the Fund's custodian or its agent must take possession of the underlying collateral. In the event of a default or bankruptcy by a selling financial institution, a Fund will seek to liquidate such collateral. However, the exercising of a Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase are less than the repurchase price, the Fund could suffer a loss. A Fund may enter into "tri-party" repurchase agreements. In "tri-party" repurchase agreements, an unaffiliated third party custodian maintains accounts to hold collateral for the Fund and its counterparties and, therefore, the Fund may be subject to the credit risk of those custodians. At times, the investments of a Fund in repurchase agreements may be substantial when, in the view of SIMC or the Sub-Adviser(s), liquidity or other considerations so warrant.

RESTRICTED SECURITIES—Restricted securities are securities that may not be sold freely to the public without registration under the 1933 Act or an exemption from registration. Restricted securities, including securities eligible for re-sale under Rule 144A of the 1933 Act, that are determined to be liquid are not subject to a Fund's limitation on investing in illiquid securities. The determination of whether a restricted security is illiquid is to be made by an adviser pursuant to guidelines adopted by the Board. Under these guidelines, the particular adviser will consider the frequency of trades and quotes for the security, the number of dealers in, and potential purchasers for, the security, dealer undertakings to make a market in the security, and the nature of the security and of the marketplace trades. In purchasing such restricted securities, each adviser intends to purchase securities that are exempt from registration under Rule 144A under the 1933 Act and Section 4(a)(2) commercial paper issued in reliance on an exemption from registration under Section 4(a)(2) of the 1933 Act, including, but not limited to, Rules 506(b) or 506(c) under Regulation D.

Private Investments in Public Equity—A Fund may purchase PIPEs, which are equity securities in a private placement that are issued by issuers that have outstanding publicly-traded equity securities of the same class. Shares in PIPEs generally are not publicly registered until after a certain time period from the date the private sale is completed, which can last many months. Until the public registration process is completed, PIPEs are restricted as to resale and cannot be freely traded. Generally, such restrictions cause PIPEs to be illiquid during this restricted period. PIPEs may contain provisions that the issuer will pay specified financial penalties to the holder if the issuer does not publicly register the restricted equity securities within a specified period of time, but there is no assurance that the restricted equity securities will be publicly registered or that the registration will remain in effect.

REVERSE REPURCHASE AGREEMENTS AND SALE-BUYBACKS—Reverse repurchase agreements are transactions in which a Fund sells portfolio securities to financial institutions, such as banks and broker-dealers, and agrees to repurchase them at a mutually agreed-upon date and price that is higher than the

original sale price. Reverse repurchase agreements are similar to a fully collateralized borrowing by a Fund. At the time a Fund enters into a reverse repurchase agreement, it will earmark on the books of the Fund or place in a segregated account cash or liquid securities having a value equal to the repurchase price (including accrued interest) and will subsequently monitor the account to ensure that such equivalent value is maintained.

Reverse repurchase agreements involve risks. Reverse repurchase agreements are a form of leverage, and the use of reverse repurchase agreements by a Fund may increase the Fund's volatility. Reverse repurchase agreements are also subject to the risk that the other party to the reverse repurchase agreement will be unable or unwilling to complete the transaction as scheduled, which may result in losses to a Fund. Reverse repurchase agreements also involve the risk that the market value of the securities sold by a Fund may decline below the price at which it is obligated to repurchase the securities. In addition, when a Fund invests the proceeds it receives in a reverse repurchase transaction, there is a risk that those investments may decline in value. In this circumstance, the Fund could be required to sell other investments in order to meet its obligations to repurchase the securities.

In a sale-buyback transaction, a Fund sells an underlying security for settlement at a later date. A sale-buyback is similar to a reverse repurchase agreement, except that in a sale-buyback the counterparty who purchases the security is entitled to receive any principal or interest payments made on the underlying security pending settlement of the Fund's repurchase of the underlying security. A Fund's obligations under a sale-buyback would typically be offset by earmarking on the books of the Fund or placing in a segregated account cash or liquid securities having a value equal to the amount of the Fund's forward commitment to repurchase the underlying security.

RISKS OF CYBER-ATTACKS—As with any entity that conducts business through electronic means in the modern marketplace, the Funds, and their service providers, may be susceptible to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized monitoring, release, misuse, loss, destruction or corruption of confidential information, unauthorized access to relevant systems, compromises to networks or devices that the Funds and their service providers use to service the Funds' operations, ransomware, operational disruption or failures in the physical infrastructure or operating systems that support the Funds and their service providers, or various other forms of cyber security breaches. Cyber-attacks affecting a Fund, SIMC or any of the Sub-Advisers, a Fund's distributor, custodian, transfer agent, or any other of a Fund's intermediaries or service providers may adversely impact the Fund and its shareholders, potentially resulting in, among other things, financial losses or the inability of Fund shareholders to transact business. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Funds may also incur additional costs for cyber security risk management purposes designed to mitigate or prevent the risk of cyber-attacks. Such costs may be ongoing because threats of cyber-attacks are constantly evolving as cyber attackers become more sophisticated and their techniques become more complex. Similar types of cyber security risks are also present for issuers of securities in which a Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such companies to lose value. There can be no assurance that the Funds, the Funds' service providers, or the issuers of the securities in which the Funds invest will not suffer losses relating to cyber-attacks or other information security breaches in the future. A Fund may also experience losses due to systems failures or inadequate system back-up or procedures at the brokerage firm(s) carrying the Fund's positions.

SECURITIES LENDING—Each Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Board. These loans, if and when made, may not exceed 33% of the total asset value of the Fund (including the loan collateral). No Fund will lend portfolio securities to its advisers or their affiliates unless it has applied for and received specific authority to do so from the SEC. Loans of portfolio securities will be fully

collateralized by cash, letters of credit or U.S. Government securities, and the collateral will be maintained in an amount equal to at least 100% of the current market value of the loaned securities by marking to market daily, although the borrower will be required to deliver collateral of 102% and 105% of the market value of borrowed securities for domestic and foreign issuers, respectively. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund.

A Fund may pay a part of the interest earned from the investment of collateral or other fee to an unaffiliated third party for acting as the Fund's securities lending agent.

By lending its securities, a Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities, as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. Government securities or letters of credit are used as collateral. Each Fund will adhere to the following conditions whenever its portfolio securities are loaned: (i) the Fund must receive at least 100% cash collateral or equivalent securities of the type discussed in the preceding paragraph from the borrower; (ii) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (iii) the Fund must be able to terminate the loan on demand; (iv) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities and any increase in market value; (v) the Fund may pay only reasonable fees in connection with the loan (which may include fees payable to the lending agent, the borrower, the administrator and the custodian); and (vi) voting rights on the loaned securities may pass to the borrower, provided, however, that if a material event adversely affecting the investment occurs, the Fund must terminate the loan and regain the right to vote the securities. The Board has adopted procedures reasonably designed to ensure that the foregoing criteria will be met. Loan agreements involve certain risks in the event of default or insolvency of the borrower, including possible delays or restrictions upon the Fund's ability to recover the loaned securities or dispose of the collateral for the loan, which could give rise to loss because of adverse market action, expenses and/or delays in connection with the disposition of the underlying securities.

A Fund may invest the cash received as collateral through loan transactions in other eligible securities, which may include shares of an affiliated or unaffiliated registered money market fund or of an affiliated or unaffiliated unregistered money market fund that complies with the requirements of Rule 2a-7 under the 1940 Act to the extent required by the 1940 Act (see the "Investment Companies" section above). Money market funds may or may not seek to maintain a stable NAV of \$1.00 per share. Investing the cash collateral subjects the Fund to market risk. A Fund remains obligated to return all collateral to the borrower under the terms of its securities lending arrangements even if the value of the investments made with the collateral has declined. Accordingly, if the value of a security in which the cash collateral has been invested declines, the loss would be borne by the Fund, and the Fund may be required to liquidate other investments in order to return collateral to the borrower at the end of a loan.

The cash collateral may be invested in the Liquidity Fund, an affiliated unregistered money market fund managed by SIMC and operated in accordance with Rule 12d1-1 under the 1940 Act. Although the Liquidity Fund is not registered as an investment company under the 1940 Act, it intends to operate as a money market fund in compliance with Rule 2a-7 of the 1940 Act to the extent required by Rule 12d1-1 under the 1940 Act. The Liquidity Fund does not seek to maintain a stable NAV, and therefore its NAV will fluctuate. The cash collateral invested in the Liquidity Fund may be subject to the risk of loss in the underlying investments of the Liquidity Fund. When a Fund invests in the Liquidity Fund, it will bear a pro rata portion of the Liquidity Fund's expenses, which includes fees paid to SIMC or its affiliates.

SHORT SALES—Short sales may be used by a Fund as part of its overall portfolio management strategies or to offset (hedge) a potential decline in the value of a security. A Fund may engage in short sales that are either "against the box" or "uncovered." A short sale is "against the box" if, at all times during which the short position is open, the Fund owns at least an equal amount of the securities or securities

convertible into, or exchangeable without further consideration for, securities of the same issue as the securities that are sold short. A short sale against the box is a taxable transaction to a Fund with respect to the securities that are sold short. Uncovered short sales are transactions under which a Fund sells a security it does not own. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividends or interest that accrue during the period of the loan. To borrow the security, the Fund may also be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale may be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out. Pursuant to its particular investment strategy, a Sub-Adviser may have a net short exposure in the portfolio of assets allocated to the Sub-Adviser.

Until a Fund closes its short position or replaces the borrowed security, the Fund will: (i) earmark on the books of the Fund or place in a segregated account cash or liquid securities at such a level that the amount earmarked or deposited in the segregated account plus the amount deposited with the broker as collateral will equal the current value of the security sold short; or (ii) otherwise “cover” the Fund’s short position as required by the 1940 Act.

When a Fund sells securities short, it may use the proceeds from the sales to purchase long positions in additional equity securities that it believes will outperform the market or its peers. This strategy may effectively result in the Fund having a leveraged investment portfolio, which results in greater potential for loss. Leverage can amplify the effects of market volatility on a Fund’s share price and make a Fund’s returns more volatile. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of a Fund’s portfolio securities. The use of leverage may also cause a Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations.

SOVEREIGN DEBT—The cost of servicing external debt will also generally be adversely affected by rising international interest rates because many external debt obligations bear interest at rates that are adjusted based upon international interest rates. The ability to service external debt will also depend on the level of the relevant government’s international currency reserves and its access to a foreign exchange. Currency devaluations may affect the ability of a sovereign obligor to obtain sufficient foreign exchange to service its external debt.

As a result of the foregoing or other factors, a governmental obligor may default on its obligations. If such an event occurs, a Fund may have limited legal recourse against the issuer and/or guarantor. Remedies must, in some cases, be pursued in the courts of the defaulting party itself, and the ability of the holder of foreign sovereign debt securities to obtain recourse may be subject to the political climate in the relevant country. In addition, no assurance can be given that the holders of commercial bank debt will not contest payments to the holders of other foreign sovereign debt obligations in the event of default under their commercial bank loan agreements.

STRUCTURED SECURITIES—Certain Funds may invest a portion of their assets in entities organized and operated solely for the purpose of restructuring the investment characteristics of sovereign debt obligations of emerging market issuers. This type of restructuring involves the deposit with, or purchase by, an entity, such as a corporation or trust, of specified instruments (such as commercial bank loans or Brady Bonds) and the issuance by that entity of one or more classes of securities (“Structured Securities”) backed by, or representing interests in, the underlying instruments. The cash flow on the underlying instruments may be apportioned among the newly issued Structured Securities to create securities with different investment characteristics, such as varying maturities, payment priorities and interest rate provisions, and the extent of the payments made with respect to Structured Securities is dependent on the extent of the cash flow on the underlying instruments. Because Structured Securities of the type in which the Funds anticipate they will invest typically involve no credit enhancement, their credit risk will

generally be equivalent to that of the underlying instruments. A Fund is permitted to invest in a class of Structured Securities that is either subordinated or unsubordinated to the right of payment of another class. Subordinated Structured Securities typically have higher yields and present greater risks than unsubordinated Structured Securities. Structured Securities are typically sold in private placement transactions, and there currently is no active trading market for Structured Securities. Certain issuers of such Structured Securities may be deemed to be “investment companies” as defined in the 1940 Act. As a result, a Fund’s investment in such securities may be limited by certain investment restrictions contained in the 1940 Act.

SWAPS, CAPS, FLOORS, COLLARS AND SWAPTIONS—Swaps are centrally-cleared or OTC derivative products in which two parties agree to exchange payment streams calculated by reference to an underlying asset, such as a rate, index, instrument or securities (referred to as the “underlying”) and a predetermined amount (referred to as the “notional amount”). The underlying for a swap may be an interest rate (fixed or floating), a currency exchange rate, a commodity price index, a security, group of securities or a securities index, a combination of any of these, or various other rates, securities, instruments, assets or indexes. Swap agreements generally do not involve the delivery of the underlying or principal, and a party’s obligations are generally equal to only the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the swap agreement.

A great deal of flexibility is possible in the way swaps may be structured. For example, in a simple fixed-to-floating interest rate swap, one party makes payments equivalent to a fixed interest rate, and the other party makes payments calculated with reference to a specified floating interest rate, such as LIBOR or the prime rate. In a currency swap, the parties generally enter into an agreement to pay interest streams in one currency based on a specified rate in exchange for receiving interest streams denominated in another currency. Currency swaps may involve initial and final exchanges of the currency that correspond to the agreed upon notional amount. The use of currency swaps is a highly specialized activity which involves special investment techniques and risks, including settlement risk, non-business day risk, the risk that trading hours may not align, and the risk of market disruptions and restrictions due to government action or other factors.

A Fund may engage in simple or more complex swap transactions involving a wide variety of underlyings for various reasons. For example, a Fund may enter into a swap (i) to gain exposure to investments (such as an index of securities in a market) or currencies without actually purchasing those stocks or currencies; (ii) to make an investment without owning or taking physical custody of securities or currencies in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable; (iii) to hedge an existing position; (iv) to obtain a particular desired return at a lower cost to the Fund than if it had invested directly in an instrument that yielded the desired return; or (v) for various other reasons.

Certain Funds may enter into credit default swaps as a buyer or a seller. The buyer in a credit default contract is obligated to pay the seller a periodic stream of payments over the term of the contract provided no event of default has occurred. If an event of default occurs, the seller must pay the buyer the full notional value (“par value”) of the underlying in exchange for the underlying. If a Fund is a buyer and no event of default occurs, the Fund will have made a stream of payments to the seller without having benefited from the default protection it purchased. However, if an event of default occurs, the Fund, as a buyer, will receive the full notional value of the underlying that may have little or no value following default. As a seller, a Fund receives a fixed rate of income throughout the term of the contract, provided there is no default. If an event of default occurs, the Fund would be obligated to pay the notional value of the underlying in return for the receipt of the underlying. The value of the underlying received by the Fund, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund. Credit default swaps involve different risks than if a Fund invests in the underlying directly. For example, credit default swaps would increase credit risk by providing the Fund with exposure to both the issuer of the referenced obligation (typically a debt obligation)

and the counterparty to the credit default swap. Credit default swaps may in some cases be illiquid. Furthermore, the definition of a “credit event” triggering the seller’s payment obligations under a credit default swap may not encompass all of the circumstances in which the buyer may suffer credit-related losses on an obligation of a referenced entity.

The Funds may enter into total return swap agreements. Total return swap agreements are contracts in which one party agrees to make periodic payments based on the change in market value of underlying assets, which may include a specified security, basket of securities, defined portfolios of bonds, loans and mortgages, or securities indexes during the specified period, in return for periodic payments based on a fixed or variable interest rate or the total return from other underlying assets. Total return swap agreements may be used to obtain exposure to a security or market without owning or taking physical custody of such security or market.

Total return swap agreements may effectively add leverage to a Fund’s portfolio because, in addition to its total net assets, a Fund would be subject to investment exposure on the notional amount of the swap. Total return swaps are a mechanism for the user to accept the economic benefits of asset ownership without utilizing the balance sheet. The other leg of the swap, usually LIBOR, is spread to reflect the non-balance sheet nature of the product. Total return swaps can be designed with any underlying asset agreed between two parties. Typically, no notional amounts are exchanged with total return swaps. Total return swap agreements entail the risk that a party will default on its payment obligations to the Fund thereunder. Swap agreements also entail the risk that a Fund will not be able to meet its obligation to the counterparty. Generally, a Fund will enter into total return swaps on a net basis (*i.e.*, the two payment streams are netted out with the Fund receiving or paying, as the case may be, only the net amount of the two payments). Fully funded total return swaps have economic and risk characteristics similar to credit-linked notes, which are described above.

Caps, floors, collars and swaptions are privately-negotiated option-based derivative products. Like a put or call option, the buyer of a cap or floor pays a premium to the writer. In exchange for that premium, the buyer receives the right to a payment equal to the differential if the specified index or rate rises above (in the case of a cap) or falls below (in the case of a floor) a pre-determined strike level. Like swaps, obligations under caps and floors are calculated based upon an agreed notional amount, and, like most swaps (other than foreign currency swaps), the entire notional amount is not exchanged. A collar is a combination product in which one party buys a cap from and sells a floor to another party. Swaptions give the holder the right to enter into a swap. A Fund may use one or more of these derivative products in addition to or in lieu of a swap involving a similar rate or index.

Under current market practice, swaps, caps, collars and floors between the same two parties are generally documented under a “master agreement.” In some cases, options and forward contracts between the parties may also be governed by the same master agreement. In the event of a default, amounts owed under all transactions entered into under, or covered by, the same master agreement would be netted, and only a single payment would be made.

Generally, a Fund would calculate the obligations of the swap agreements’ counterparties on a “net basis.” Consequently, a Fund’s current obligation (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each counterparty to the swap agreement (the “net amount”). A Fund’s current obligation under a swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be “covered” as required by the 1940 Act.

Each Fund will not enter into a swap agreement with any single party if the net amount owed or to be received under the existing agreements with that party would exceed 5% of the Fund’s assets.

The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents using standardized swap agreements. As a result,

the use of swaps has become more prevalent in comparison with the markets for other similar instruments that are also traded in OTC markets.

Swaps and other derivatives involve risks. One significant risk in a swap, cap, floor, collar or swaption is the volatility of the specific interest rate, currency or other underlying that determines the amount of payments due to and from a Fund. This is true whether these derivative products are used to create additional risk exposure for a Fund or to hedge, or manage, existing risk exposure. If under a swap, cap, floor, collar or swaption agreement a Fund is obligated to make a payment to the counterparty, the Fund must be prepared to make the payment when due. A Fund could suffer losses with respect to such an agreement if the Fund is unable to terminate the agreement or reduce its exposure through offsetting transactions. Further, the risks of caps, floors and collars, like put and call options, may be unlimited for the seller if the cap or floor is not hedged or covered, but is limited for the buyer.

Because under swap, cap, floor, collar and swaption agreements a counterparty may be obligated to make payments to a Fund, these derivative products are subject to risks related to the counterparty's creditworthiness, in addition to other risks discussed in this SAI. If a counterparty defaults, a Fund's risk of loss will consist of any payments that the Fund is entitled to receive from the counterparty under the agreement (this may not be true for currency swaps that require the delivery of the entire notional amount of one designated currency in exchange for the other). Upon default by a counterparty, however, a Fund may have contractual remedies under the swap agreement.

A Fund will enter into swaps only with counterparties that an adviser believes to be creditworthy. In addition, a Fund will earmark on the books of the Fund or segregate cash or liquid securities in an amount equal to any liability amount owned under a swap, cap, floor, collar or swaption agreement, or will otherwise "cover" its position as required by the applicable SEC and SEC staff positions.

The swap market is a relatively new market for which regulations are still being developed. The Dodd-Frank Act has substantially altered and increased the regulation of swaps. Swaps are broadly defined in the Dodd-Frank Act, CFTC rules and SEC rules, and also include commodity options and NDFs. Additionally, the Dodd-Frank Act divided the regulation of swaps between commodity swaps (such as swaps on interest rates, currencies, physical commodities, broad based stock indexes, and broad based credit default swap indexes), regulated by the CFTC, and security based swaps (such as equity swaps and single name credit default swaps), regulated by the SEC. The CFTC will determine which categories of swaps will be required to be traded on regulated exchange-like platforms, such as swap execution facilities, and which will be required to be centrally cleared. Cleared swaps must be cleared through futures commission merchants registered with the CFTC, and such futures commission merchants will be required to collect margin from customers for such cleared swaps. Additionally, all swaps are subject to reporting to a swap data repository. Dealers in swaps are required to register with the CFTC as swap dealers and are required to comply with extensive regulations regarding their external and internal business conduct practices, regulatory capital requirements, and rules regarding the holding of counterparty collateral.

The SEC recently voted to adopt Rule 18f-4 under the 1940 Act, which will regulate the use of derivatives for certain funds registered under the 1940 Act (the "SEC Derivatives Rule"). The SEC Derivatives Rule will require, among other things, that the certain entities adopt a derivatives risk management program, comply with limitations on leveraged-related risk based on a relative "value-at-risk" test and update reporting and disclosure procedures. The full impact of the SEC Derivatives Rule on the Funds remains uncertain, however, due to the compliance timeline within the SEC Derivatives Rule, it is unlikely that the Funds will be required to comply with the requirements until 2022.

Both U.S. and non-U.S. regulators have adopted and are in the process of implementing regulations governing derivatives markets, including mandatory clearing of certain derivatives, margin and reporting requirements. The ultimate impact of the regulations remains unclear. Additional regulation of derivatives may make derivatives more costly, limit their availability or utility, may limit or restrict their use by a Fund, otherwise adversely affect their performance or disrupt markets. It is possible that developments in the

swap market, including potential additional government regulation, could adversely affect a Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

U.S. GOVERNMENT SECURITIES—Examples of types of U.S. Government obligations in which a Fund may invest include U.S. Treasury obligations and the obligations of U.S. Government agencies or U.S. Government sponsored entities such as Federal Home Loan Banks, Federal Farm Credit Banks, Federal Land Banks, the FHA, the Farmers Home Administration, the Export-Import Bank of the United States, the Small Business Administration, Fannie Mae, GNMA, the General Services Administration, the Student Loan Marketing Association, the Central Bank for Cooperatives, Freddie Mac, Federal Intermediate Credit Banks, the Maritime Administration and other similar agencies. Whether backed by the full faith and credit of the U.S. Treasury or not, U.S. Government securities are not guaranteed against price movements due to fluctuating interest rates.

If the total public debt of the U.S. Government as a percentage of gross domestic product reaches high levels as a result of combating financial downturn or otherwise, such high levels of debt may create certain systemic risks if sound debt management practices are not implemented. A high national debt level may increase market pressures to meet government funding needs, which may increase borrowing costs and cause a government to issue additional debt, thereby increasing the risk of refinancing. A high national debt also raises concerns that a government may be unable or unwilling to repay the principal or interest on its debt. Unsustainable debt levels can decline the valuation of currencies, and can prevent a government from implementing effective counter-cyclical fiscal policy during economic downturns.

An increase in national debt levels may also necessitate the need for the U.S. Congress to negotiate adjustments to the statutory debt ceiling to increase the cap on the amount the U.S. Government is permitted to borrow to meet its existing obligations and finance current budget deficits. Future downgrades could increase volatility in domestic and foreign financial markets, result in higher interest rates, lower prices of U.S. Treasury securities and increase the costs of different kinds of debt. Any controversy or ongoing uncertainty regarding statutory debt ceiling negotiations may impact the U.S. long-term sovereign credit rating and may cause market uncertainty. As a result, market prices and yields of securities supported by the full faith and credit of the U.S. government may be adversely affected. Although remote, it is at least theoretically possible that under certain scenarios the U.S. Government could default on its debt, including U.S. Treasury securities.

Receipts. Receipts are interests in separately-traded interest and principal component parts of U.S. Government obligations that are issued by banks or brokerage firms and are created by depositing U.S. Government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities, which means that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of interest or principal.

U.S. Treasury Obligations. U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry systems known as STRIPS and TRs.

U.S. Government Zero Coupon Securities. STRIPS and receipts are sold as zero coupon securities; that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturities and credit qualities.

U.S. Government Agencies. Some obligations issued or guaranteed by agencies of the U.S. Government are supported by the full faith and credit of the U.S. Treasury (e.g., Treasury bills, notes and bonds, and securities guaranteed by GNMA), others are supported by the right of the issuer to borrow from the U.S. Treasury (e.g., obligations of Federal Home Loan Banks), while still others are supported only by the credit of the instrumentality (e.g., obligations of Fannie Mae). Guarantees of principal by agencies or instrumentalities of the U.S. Government may be a guarantee of payment at the maturity of the obligation so that, in the event of a default prior to maturity, there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest neither extend to the value or yield of these securities nor to the value of a Fund's shares.

VARIABLE AND FLOATING RATE INSTRUMENTS—Certain obligations may carry variable or floating rates of interest and may involve a conditional or unconditional demand feature. Such instruments bear interest at rates that are not fixed, but that vary with changes in specified market rates or indexes. The interest rates on these securities may be reset daily, weekly, quarterly, or some other reset period. There is a risk that the current interest rate on such obligations may not accurately reflect existing market interest rates. A demand instrument with a demand notice exceeding seven days may be considered illiquid if there is no secondary market for such security.

WHEN-ISSUED AND DELAYED DELIVERY SECURITIES—When-issued and delayed delivery basis, including “TBA” (to be announced) basis, transactions involve the purchase of an instrument with payment and delivery taking place in the future. Delivery of and payment for these securities may occur a month or more after the date of the purchase commitment. A TBA transaction is a method of trading mortgage-backed securities. In a TBA transaction, the buyer and seller agree upon general trade parameters such as agency, settlement date, par amount and price. The actual pools delivered generally are determined two days prior to the settlement date. The interest rate realized on these securities is fixed as of the purchase date, and no interest accrues to a Fund before settlement. These securities are subject to market fluctuation due to changes in market interest rates, and it is possible that the market value of these securities at the time of settlement could be higher or lower than the purchase price if the general level of interest rates has changed. Although a Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of actually acquiring securities for its portfolio, the Fund may dispose of a when-issued security or forward commitment prior to settlement if an adviser deems it appropriate. When a Fund purchases when-issued or delayed delivery securities, it will “cover” its position as required by the 1940 Act.

YANKEE OBLIGATIONS—Yankees are U.S. dollar-denominated instruments of foreign issuers who either register with the SEC or issue securities under Rule 144A of the 1933 Act. These obligations consist of debt securities (including preferred or preference stock of non-governmental issuers), certificates of deposit, fixed time deposits and bankers' acceptances issued by foreign banks, and debt obligations of foreign governments or their subdivisions, agencies and instrumentalities, international agencies and supranational entities. Some securities issued by foreign governments or their subdivisions, agencies and instrumentalities may not be backed by the full faith and credit of the foreign government.

The Yankees selected for a Fund will adhere to the same quality standards as those utilized for the selection of domestic debt obligations.

ZERO COUPON SECURITIES—Zero coupon securities are securities that are sold at a discount to par value and securities on which interest payments are not made during the life of the security. Upon maturity, the holder is entitled to receive the par value of the security. Although interest payments are not made on such securities, holders of such securities are deemed to have received “phantom income” annually. Because a Fund will distribute its “phantom income” to shareholders, to the extent that shareholders elect to receive dividends in cash rather than reinvesting such dividends in additional shares, a Fund will have fewer assets with which to purchase income producing securities. Pay-in-kind securities pay interest in either cash or additional securities, at the issuer's option, for a specified period. Pay-in-kind bonds, like zero coupon bonds, are designed to give an issuer flexibility in managing cash flow. Pay-in-

kind bonds are expected to reflect the market value of the underlying debt plus an amount representing accrued interest since the last payment. Pay-in-kind bonds are usually less volatile than zero coupon bonds, but more volatile than cash pay securities. Pay-in-kind securities are securities that have interest payable by delivery of additional securities. Upon maturity, the holder is entitled to receive the aggregate par value of the securities. Deferred payment securities are securities that remain zero coupon securities until a predetermined date, at which time the stated coupon rate becomes effective and interest becomes payable at regular intervals.

Zero coupon, pay-in-kind and deferred payment securities may be subject to greater fluctuation in value and lesser liquidity in the event of adverse market conditions than comparably rated securities paying cash interest at regular interest payment periods. STRIPS and receipts (TRs, TIGRs, LYONs and CATS) are sold as zero coupon securities; that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturities but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturities and credit qualities.

Corporate zero coupon securities are: (i) notes or debentures that do not pay current interest and are issued at substantial discounts from par value; or (ii) notes or debentures that pay no current interest until a stated date one or more years into the future, after which date the issuer is obligated to pay interest until maturity, usually at a higher rate than if interest were payable from the date of issuance, and may also make interest payments in kind (*e.g.*, with identical zero coupon securities). Such corporate zero coupon securities, in addition to the risks identified above, are subject to the risk of the issuer's failure to pay interest and repay principal in accordance with the terms of the obligation. A Fund must accrete the discount or interest on high-yield bonds structured as zero coupon securities as income even though it does not receive a corresponding cash interest payment until the security's maturity or payment date. For tax purposes, original issue discount that accretes in a taxable year is treated as earned by a Fund and therefore is subject to the distribution requirements applicable to the RICs under Subchapter M of the Code. A Fund may have to dispose of its securities under disadvantageous circumstances to generate cash or may have to leverage itself by borrowing cash to satisfy distribution requirements. A Fund accrues income with respect to the securities prior to the receipt of cash payments.

INVESTMENT LIMITATIONS

The following are fundamental and non-fundamental policies of the Funds. The percentage limitations (except for the limitation on borrowing and illiquid investments) set forth below will apply at the time of the purchase of a security and shall not be violated unless an excess or deficiency occurs, immediately after or as a result of a purchase of such security.

Fundamental Policies

The following investment limitations are fundamental policies of the Funds, which cannot be changed with respect to a Fund without the consent of the holders of a majority of the Fund's outstanding shares. The term "majority of outstanding shares" means the vote of: (i) 67% or more of a Fund's shares present at a meeting, if more than 50% of the outstanding shares of the Fund are present or represented by proxy; or (ii) more than 50% of a Fund's outstanding shares, whichever is less.

A Fund may:

1. Borrow money, except as prohibited under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
2. Make loans, except as prohibited under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
3. Purchase or sell commodities, commodities contracts and real estate, except as prohibited under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.
4. Underwrite securities issued by other persons, except as prohibited under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

Each of the Multi-Asset Income and Multi-Asset Capital Stability Funds may:

1. Purchase securities of an issuer, except if it would cause the Fund to fail to satisfy the diversification requirement for a diversified management company under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

A Fund may not:

1. Concentrate its investments in a particular industry or group of industries, as concentration is defined under the 1940 Act, the rules or regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time, except that each Fund may invest without limitation in: (i) securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities; and (ii) tax-exempt obligations of state or municipal governments and their political subdivisions.
2. Issue senior securities, as such term is defined under the 1940 Act, the rules or regulations thereunder or any exemption therefrom as amended or interpreted from time to time, except as permitted under the 1940 Act, the rules and regulations thereunder or any exemption therefrom, as such statute, rules or regulations may be amended or interpreted from time to time.

Non-Fundamental Policies

The following limitations are non-fundamental policies of the Funds and may be changed by the Board without a vote of shareholders.

A Fund may not:

1. Pledge, mortgage or hypothecate assets except to secure permitted borrowings or related to the deposit of assets in escrow or the posting of collateral in segregated accounts in compliance with the asset segregation requirements imposed by Section 18 of the 1940 Act, or any rule or SEC staff interpretation thereunder.
2. Purchase or hold illiquid securities, *i.e.*, securities that cannot be disposed of for their approximate carrying value in seven days or less (which term includes repurchase agreements and time deposits maturing in more than seven days) if, in the aggregate, more than 15% of its net assets would be invested in illiquid securities.
3. Purchase any securities that would cause 25% or more of the total assets of the Fund to be invested in the securities of one or more issuers conducting their principal business activities in the same

industry, except that each Fund may invest without limitation in: (i) securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities; and (ii) tax-exempt obligations of state or municipal governments and their political subdivisions.

4. Borrow money in an amount exceeding 33⅓% of the value of its total assets, including the amount borrowed (not including temporary borrowings not in excess of 5% of its total assets), provided that, for purposes of this limitation, investment strategies which either obligate the Fund to purchase securities or require the Fund to segregate assets are not considered to be borrowings.
5. Make loans if, as a result, more than 33⅓% of its total assets would be lent to other parties, except that the Fund may: (i) purchase or hold debt instruments in accordance with its investment objective and policies; (ii) enter into repurchase agreements; and (iii) lend its securities.
6. Invest in unmarketable interests in real estate limited partnerships or invest directly in real estate except as permitted by the 1940 Act. For the avoidance of doubt, the foregoing policy does not prevent a Fund from, among other things; purchasing marketable securities of companies that deal in real estate or interests therein (including REITs).

Each Fund may:

1. Purchase or sell financial and physical commodities, commodity contracts based on (or relating to) physical commodities or financial commodities and securities and derivative instruments whose values are derived from (in whole or in part) physical commodities or financial commodities.

Each of the Multi-Asset Income and Multi-Asset Capital Stability Funds may not:

1. With respect to 75% of its assets: (i) purchase the securities of any issuer (except securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities or securities of other investment companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer; or (ii) acquire more than 10% of the outstanding voting securities of any one issuer.

The following descriptions of the 1940 Act may assist shareholders in understanding the above policies and restrictions.

Diversification. Under the 1940 Act, a diversified investment management company, as to 75% of its total assets, may not purchase securities of any issuer (other than securities issued or guaranteed by the U.S. Government, its agents or instrumentalities or securities of other investment companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer, or more than 10% of the issuer's outstanding voting securities would be held by the fund. The Multi-Asset Accumulation and Multi-Asset Inflation Managed Funds are non-diversified investment management companies.

Concentration. The SEC has presently defined concentration as investing 25% or more of an investment company's net assets in an industry or group of industries, with certain exceptions.

Borrowing. The 1940 Act presently allows a fund to borrow from any bank (including pledging, mortgaging or hypothecating assets) in an amount up to 33⅓% of its total assets, including the amount borrowed (not including temporary borrowings not in excess of 5% of its total assets).

Senior Securities. Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

Lending. Under the 1940 Act, a fund may only make loans if expressly permitted by its investment policies. Each Fund's non-fundamental investment policy on lending is set forth above.

Underwriting. Under the 1940 Act, underwriting securities involves a fund purchasing securities directly from an issuer for the purpose of selling (distributing) them or participating in any such activity

either directly or indirectly. Under the 1940 Act, a diversified fund may not make any commitment as underwriter, if immediately thereafter the amount of its outstanding underwriting commitments, plus the value of its investments in securities of issuers (other than investment companies) of which it owns more than 10% of the outstanding voting securities, exceeds 25% of the value of its total assets.

Real Estate. The 1940 Act does not directly restrict a fund's ability to invest in real estate, but does require that every fund have a fundamental investment policy governing such investments. The Funds have adopted a fundamental policy that would permit direct investment in real estate. However, the Funds have a non-fundamental investment limitation that prohibits them from investing directly in real estate. This non-fundamental policy may be changed only by vote of the Board.

THE ADMINISTRATOR AND TRANSFER AGENT

General. SEI Investments Global Funds Services (the "Administrator"), a Delaware statutory trust, has its principal business offices at One Freedom Valley Drive, Oaks, Pennsylvania 19456. The Administrator also serves as the transfer agent for the Funds (the "Transfer Agent"). SIMC, a wholly owned subsidiary of SEI Investments Company ("SEI"), is the owner of all beneficial interest in the Administrator and Transfer Agent. SEI and its subsidiaries and affiliates, including the Administrator, are leading providers of fund evaluation services, trust accounting systems, and brokerage and information services to financial institutions, institutional investors, and money managers. The Administrator and its affiliates also serve as administrator or sub-administrator to other mutual funds.

Administration Agreement with the Trust. The Trust and the Administrator have entered into an administration and transfer agency agreement (the "Administration Agreement"). Under the Administration Agreement, the Administrator provides the Trust with administrative and transfer agency services or employs certain other parties, including its affiliates, who provide such services. Such services generally include, but are not limited to:

- maintaining books and records related to a Fund's cash and position reconciliations, and portfolio transactions;
- preparation of financial statements and other reports for the Funds;
- calculating the net asset value of the Funds in accordance with the Funds' valuation policies and procedures;
- tracking income and expense accruals and processing disbursements to vendors and service providers;
- providing performance, financial and expense information for registration statements and board materials;
- providing certain tax monitoring and reporting;
- providing space, equipment, personnel and facilities;
- maintaining share transfer records;
- reviewing account opening documents and subscription and redemption requests;
- calculating and distributing required ordinary income and capital gains distributions; and
- providing anti-money laundering program services.

The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from willful misfeasance, bad faith or

negligence on the part of the Administrator in the performance of its duties or from reckless disregard of its duties and obligations thereunder.

The Administration Agreement shall remain effective for the initial term of the Agreement and each renewal term thereof unless earlier terminated: (i) by a vote of a majority of the Trustees of the Trust on not less than 60 days' written notice to the Administrator; or (ii) by the Administrator on not less than 90 days' written notice to the Trust.

Administration Fees. For its administrative services, the Administrator receives a fee, which is calculated based upon the average daily net assets of each Fund and paid monthly by the Trust at the following annual rates:

Administration Fee	
On the first \$1.5 billion of Assets;	0.300%
on the next \$500 million of Assets;	0.2550%
on the next \$500 million of Assets;	0.210%
on the next \$500 million of Assets;	0.1650%
on Assets over \$3 billion.	0.120%

For the fiscal years ended September 30, 2018, 2019 and 2020, the following table shows: (i) the dollar amount of fees paid to the Administrator by each Fund; and (ii) the dollar amount of the Administrator's voluntary fee waivers and/or reimbursements.

	Administration Fees Paid			Administration Fees Waived		
	2018	2019	2020	2018	2019	2020
Multi-Asset Accumulation Fund	\$7,394	\$7,306	\$7,210	\$ 51	\$ 385	\$ 416
Multi-Asset Income Fund	\$2,944	\$2,861	\$2,860	\$530	\$ 623	\$ 685
Multi-Asset Inflation Managed Fund	\$2,689	\$2,612	\$2,455	\$ 59	\$ 160	\$ 184
Multi-Asset Capital Stability Fund	\$2,188	\$2,157	\$2,272	\$733	\$1,234	\$1,295

THE ADVISER AND THE SUB-ADVISERS

General. SIMC is a wholly owned subsidiary of SEI (NASDAQ: SEIC), a leading global provider of outsourced asset management, investment processing and investment operations solutions. The principal business address of SIMC and SEI is One Freedom Valley Drive, Oaks, Pennsylvania 19456. SEI was founded in 1968 and is a leading provider of investment solutions to banks, institutional investors, investment advisers and insurance companies. SIMC had approximately \$191.59 billion in assets as of September 30, 2020.

Manager of Managers Structure. SIMC is the investment adviser to each of the Funds and operates as a "manager of managers." SIMC and the Trust have obtained an exemptive order from the SEC that permits SIMC, with the approval of the Trust's Board, to hire, retain or terminate sub-advisers unaffiliated with SIMC for the Funds without submitting the sub-advisory agreements to a vote of the Funds' shareholders. Among other things, the exemptive relief permits the disclosure of only the aggregate amount payable by SIMC under all such sub-advisory agreements. The Funds will notify shareholders in the event of any addition or change in the identity of their sub-advisers.

SIMC oversees the investment advisory services provided to the Funds and may manage the cash portion of the Funds' assets. Pursuant to separate sub-advisory agreements with SIMC, and under the supervision of SIMC and the Board, the sub-advisers to the Funds are generally responsible for the day-to-day investment management of all or a discrete portion of the assets of the Funds. Sub-advisers also are responsible for managing their employees who provide services to the Funds. Sub-advisers are selected based primarily upon the research and recommendations of SIMC, which evaluates quantitatively and qualitatively the sub-advisers' skills and investment results in managing assets for specific asset classes, investment styles and strategies.

Subject to Board review, SIMC allocates and, when appropriate, reallocates the Funds’ assets to the Sub-Advisers, monitors and evaluates the Sub-Advisers’ performance and oversees Sub-Adviser compliance with the Funds’ investment objectives, policies and restrictions. **SIMC has the ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee Sub-Advisers and recommend their hiring, termination and replacement.**

Advisory and Sub-Advisory Agreements. The Trust and SIMC have entered into an investment advisory agreement (the “Advisory Agreement”). Pursuant to the Advisory Agreement, SIMC oversees the investment advisory services provided to the Funds and may manage the cash portion of the Funds’ assets. Pursuant to separate sub-advisory agreements (the “Sub-Advisory Agreements” and, together with the Advisory Agreement, the “Investment Advisory Agreements”) with SIMC, and under the supervision of SIMC and the Board, one or more Sub-Advisers are responsible for the day-to-day investment management of all or a discrete portion of the assets of the Funds. The Sub-Advisers are also responsible for managing their employees who provide services to the Funds.

Each Investment Advisory Agreement sets forth a standard of care, pursuant to which the Adviser or Sub-Adviser, as applicable, is responsible for performing services to the Funds, and also includes liability and indemnification provisions.

The continuance of each Investment Advisory Agreement after the first two (2) years must be specifically approved at least annually: (i) by the vote of a majority of the outstanding shares of that Fund or by the Trustees; and (ii) by the vote of a majority of the Trustees who are not parties to such Investment Advisory Agreement or “interested persons” of any party thereto, cast in person at a meeting called for the purpose of voting on such approval. Each Investment Advisory Agreement will terminate automatically in the event of its assignment and is terminable at any time without penalty by the Trustees of the Trust or, with respect to a Fund, by a majority of the outstanding shares of that Fund, on not less than 30 days’ nor more than 60 days’ written notice to SIMC or the Fund’s Sub-Adviser, as applicable, or by SIMC or the Fund’s Sub-Adviser, as applicable, on 90 days’ written notice to the Trust.

Advisory and Sub-Advisory Fees. For these advisory services, SIMC receives a fee, which is calculated daily and paid monthly, at the annual rates set forth in the table below (shown as a percentage of the average daily net assets of each Fund). SIMC then pays the Sub-Advisers out of its contractual advisory fee for sub-advisory services provided to the Funds. The rates paid to each Sub-Adviser vary. The aggregate sub-advisory fees paid by SIMC for the fiscal year ended September 30, 2020 are set forth below as a percentage of the average daily net assets of each Fund.

Fund Name	Contractual Advisory Fee	Aggregate Sub-Advisory Fees Paid
Multi-Asset Accumulation Fund	0.75%	0.34%
Multi-Asset Income Fund	0.60%	0.32%
Multi-Asset Inflation Managed Fund	0.55%	0.11%
Multi-Asset Capital Stability Fund	0.40%	0.28%

SIMC pays each Sub-Adviser a fee out of its advisory fee. Sub-Advisory fees are based on a percentage of the average daily net assets managed by the applicable Sub-Adviser.

For the fiscal years ended September 30, 2018, 2019 and 2020, the following tables show: (i) the contractual advisory fees that SIMC is entitled to receive from each Fund; (ii) the dollar amount of SIMC’s contractual and voluntary fee waivers; (iii) the dollar amount of fees paid to the Sub-Advisers by SIMC; and (iv) the dollar amount of the fees retained by SIMC.

For the fiscal year ended September 30, 2020:

<u>Fund Name</u>	<u>Contractual Advisory Fees (000)</u>	<u>Advisory Fees Waived (000)</u>	<u>Sub-Advisory Fees Paid (000)</u>	<u>Advisory Fees Retained by SIMC (000)</u>
Multi-Asset Accumulation Fund	\$20,495	\$3,003	\$9,201	\$8,291
Multi-Asset Income Fund	\$ 5,720	\$1,720	\$3,040	\$ 960
Multi-Asset Inflation Managed Fund	\$ 4,501	\$1,784	\$ 895	\$1,822
Multi-Asset Capital Stability Fund	\$ 3,029	\$ 303	\$2,150	\$ 576

For the fiscal year ended September 30, 2019:

<u>Fund Name</u>	<u>Contractual Advisory Fees (000)</u>	<u>Advisory Fees Waived (000)</u>	<u>Sub-Advisory Fees Paid (000)</u>	<u>Advisory Fees Retained by SIMC (000)</u>
Multi-Asset Accumulation Fund	\$20,938	\$3,092	\$9,315	\$8,531
Multi-Asset Income Fund	\$ 5,721	\$1,728	\$3,058	\$ 935
Multi-Asset Inflation Managed Fund	\$ 4,790	\$1,906	\$1,557	\$1,327
Multi-Asset Capital Stability Fund	\$ 2,877	\$ 294	\$2,067	\$ 516

For the fiscal year ended September 30, 2018:

<u>Fund Name</u>	<u>Contractual Advisory Fees (000)</u>	<u>Advisory Fees Waived (000)</u>	<u>Sub-Advisory Fees Paid (000)</u>	<u>Advisory Fees Retained by SIMC (000)</u>
Multi-Asset Accumulation Fund	\$21,337	\$3,426	\$10,330	\$7,581
Multi-Asset Income Fund	\$ 5,888	\$2,049	\$ 3,356	\$ 483
Multi-Asset Inflation Managed Fund	\$ 4,987	\$2,102	\$ 967	\$1,918
Multi-Asset Capital Stability Fund	\$ 2,969	\$ 848	\$ 2,181	\$ —

The Sub-Advisers.

ALLIANCEBERNSTEIN L.P.—AllianceBernstein L.P. (“AllianceBernstein”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Inflation Managed (and its Subsidiary) and Multi-Asset Capital Stability Funds. AllianceBernstein is a Delaware limited partnership, the majority limited partnership units in which are held, directly and indirectly, by its parent company Equitable Holdings, Inc. (“EQH”), a publicly traded holding company for a diverse group of financial services companies. AllianceBernstein Corporation, an indirect wholly-owned subsidiary of EQH, is the general partner of both AllianceBernstein and AllianceBernstein Holding L.P., a publicly traded partnership. As of September 30, 2020, AllianceBernstein Holding L.P. owned approximately 35.5% of the issued and outstanding AllianceBernstein Units and AXA Equitable Holdings, Inc. and its subsidiaries had an approximate 63.8% economic interest in AllianceBernstein (including both the general partnership and limited partnership interests in AllianceBernstein Holding L.P. and AllianceBernstein), and unaffiliated holders held approximately 0.7.

AQR CAPITAL MANAGEMENT, LLC—AQR Capital Management, LLC (“AQR”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Accumulation Fund (and its Subsidiary). AQR, a Delaware limited liability company founded in 1998 and registered investment adviser under the Investment Advisers Act of 1940, is a wholly owned subsidiary of AQR Capital Management Holdings, LLC (“AQR Holdings”), which has no activities other than holding the interests of AQR. Clifford S. Asness, Ph.D., M.B.A., may be deemed to control AQR through his voting control of the Board of Members of AQR Holdings.

COLUMBIA MANAGEMENT INVESTMENT ADVISERS, LLC—Columbia Management Investment Advisers, LLC (“Columbia Management”) serves as a Sub-Adviser to a portion of the assets of the Inflation Commodity Strategy Subsidiary Ltd., a wholly-owned subsidiary of the Multi-Asset Inflation Managed Fund. Columbia Management is located at 225 Franklin Street, Boston, MA 02110 and is a wholly-owned subsidiary of Ameriprise Financial, Inc. (“Ameriprise Financial”). Columbia Management is responsible for the investment management of a portion of the assets of Inflation Commodity Strategy Subsidiary Ltd., but has delegated certain of its duties, including day-to-day portfolio management to Threadneedle International Ltd, (“Threadneedle”), as a sub-adviser, which determines what securities and other investments should be bought or sold. Threadneedle is located at Cannon Place, 78 Cannon Street, London EC4N 6AG, United Kingdom. Threadneedle is a registered investment adviser, an affiliate of Columbia Management, and an indirect wholly-owned subsidiary of Ameriprise Financial. Threadneedle was founded in 1994.

CREDIT SUISSE ASSET MANAGEMENT, LLC—Credit Suisse Asset Management, LLC (“CSAM, LLC”) serves as a Sub-Adviser to a portion of the assets of the Inflation Commodity Strategy Subsidiary Ltd., a wholly-owned subsidiary of the Multi-Asset Inflation Managed Fund. CSAM, LLC is the New York-based Registered Investment Advisor of Credit Suisse Asset Management (“CSAM”). CSAM, which is part of the International Wealth Management Division of Credit Suisse Group AG, is a global asset manager with a focus on Alternative Investments and select Traditional Investments.

GOLDMAN SACHS ASSET MANAGEMENT, L.P.—Goldman Sachs Asset Management, L.P. (“GSAM”) serves as a Sub-Adviser to a portion of the assets to the Multi-Asset Income Fund.

JANUS CAPITAL MANAGEMENT LLC—Janus Capital Management LLC (“Janus”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Capital Stability Fund. Janus (together with its predecessors) has served as an investment adviser since 1969 and currently serves as investment adviser, or sub-adviser, to separately managed accounts, mutual funds, as well as commingled pools or private funds, and wrap fee accounts. Janus is registered as an investment adviser with the U.S. Securities and Exchange Commission, and as a commodity pool operator and a commodity trading advisor with the Commodity Futures Trading Commission. Janus is a wholly owned indirect subsidiary of Janus Henderson Group plc (“JHG”), a publicly traded independent asset management firm incorporated in Jersey, Channel Islands, which does business as Janus Henderson Investors (“Janus Henderson”). The firm is dual-listed on the New York Stock Exchange (NYSE: JHG) and Australian Securities Exchange (ASX: JHG).

PANAGORA ASSET MANAGEMENT INC.—PanAgora Asset Management Inc. (“PanAgora”), a Delaware corporation, serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Accumulation Fund. PanAgora was founded in 1985 and incorporated in 1989. The voting interests in PanAgora are indirectly owned by Power Financial Corporation (through a series of subsidiaries, including Great West Lifeco Inc. and Putnam Investments, LLC). In addition, certain PanAgora employees own non-voting interests in PanAgora. Assuming all employee stock and options are issued and exercised, up to 20% of the economic interest in PanAgora would be owned by PanAgora employees.

QS INVESTORS LLC—QS Investors, LLC (“QS Investors”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Inflation Managed Fund. QS Investors is a wholly-owned subsidiary of Franklin Resources, Inc. As of September 30, 2020, QS Investors had assets under management of approximately \$17 billion.

SSGA FUNDS MANAGEMENT, INC.—SSGA Funds Management, Inc. (“SSGA FM”) serves as a Sub-Adviser for a portion of the assets of the Multi-Asset Income Fund. SSGA FM is a wholly-owned subsidiary of State Street Global Advisors, Inc., which itself is a wholly-owned subsidiary of State Street Corporation (“State Street”), a publicly held financial holding company. SSGA FM and other advisory affiliates of State Street make up State Street Global Advisors (“SSGA”), the investment management arm of State Street.

WESTERN ASSET MANAGEMENT COMPANY, LLC—Western Asset Management Company, LLC (“Western Asset”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Income Fund. Western Asset operates as a group of coordinated sister companies located in various jurisdictions, and

the Firm is headquartered in Pasadena, California. Each Western Asset entity ultimately is a wholly-owned subsidiary of Franklin Resources, Inc. [NYSE: BEN], a global investment management organization with subsidiaries operating as Franklin Templeton in over 165 countries. As of June 30, 2020, each Western Asset entity was ultimately a wholly-owned subsidiary of Legg Mason, Inc. (Legg Mason). In February 2020, Franklin Templeton and Legg Mason announced that they had entered into an agreement under which Franklin Templeton would acquire Legg Mason and its affiliates, including Western Asset. The transaction closed on July 31, 2020, and Western Asset continues to maintain its organizational autonomy and investment independence. Western Asset was founded in 1971 and specializes in the management of fixed income funds.

WESTERN ASSET MANAGEMENT COMPANY LIMITED—Western Asset Management Company Limited (“Western Asset Limited”) serves as a Sub-Adviser to a portion of the assets of the Multi-Asset Income Fund. Western Asset operates as a group of coordinated sister companies located in various jurisdictions, and the Firm is headquartered in Pasadena, California. Each Western Asset entity ultimately is a wholly-owned subsidiary of Franklin Resources, Inc. [NYSE: BEN], a global investment management organization with subsidiaries operating as Franklin Templeton in over 165 countries. As of June 30, 2020, each Western Asset entity was ultimately a wholly-owned subsidiary of Legg Mason, Inc. (Legg Mason). In February 2020, Franklin Templeton and Legg Mason announced that they had entered into an agreement under which Franklin Templeton would acquire Legg Mason and its affiliates, including Western Asset. The transaction closed on July 31, 2020, and Western Asset continues to maintain its organizational autonomy and investment independence.

Portfolio Management.

SIMC

Compensation. SIMC compensates each portfolio manager for his or her management of the Funds. Each portfolio manager’s compensation consists of a fixed annual salary, plus a discretionary annual bonus determined generally as follows. Portfolio manager compensation is a combination of both Fund performance and SEI/Company performance. A majority of each portfolio manager’s compensation is determined by the performance of the Funds for which the portfolio manager is responsible for over both a short-term and long-term time horizon. A final factor is a discretionary component, which is based upon a qualitative review of the portfolio managers and their team.

Ownership of Fund Shares. As of September 30, 2020, the portfolio managers beneficially owned shares of the Funds they manage (which may be through their 401(k) plans), as follows:

Portfolio Manager	Dollar Range of Fund Shares
Steve Treftz, CFA	None
James Smigiel	\$500,001-\$1,000,000

Other Accounts. As of September 30, 2020, in addition to the Funds, the portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Steven Treftz, CFA	4	\$3,689	2	\$882	0	\$ 0
James Smigiel	2	\$2,658	0	\$ —	22	\$6,887

No account listed above is subject to a performance-based advisory fee.

Conflicts of Interest. The portfolio managers’ management of registered investment companies, other pooled investment vehicles or other accounts may give rise to actual or potential conflicts of interest in connection with their day-to-day management of the Funds’ investments. The other accounts might have similar investment objectives as the Funds or hold, purchase or sell securities that are eligible to be held, purchased or sold by the Funds.

While the portfolio managers' management of the other accounts may give rise to the following potential conflicts of interest, SIMC does not believe that the conflicts, if any, are material or, to the extent any such conflicts are material, SIMC believes that it has designed policies and procedures that reasonably manage such conflicts in an appropriate way.

Knowledge of the Timing and Size of Fund Trades. A potential conflict of interest may arise as a result of the portfolio managers' day-to-day oversight of the Funds. Because of their positions with the Funds, the portfolio managers know the size, timing and possible market impact of Fund trades. It is theoretically possible that the portfolio managers could use this information to the advantage of the other accounts and to the possible detriment of the Funds. However, SIMC has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time.

Investment Opportunities. A potential conflict of interest may arise as a result of the portfolio managers' management of the Funds and the other accounts, which, in theory, may allow them to allocate investment opportunities in a way that favors the other accounts over the Funds. This conflict of interest may be exacerbated to the extent that SIMC or the portfolio managers receive, or expect to receive, greater compensation from their management of the other accounts than the Funds. Notwithstanding this theoretical conflict of interest, it is SIMC's policy to manage each account based on its investment objectives and related restrictions and, as discussed above, SIMC has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time and in a manner consistent with each account's investment objectives and related restrictions. For example, while the portfolio managers may buy for other accounts securities that differ in identity or quantity from securities bought for the Funds, such an approach might not be suitable for the Funds given their investment objectives and related restrictions.

AllianceBernstein

Compensation. AllianceBernstein's compensation program for portfolio managers is designed to be competitive and effective in order to attract and retain the highest caliber employees.

Portfolio managers receive base compensation, incentive compensation and contributions to AllianceBernstein's 401(k) plan. Part of the annual incentive compensation is generally paid in the form of a cash bonus and part through an award under the firm's Incentive Compensation Award Plan (ICAP). The ICAP awards vest over a four-year period. Deferred awards are in the form of restricted grants of the firm's equity units, and award recipients have the ability to receive a portion of their awards in deferred cash. On an annual basis, the firm endeavors to combine all of the foregoing elements into a total compensation package that considers industry compensation trends and is designed to retain its best talent.

Total compensation is determined by quantitative and qualitative factors. Quantitative factors, which are weighted more heavily, are driven by investment performance. Qualitative factors are driven by portfolio managers' contributions to the investment process and client success.

The quantitative component includes measures of absolute, relative and risk-adjusted investment performance. Relative and risk-adjusted returns are determined based on the benchmark in the fund's prospectus and versus peers over one-, three- and five-year calendar periods, with more weight given to longer time periods. Peer groups are chosen by investment CIOs, who consult with the product management team to identify products most similar to our investment style and most relevant within the asset class.

The qualitative component incorporates the manager's contribution to the overall investment process and our clients' success. Among the important aspects are: thought leadership, collaboration with other investment professionals at the firm, contributions to risk-adjusted returns in other portfolios, building a strong talent pool, mentoring newer investment professionals, and being a good corporate citizen. Other factors can play a part in determining portfolio managers' compensation, including complexity of investment strategies managed, volume of assets managed and experience.

Assessments of investment professionals are formalized in a year-end review process that includes 360-degree feedback from other professionals from across the investment teams and firm.

Contributions under AllianceBernstein's Profit Sharing/401(k) Plan: The contributions are based on AllianceBernstein's overall profitability. The amount and allocation of the contributions are determined at the sole discretion of AllianceBernstein.

Ownership of Fund Shares. As of September 30, 2020, AllianceBernstein's portfolio managers did not beneficially own any shares of the Multi-Asset Inflation Managed and Multi-Asset Capital Stability Funds.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Inflation Managed and Multi-Asset Capital Stability Funds, AllianceBernstein's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Michael Canter, PhD	21	\$ 9,506	26	\$ 3,780	109	\$ 5,918
	0	\$ 0	0	\$ 0	3*	\$ 558
Dimitri Silva, CFA	35	\$19,141	84	\$ 5,862	143	\$18,946
	0	\$ 0	0	\$ 0	3*	\$ 1,575

Janaki Rao	21	\$ 9,506	26	\$ 3,780	109	\$ 5,918
	0	\$ 0	0	\$ 0	3*	\$ 558
Leon Zhu, CFA**	2	\$ 43	0	\$ 0	0	\$ 0
Daniel Loewy, CFA**	80	\$10,825	269	\$40,021	101	\$18,360
	0	\$ 0	0	\$ 0	1	\$ 6

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

** None of these accounts are subject to a performance-based advisory fee.

Conflicts of Interest. AllianceBernstein has developed policies and procedures (including oversight monitoring) reasonably designed to detect, manage and mitigate the effects of actual or potential conflicts of interest in the area of employee personal trading, managing multiple accounts for multiple clients, including AllianceBernstein Mutual Funds, and allocating investment opportunities. Investment professionals, including portfolio managers and research analysts, are subject to the above-mentioned policies and oversight monitoring to ensure that all clients are treated equitably.

Employee Personal Trading. AllianceBernstein has adopted a Code of Business Conduct and Ethics that is designed to detect and prevent conflicts of interest when investment professionals and other personnel of AllianceBernstein own, buy or sell securities that may be owned by, or bought or sold for, clients. Personal securities transactions by an employee may raise a potential conflict of interest when an employee owns or trades in a security that is owned or considered for purchase or sale by a client or recommended for purchase or sale by an employee to a client. Subject to the reporting requirements and other limitations of its Code of Business Conduct and Ethics, AllianceBernstein permits its employees to engage in personal securities transactions and also allows them to acquire investments in the AllianceBernstein Mutual Funds. AllianceBernstein's Code of Business Conduct and Ethics requires disclosure of all personal accounts and maintenance of brokerage accounts with designated broker-dealers approved by AllianceBernstein. The Code of Business Conduct and Ethics also requires pre-clearance of all securities transactions (except transactions in open-end mutual funds) and imposes a 60-day holding period for securities purchased by employees to discourage short-term trading.

Managing Multiple Accounts for Multiple Clients. The investment professional team that manages the Multi-Asset Inflation Managed and Multi-Asset Capital Stability Funds may have responsibility for managing all or a portion of the investments of multiple accounts with a common investment strategy, including other registered investment companies, unregistered investment vehicles such as hedge funds, pension plans, separate accounts, collective trusts and charitable foundations. Potential conflicts of interest may arise when an investment professional has responsibilities for the investments of more than one account because the investment professional may be unable to devote equal time and attention to each account. Accordingly, AllianceBernstein has compliance policies and oversight monitoring in place to address these conflicts. Among other things, AllianceBernstein's policies and procedures provide for the prompt dissemination to investment professionals of initial or changed investment recommendations by analysts so that investment professionals are better able to develop investment strategies for all accounts they manage. In addition, investment decisions by investment professionals are reviewed for the purpose of maintaining uniformity among similar accounts and ensuring that accounts are treated equitably. No investment professional that manages client accounts carrying performance fees is compensated directly or specifically for the performance of those accounts. Investment professional compensation reflects a broad contribution in multiple dimensions to long-term investment success for the clients and is not tied specifically to the performance of any particular client's account, nor is it directly tied to the level or change in the level of assets under management.

Allocating Investment Opportunities. In addition, the investment professionals may have to decide how to select and allocate investment opportunities among accounts. Portfolio holdings, position sizes and industry and sector exposures tend to be similar across similar accounts, which minimizes the potential for conflicts of interest. Nevertheless, investment opportunities may be allocated differently among accounts due to the particular characteristics of an account, such as size of the account, cash position, tax status, risk tolerance and investment restrictions or for other reasons. Potential conflicts of interest may also occur when AllianceBernstein has a particular financial incentive, such as a performance-based management fee, relating to an account. An investment professional may perceive that he or she has an incentive to devote more time to developing and analyzing investment strategies and opportunities or allocating securities preferentially to the account for which AllianceBernstein could share in investment gains. As noted above, AllianceBernstein has policies and procedures designed to ensure that information relevant to investment decisions is disseminated promptly within its portfolio management teams and investment opportunities are allocated equitably among different clients.

AQR

Compensation. SIMC pays AQR a fee based on the assets under management of the Multi-Asset Accumulation Fund (and its Subsidiary) as set forth in an investment sub-advisory agreement between AQR and SIMC. AQR pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Accumulation Fund (and its Subsidiary). The following information relates to the period ended September 30, 2020.

As Principals of AQR, AQR's portfolio managers are compensated in the form of distributions based on the net income generated by AQR and each Principal's relative ownership in AQR. Net income distributions are a function of assets under management and performance of the funds and accounts managed by AQR. A Principal's relative ownership in AQR is based on cumulative research, leadership and other contributions to AQR. There is no direct linkage between assets under management, performance and compensation. However, there is an indirect linkage in that superior performance tends to attract assets and thus increase revenues. Each portfolio manager is also eligible to participate in AQR's 401(k) retirement plan which is offered to all employees of AQR.

Ownership of Fund Shares. As of September 30, 2020, AQR's portfolio managers did not beneficially own any shares of the Multi-Asset Accumulation Fund (or its Subsidiary).

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Accumulation Fund (and its Subsidiary), AQR's portfolio managers were responsible for day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in billions)	Number of Accounts	Total Assets (in billions)	Number of Accounts	Total Assets (in billions)
Michael A. Mendelson, M.B.A., S.M.	4	\$ 3.128	24	\$ 8.989	1	\$ 0.297
	0	\$ 0	21*	\$ 8.252	0	\$ 0
Yao Hua Ooi	15	\$ 8.397	30	\$10.172	1	\$ 0.297
	0	\$ 0	28*	\$ 9.434	0	\$ 0
John J. Huss	4	\$ 3.128	23	\$11.584	1	\$ 0.297
	0	\$ 0	21*	\$10.846	0	\$ 0
Ronen Israel, M.A.	48	\$21.742	42	\$10.156	34	\$18.237
	1*	\$ 0.121	38*	\$ 8.593	12*	\$ 7.325
Lars N. Nielsen, M.Sc.	43	\$20.407	42	\$10.156	34	\$18.237
	1*	\$ 0.121	38*	\$ 8.593	12*	\$ 7.325

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

Conflicts of Interest. Each of the portfolio managers is also responsible for managing other accounts in addition to the Multi-Asset Accumulation Fund (and its Subsidiary), including other accounts of AQR or its affiliates. Other accounts may include, without limitation, separately managed accounts for foundations, endowments, pension plans, and high net-worth families; registered investment companies; unregistered investment companies relying on either Section 3(c)(1) or Section 3(c)(7) of the 1940 Act (such companies are commonly referred to as “hedge funds”); foreign investment companies; and may also include accounts or investments managed or made by the portfolio managers in a personal or other capacity (“Proprietary Accounts”). Management of other accounts in addition to the Multi-Asset Accumulation Fund (and its Subsidiary) can present certain conflicts of interest, as described below.

From time to time, potential conflicts of interest may arise between a portfolio manager's management of the investments of the Multi-Asset Accumulation Fund (and/or its Subsidiary), on the one hand, and the management of other accounts (including for purpose of this discussion, other funds and Proprietary Accounts), on the other. The other accounts might have similar investment objectives or strategies as the Multi-Asset Accumulation Fund (and its Subsidiary), or otherwise hold, purchase, or sell securities that are eligible to be held, purchased or sold by the Multi-Asset Accumulation Fund (and/or its Subsidiary). Because of their positions with the Multi-Asset Accumulation Fund (and its Subsidiary), the portfolio managers know the size, timing and possible market impact of the Multi-Asset Accumulation Fund's (and its Subsidiary's) trades. A potential conflict of interest exists where portfolio managers could use this information to the advantage of other accounts they manage and to the possible detriment of the Multi-Asset Accumulation Fund (and/or its Subsidiary's).

A number of potential conflicts of interest may arise as a result of AQR's or the portfolio manager's management of a number of accounts with similar investment strategies. Often, an investment opportunity may be suitable for the Multi-Asset Accumulation Fund (and/or its Subsidiary) and other accounts managed by AQR, but may not be available in sufficient quantities for the Multi-Asset Accumulation Fund (and/or its Subsidiary) and the other accounts to participate fully. Similarly, there may be limited opportunity to sell an investment held by the Multi-Asset Accumulation Fund (and/or its Subsidiary) and another account. In circumstances where the amount of total exposure to a strategy or investment type across accounts is, in the opinion of AQR, capacity constrained, the availability of the strategy or investment type for the Multi-Asset Accumulation Fund (and/or its Subsidiary) and other accounts may be reduced in AQR's discretion.

The Multi-Asset Accumulation Fund (and/or its Subsidiary) may therefore have reduced exposure to a capacity constrained strategy or investment type, which could adversely affect the Multi-Asset Accumulation Fund's return. AQR is not obligated to allocate capacity pro rata and may take its financial interests into account when allocating capacity among the Multi-Asset Accumulation Fund (and/or its Subsidiary) and other accounts.

Another conflict could arise where different account guidelines and/or differences within particular investment strategies lead to the use of different investment practices for portfolios with a similar investment strategy. AQR will not necessarily purchase or sell the same instruments at the same time or in the same direction (particularly if different accounts have different strategies), or in the same proportionate amounts for all eligible accounts (particularly if different accounts have materially different amounts of capital under management by AQR, different amounts of investable cash available, different investment restrictions, or different risk tolerances). As a result, although AQR manages numerous accounts and/or portfolios with similar or identical investment objectives, or may manage accounts with different objectives that trade in the same instruments, the portfolio decisions relating to these accounts, and the performance resulting from such decisions, may differ from account to account. AQR may, from time to time, implement new trading strategies or participate in new trading strategies for some but not all accounts, including the Multi-Asset Accumulation Fund (and/or its Subsidiary). Strategies may not be implemented in the same manner among accounts where they are employed, even if the strategy is consistent with the objectives of such accounts. In certain circumstances, investment opportunities that are in limited supply and/or have limited return potential in light of administrative costs of pursuing such investments (e.g., IPOs) are only allocated to accounts where the given opportunity is more closely aligned with the applicable strategy and/or trading approach.

Whenever decisions are made to buy or sell investments by the Multi-Asset Accumulation Fund (and/or its Subsidiary) and one or more other accounts simultaneously, AQR or the portfolio managers may aggregate the purchases and sales of the investments and will allocate the investment transactions in a manner that it believes to be equitable under the circumstances. To this end, AQR has adopted policies and procedures that are intended to ensure that investment opportunities are allocated equitably among accounts over time. As a result of the allocations, there may be instances where the Multi-Asset Accumulation Fund (and/or its Subsidiary) will not participate in a transaction that is allocated among other accounts or the Multi-Asset Accumulation Fund (and/or its Subsidiary) may not be allocated the full amount of the investments sought to be traded. These aggregation and allocation policies could have a detrimental effect on the price or amount of the investments available to the Multi-Asset Accumulation Fund (and/or its Subsidiary) from time to time. Subject to applicable laws and/or account restrictions, AQR may buy, sell or hold securities for other accounts while entering into a different or opposite investment decision for the Multi-Asset Accumulation Fund (and/or its Subsidiary).

To the extent that the Multi-Asset Accumulation Fund (and/or its Subsidiary) holds interests in an issuer that are different (or more senior or junior) than, or potentially adverse to, those held by other accounts, AQR may be presented with investment decisions where the outcome would benefit one account and would not benefit or would harm the other account. This may include, but is not limited to, an account investing in a different security of an issuer's capital structure than another account, an account investing in the same security but on different terms than another account, an account obtaining exposure to an investment using different types of securities or instruments than another account, an account engaging in short selling of securities that another account holds long, an account voting securities in a different manner than another account, and/or an account acquiring or disposing of its interests at different times than another account. This could have a material adverse effect on, or in some instances could benefit, one or more of such accounts, including accounts that are affiliates of AQR, accounts in which AQR has an interest, or accounts which pay AQR higher fees or a performance fee. These transactions or investments by one or more accounts could dilute or otherwise disadvantage the values, prices, or investment strategies of such accounts. When AQR, on behalf of an account, manages or implements a portfolio decision ahead of, or contemporaneously with, portfolio decisions of another account, market impact, liquidity constraints,

or other factors could result in such other account receiving less favorable pricing or trading results, paying higher transaction costs, or being otherwise disadvantaged. In addition, in connection with the foregoing, AQR, on behalf of an account, is permitted to pursue or enforce rights or actions, or refrain from pursuing or enforcing rights or actions, with respect to a particular issuer in which action could materially adversely affect such other account.

In addition, when the Multi-Asset Accumulation Fund (and/or its Subsidiary) and other accounts hold investments in the same issuer (including at the same place in the capital structure), the Multi-Asset Accumulation Fund (and/or its Subsidiary) may be prohibited by applicable law from participating in restructurings, work-outs or other activities related to its investment in the issuer. As a result, the Multi-Asset Accumulation Fund (and/or its Subsidiary) may not be permitted by law to make the same investment decisions as other accounts in the same or similar situations even if AQR believes it would be in the Multi-Asset Accumulation Fund's (and/or its Subsidiary) best economic interests to do so. The Multi-Asset Accumulation Fund (and/or its Subsidiary) may be prohibited by applicable law from investing in an issuer (or an affiliate) that other accounts are also investing in or currently invest in even if AQR believes it would be in the best economic interests of the Multi-Asset Accumulation Fund (and/or its Subsidiary) to do so. Furthermore, entering into certain transactions that are not deemed prohibited by law when made may potentially lead to a condition that raises regulatory or legal concerns in the future. This may be the case, for example, with issuers that AQR considers to be at risk of default and restructuring or work-outs with debt holders, which may include the Multi-Asset Accumulation Fund (and/or its Subsidiary) and other accounts. In some cases, to avoid the potential of future prohibited transactions, AQR may avoid allocating an investment opportunity to the Multi-Asset Accumulation Fund (and/or its Subsidiary) that it would otherwise recommend, subject to AQR's then-current allocation policy and any applicable exemptions. In certain circumstances, AQR may be restricted from transacting in a security or instrument because of material non-public information received in connection with an investment opportunity that is offered to an affiliate of AQR.

AQR and the Multi-Asset Accumulation Fund's portfolio managers may also face a conflict of interest where some accounts pay higher fees to AQR than others, as they may have an incentive to favor accounts with the potential for greater fees. For instance, the entitlement to a performance fee in managing one or more accounts may create an incentive for AQR to take risks in managing assets that it would not otherwise take in the absence of such arrangements. Additionally, since performance fees reward AQR for performance in accounts which are subject to such fees, AQR may have an incentive to favor these accounts over those that have only fixed asset-based fees with respect to areas such as trading opportunities, trade allocation, and allocation of new investment opportunities.

AQR has implemented specific policies and procedures (e.g., a code of ethics and trade allocation policies) that seek to address potential conflicts of interest that may arise in connection with the management of the Multi-Asset Accumulation Fund (and its Subsidiary) and other accounts and that are designed to ensure that all accounts, including the Multi-Asset Accumulation Fund (and/or its Subsidiary), are treated fairly and equitably over time.

Columbia Management

Compensation. SIMC pays Columbia Management a fee based on the assets under management of the Inflation Commodity Strategy Subsidiary Ltd., a wholly owned subsidiary of the Multi-Asset Inflation Managed Fund, as set forth in an investment sub-advisory agreement between Columbia Management and SIMC. Columbia Management pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Inflation Commodity Strategy Subsidiary Ltd. The following information relates to the period ended September 30, 2020.

Columbia Management:

Except as otherwise indicated below, the following pertains to both Columbia Management and Threadneedle.

Direct compensation is typically comprised of a base salary (that for Threadneedle also includes a fixed role-based allowance paid monthly), and an annual incentive award that is paid either in the form of a cash bonus if the size of the award is under a specified threshold, or, if the size of the award is over a specified threshold, the award is paid in a combination of a cash bonus, an equity incentive award and deferred compensation. For Threadneedle, deferred compensation is fund-linked and is compliant with European regulatory requirements in its structure and delivery vehicles. Equity incentive awards are made in the form of Ameriprise Financial restricted stock, or for more senior employees, both Ameriprise Financial restricted stock and stock options. The investment return credited on deferred compensation is based on the performance of specified funds for Columbia Management and specified Threadneedle funds for Threadneedle, in most cases including the funds the portfolio manager manages.

Base salary is typically determined based on market data relevant to the employee's position, as well as other factors including internal equity. Base salaries are reviewed annually, and increases are typically given as promotional increases, internal equity adjustments, or market adjustments.

Annual Incentive Awards.

For Columbia Management, annual incentive awards for investment professionals are discretionary, and the amount of incentive awards for investment team members is variable based on (1) an evaluation of the investment performance of the investment team of which the investment professional is a member, reflecting the performance (and client experience) of the funds or accounts the investment professional manages and, if applicable, reflecting the individual's work as an investment research analyst, (2) the results of a peer and/or management review of the individual, taking into account attributes such as team participation, investment process followed, communications, and leadership, and (3) the amount of aggregate funding of the plan determined by senior management of Columbia Threadneedle Investments and Ameriprise Financial, which takes into account Columbia Threadneedle Investments revenues and profitability, as well as Ameriprise Financial profitability, historical plan funding levels and other factors. Columbia Threadneedle Investments revenues and profitability are largely determined by assets under management. In determining the allocation of incentive compensation to investment teams, the amount of assets and related revenues managed by the team is also considered. Individual awards are subject to a comprehensive risk adjustment review process to ensure proper reflection in remuneration of adherence to our controls and Code of Conduct.

Investment performance for a fund or other account is measured using a scorecard that compares account performance against benchmarks and/or peer groups. Account performance may also be compared to unaffiliated passively managed ETFs, taking into consideration the management fees of comparable passively managed ETFs, when available and as determined by Columbia Management. Consideration is given to relative performance over the one-, three- and five-year periods, with the largest weighting on the three-year comparison. For individuals and teams that manage multiple strategies and accounts, relative asset size is a key determinant in calculating the aggregate score, with weighting typically proportionate to actual assets. For investment leaders who have group management responsibilities, another factor in their evaluation is an assessment of the group's overall investment performance. Exceptions to this general approach to bonuses exist for certain teams and individuals.

Equity incentive awards are designed to align participants' interests with those of the shareholders of Ameriprise Financial. Equity incentive awards vest over multiple years, so they help retain employees.

Deferred compensation awards are designed to align participants' interests with the investors in the Columbia Funds and other accounts they manage. The value of the deferral account is based on the performance of Columbia Funds. Employees have the option of selecting from various Columbia Funds for their deferral account, however Columbia Management portfolio managers must (other than by strict exception) allocate a minimum of 25% of their incentive awarded through the deferral program to the Columbia Fund(s) they manage. Deferrals vest over multiple years, so they help retain employees.

For all employees the benefit programs generally are the same and are competitive within the financial services industry. Employees participate in a wide variety of plans, including options in Medical, Dental, Vision, Health Care and Dependent Spending Accounts, Life Insurance, Long Term Disability Insurance, 401(k), and a cash balance pension plan.

Threadneedle:

For Threadneedle, annual incentive awards and pool funding are variable and are designed to reward:

- Investment performance, both at the individual and team levels
- Client requirements, in particular the alignment with clients through a mandatory deferral into the company's own products, compliant with local regulation, in particular the UCITS V requirements.
- Team cooperation and values

Individual awards are subject to a comprehensive risk adjustment review process to ensure proper reflection in remuneration of adherence to Threadneedle's controls and Code of Conduct.

Scorecards are used to measure performance of Threadneedle funds and other accounts managed by the Threadneedle employee. Performance is measured versus peer or benchmark performance as appropriate, in addition to performance compared to unaffiliated passively managed ETFs, taking into consideration the management fees of comparable passively managed ETFs, when available and as determined by Threadneedle. Performance is measured using 1-year, 3-year, and 5-year performance, weighted 10% on the 1-year, 60% on the 3-year, and 30% on the 5-year. Consideration may also be given to performance in managing client assets in sectors and industries assigned to the employee as part of his/her investment team responsibilities, where applicable.

Incentive compensation for senior investment professionals is subject to a minimum 40% deferral as required by local regulation, rising to 60% for higher awards. Half of that deferred portion is delivered in units linked to the performance of Threadneedle funds and the remainder through Ameriprise Financial equity plans.

The equity portion of those deferred incentive awards is designed to align participants' interests with those of the shareholders of Ameriprise Financial. Equity incentive awards vest over multiple years, so they help retain employees.

The fund-linked deferred compensation awards are designed to align participants' interests with the investors in the funds and other accounts they manage, and to incentivize collaboration and idea-sharing across teams and products. The value of the deferral account is based on the performance of those funds. Employees have the option of selecting from various internal funds for their fund deferral account; a portion of this deferral is subject to mandatory allocation to Threadneedle's multi-asset funds to drive cross-business idea sharing and alignment. Fund-linked deferrals vest over multiple years, so they help to retain employees and to align their longer-term interests with those of the investor in line with local regulatory best practice.

Exceptions to this general approach to bonuses exist for certain teams and individuals. Funding for the bonus pool is determined by management and overseen by the EMEA Remuneration Committee, and depends on, among other factors, the levels of compensation generally in the investment management industry taking into account investment performance (based on market compensation data) and both Ameriprise Financial and the asset management business profitability for the year, which is largely determined by assets under management.

For all employees the benefit programs generally are the same and are competitive within the financial services industry. Employees participate in a wide variety of plans, including options in Medical, Health Care, Life Insurance, Long Term Disability Insurance, and retirement savings plans.

Ownership of Fund Shares. As of September 30, 2020, Threadneedle's portfolio managers did not beneficially own any shares of the Inflation Commodity Strategy Subsidiary Ltd.

Other Accounts. As of September 30, 2020, in addition to the Inflation Commodity Strategy Subsidiary Ltd., Threadneedle's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
David Donora	1	\$356.3	0	\$0	2	\$151.5
Nicholas Robin	1	\$356.3	0	\$0	2	\$151.5

Conflicts of Interest. Conflicts of interest may arise as a result of the portfolio managers being responsible for multiple accounts, which may have different investment guidelines and objectives. Certain of these conflicts of interest are summarized below.

In addition to the Inflation Commodity Strategy Subsidiary Ltd., other accounts managed by the portfolio managers may include accounts of registered investment companies, private pooled investment vehicles and other accounts. In particular, a conflict of interest may arise as a result of the management of the Inflation Commodity Strategy Subsidiary Ltd. and other accounts, which, in theory, may allow portfolio managers to allocate investment opportunities in a way that favors other accounts over the Inflation Commodity Strategy Subsidiary Ltd. The management of accounts with different advisory fee rates and/or fee structures, including accounts that pay advisory fees based on account performance, may raise potential conflicts of interests by creating an incentive to favor higher fee accounts. Columbia Management and Threadneedle (or their members, employees and affiliates) may give advice or take action with respect to the other accounts that differs from the advice given with respect to the Inflation Commodity Strategy Subsidiary Ltd. To the extent a particular investment is suitable for both the Inflation Commodity Strategy Subsidiary Ltd. and the other accounts, such investments will be allocated between the Inflation Commodity Strategy Subsidiary Ltd. and the other accounts in a manner that the portfolio managers determine is fair and equitable under the circumstances to all clients, including the Inflation Commodity Strategy Subsidiary Ltd.

To address and manage these potential conflicts of interest, Columbia Management and Threadneedle have adopted compliance policies and procedures to allocate investment opportunities and to ensure that each of their clients is treated on a fair and equitable basis.

Credit Suisse

Compensation. SIMC pays CSAM, LLC a fee based on the assets under management of the Inflation Commodity Strategy Subsidiary Ltd., a wholly owned subsidiary of the Multi-Asset Inflation Managed Fund, as set forth in an investment sub-advisory agreement between CSAM, LLC and SIMC. CSAM, LLC pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Inflation Commodity Strategy Subsidiary Ltd. The following information relates to the period ended September 30, 2020.

The compensation to portfolio managers at CSAM, LLC includes both a fixed base salary component and bonus component. The discretionary bonus for each portfolio manager is not tied by formula to the performance of any fund or account. The factors taken into account in determining a portfolio manager's bonus include the Inflation Commodity Strategy Subsidiary Ltd.'s performance, assets held in the Inflation Commodity Strategy Subsidiary Ltd., and other accounts managed by the portfolio managers, business growth, team work, management, corporate citizenship, etc.

Ownership of Fund Shares. As of September 30, 2020, CSAM, LLC's portfolio managers did not beneficially own any shares of the Inflation Commodity Strategy Subsidiary Ltd.

Other Accounts. As of September 30, 2020, in addition to the Inflation Commodity Strategy Subsidiary Ltd., Credit Suisse's portfolio managers were equally responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Christopher Burton, CFA . . .	5	\$2,444.00	7	\$1,953.00	5	\$1,493.00
	0	\$ 0	1*	\$ 26.00	0	\$ 0
Bryant Lie, CFA	5	\$2,444.00	7	\$1,953.00	5	\$1,493.00
	0	\$ 0	1*	\$ 26.00	0	\$ 0

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

Conflicts of Interest. It is possible that conflicts of interest may arise in connection with the portfolio managers' management of the Inflation Commodity Strategy Subsidiary Ltd.'s investments on the one hand and the investments of other accounts on the other. For example, the portfolio managers may have conflicts of interest in allocating management time, resources and investment opportunities among the Inflation Commodity Strategy Subsidiary Ltd. and other accounts they advise, which may include accounts of registered investment companies, private pooled investment vehicles and other accounts. In addition, due to differences in the investment strategies or restrictions between the Inflation Commodity Strategy Subsidiary Ltd. and such other accounts, the portfolio managers may take action with respect to another account that differs from the action taken with respect to the Inflation Commodity Strategy Subsidiary Ltd. To the extent that a particular investment is suitable for both the Inflation Commodity Strategy Subsidiary Ltd. and such other accounts, such investment will be allocated in a manner that CSAM, LLC determines is fair and equitable under the circumstances for all clients, including the Inflation Commodity Strategy Subsidiary Ltd.

CSAM, LLC has adopted policies and procedures designed to minimize the effects of these conflicts and to ensure that that all clients are treated fairly and equitably in the allocation of investment opportunities.

GSAM

Compensation. SIMC pays GSAM a fee based on the assets under management of the Multi-Asset Income Fund as set forth in an investment sub-advisory agreement between GSAM and SIMC. GSAM pays its investment professionals out its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Income Fund. The following information relates to the period ended September 30, 2020.

Compensation for GSAM portfolio managers is comprised of a base salary and year-end discretionary variable compensation. The base salary is fixed from year to year. Year-end discretionary variable compensation is primarily a function of each portfolio manager's individual performance and his or her contribution to overall team performance, including in consideration of certain qualitative factors such as risk management, judgment, compliance and conduct; the performance of GSAM and Goldman Sachs; the team's net revenues for the past year which in part is derived from advisory fees, and for certain accounts, performance-based fees; and anticipated compensation levels among competitor firms. Portfolio managers are compensated, in part, for their delivery of investment performance, which is reasonably expected to meet or exceed the expectations of clients and fund shareholders in terms of: excess return over an applicable benchmark, peer group ranking, risk management and factors specific to certain funds such as yield or regional focus. Performance is judged over 1-, 3-, and 5-year time horizons.

The discretionary variable compensation for portfolio managers is also significantly influenced by: (1) effective participation in team research discussions and process; and (2) management of risk in alignment

with the targeted risk parameter and investment objective of the fund. Other factors may also be considered including: (1) general client/shareholder orientation and (2) teamwork and leadership. Portfolio managers may receive equity-based awards as part of their discretionary variable compensation.

Other Compensation—In addition to base salary and year-end discretionary variable compensation, the Firm has a number of additional benefits in place including (1) a 401k program that enables employees to direct a percentage of their salary and bonus income into a tax-qualified retirement plan; and (2) investment opportunity programs in which certain professionals may participate subject to certain eligibility requirements.

Ownership of Fund Shares. As of September 30, 2020, GSAM's portfolio managers did not beneficially own any shares of the Multi-Asset Income Fund.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Income Fund, GSAM's portfolio managers were responsible for day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Michael Swell	63	\$355,115	361	\$276,049	29,795	\$578,490
	0	\$ 0	27*	\$ 12,932	23*	\$ 12,023
Ron Arons, CFA	18	\$ 6,132	33	\$ 11,331	4,887	\$270,916
	0	\$ 0	4*	\$ 742	6*	\$ 1,844
Paul Seary, CFA	13	\$ 4,538	9	\$ 2,620	2,876	\$119,981
	0	\$ 0	2*	\$ 37	1*	\$ 211

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

Conflicts of Interest. The involvement of GSAM, Goldman Sachs and their affiliates in the management of, or their interest in, other accounts and other activities of Goldman Sachs will present conflicts of interest with respect to the Multi-Asset Income Fund and will, under certain circumstances, limit the Multi-Asset Income Fund's investment activities. Goldman Sachs is a worldwide full service investment banking, broker dealer, asset management and financial services organization and a major participant in global financial markets that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments, and high-net-worth individuals. As such, it acts as an investor, investment banker, research provider, investment manager, financier, advisor, market maker, trader, prime broker, derivatives dealer, lender, counterparty, agent and principal. In those and other capacities, Goldman Sachs and its affiliates advise clients in all markets and transactions and purchase, sell, hold and recommend a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for their own accounts or for the accounts of their customers, and have other direct and indirect interests, in the global fixed income, currency, commodity, equities, bank loan and other markets and the securities and issuers in which the Multi-Asset Income Fund may directly and indirectly invest. Thus, it is expected that the Multi-Asset Income Fund will have multiple business relationships with and will invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which Goldman Sachs and its affiliates perform or seek to perform investment banking or other services. GSAM and/or certain of its affiliates are the managers of the Goldman Sachs Funds. GSAM and its affiliates earn fees from this and other relationships with the Multi-Asset Income Fund. Although these fees are generally based on asset levels, the fees are not directly contingent on Multi-Asset Income Fund performance, and Goldman Sachs would still receive significant compensation from the Multi-Asset Income Fund even if shareholders lose money. Goldman Sachs and its affiliates engage in proprietary trading and advise accounts and funds which have investment objectives similar to those of the Multi-Asset Income Fund and/or which engage in and compete for transactions in the same types of securities, currencies and instruments as the Multi-Asset Income Fund. Goldman Sachs and its affiliates will not have

any obligation to make available any information regarding their activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the management of the Multi-Asset Income Fund. The results of the Multi-Asset Income Fund's investment activities, therefore, will likely differ from those of Goldman Sachs, its affiliates, and other accounts managed by Goldman Sachs, and it is possible that the Multi-Asset Income Fund could sustain losses during periods in which Goldman Sachs and its affiliates and other accounts achieve significant profits on their trading for proprietary or other accounts. In addition, the Multi-Asset Income Fund may enter into transactions in which Goldman Sachs or its affiliates or their other clients have an adverse interest. For example, the Multi-Asset Income Fund may take a long position in a security at the same time that Goldman Sachs and its affiliates or other accounts managed by GSAM take a short position in the same security (or vice versa). These and other transactions undertaken by Goldman Sachs, its affiliates or Goldman Sachs—advised clients may, individually or in the aggregate, adversely impact the Fund. Transactions by one or more Goldman Sachs—advised clients or GSAM may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of the Multi-Asset Income Fund. The Multi-Asset Income Fund's activities will, under certain circumstances, be limited because of regulatory restrictions applicable to Goldman Sachs and its affiliates, and/or their internal policies designed to comply with such restrictions. As a global financial services firm, Goldman Sachs and its affiliates also provide a wide range of investment banking and financial services to issuers of securities and investors in securities. Goldman Sachs, its affiliates and others associated with it are expected to create markets or specialize in, have positions in and/or effect transactions in, securities of issuers held by the Multi-Asset Income Fund, and will likely also perform or seek to perform investment banking and financial services for one or more of those issuers. Goldman Sachs and its affiliates are expected to have business relationships with and purchase or distribute or sell services or products from or to, distributors, consultants or others who recommend the Multi-Asset Income Fund or who engage in transactions with or for the Multi-Asset Income Fund.

Under a securities lending program approved by the Multi-Asset Income Fund's Board, the Multi-Asset Income Fund may retain an affiliate of GSAM to serve as the securities lending agent for the Multi-Asset Income Fund to the extent that the Multi-Asset Income Fund engages in the securities lending program. For these services, the lending agent may receive a fee from the Multi-Asset Income Fund, including a fee based on the returns earned on the Multi-Asset Income Fund's investment of the cash received as collateral for the loaned securities. The Board periodically reviews all portfolio securities loan transactions for which the affiliated lending agent has acted as lending agent. In addition, the Multi-Asset Income Fund may make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Multi-Asset Income Fund's portfolio investment transactions, in accordance with applicable law.

Janus

Compensation. SIMC pays Janus a fee based on the assets under management of the Multi-Asset Capital Stability Fund as set forth in an investment sub-advisory agreement between Janus and SIMC. The following information relates to the period ended September 30, 2020.

The portfolio managers and co-portfolio managers (if applicable) ("portfolio manager" or "portfolio managers") are compensated for managing a Fund and any other funds, portfolios, or accounts for which they have exclusive or shared responsibilities through two components: fixed compensation and variable compensation. Compensation (both fixed and variable) is determined on a pre-tax basis.

Fixed Compensation: Fixed compensation is paid in cash and is comprised of an annual base salary. The base salary is based on factors such as performance, scope of responsibility, skills, knowledge, experience, ability, and market competitiveness.

Variable Compensation: A portfolio manager's variable compensation is discretionary and is determined by investment team management. The overall investment team variable compensation pool is funded by an amount equal to a percentage of Janus Henderson's pre-incentive operating income. In determining individual awards, both quantitative and qualitative factors are considered. Such factors include, among other things, consistent short-term and long-term fund performance (*i.e.*, one-, three-, and

five-year performance), client support and investment team support through the sharing of ideas, leadership, development, mentoring, and teamwork.

Performance fees: The firm receives performance fees in relation to certain funds depending on outperformance of the fund against pre-determined benchmarks. Performance fees are shared directly with the investment professional in two instances; on a discretionary basis, if the fees were generated by one of five specific investment trusts, and on a formulaic basis, if there is a contractual agreement in place. The discretionary performance fee sharing incentives are funded from within the profit pools and subject to the same risk adjustment, review, and standard deferral arrangements that apply to the discretionary funding frameworks.

Deferrals/Firm Ownership: All employees are subject to Janus Henderson’s standard deferral arrangements which apply to variable incentive awards. Deferral rates apply to awards that exceed a minimum threshold, rates of deferral increase for larger incentive awards. Deferred awards vest in three equal instalments over a 3-year period and are delivered into JHG restricted stock and/or funds. Certain portfolio managers may be eligible to defer payment of a designated percentage of their fixed compensation and/or up to all of their variable compensation in accordance with JHG’s Executive Income Deferral Program.

Ownership of Fund Shares. As of September 30, 2020, Janus’ portfolio managers did not beneficially own any shares of the Multi-Asset Capital Stability Fund.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Capital Stability Fund, Janus’ portfolio manager was responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Ashwin Alankar, Ph.D.	4	\$646.86	3	\$46.66	12	\$626.36

Conflicts of Interest. Portfolio managers and investment personnel (for the purposes of this section, are together referred to as “portfolio managers”) generally manage other accounts, including accounts that may hold the same securities as or pursue investment strategies similar to the Funds. Those other accounts may include other Janus Henderson funds, private-label funds for which Janus or an affiliate serves as subadviser, separately managed accounts or other pooled investment vehicles, such as hedge funds, which may have different fee structures or rates than a Fund or may have a performance-based management fee. As such, fees earned by Janus or an affiliate vary among these accounts. Janus or an affiliate may also proprietarily invest in or provide seed capital to some but not all of these accounts. In addition, portfolio managers may personally invest in or provide seed capital to some but not all of these accounts, and certain of these accounts may have a greater impact on their compensation than others. Further, portfolio managers (or their family members) may beneficially own or transact in the same securities as those held in a Fund’s portfolio. Furthermore, Janus believes that conflicts arising from personal ownership by a portfolio manager (or their family members) of the same securities held in a Fund may be mitigated by the portfolio manager’s compliance with Janus’ personal trading policy within the Personal Code of Ethics. Certain portfolio managers also have roles as research analysts for Janus and receive compensation with respect to the analyst role. Certain portfolio managers also have roles with an affiliate of Janus, and provide advice on behalf of Janus through participating affiliate agreements, and receive compensation attributable to their role with the affiliate in addition to Janus. These factors could create conflicts of interest because a portfolio manager may have incentives to favor one or more accounts over others or one role over another in the allocation of time, resources, or investment opportunities and the sequencing of trades, resulting in the potential for the Fund to be disadvantaged if, for example, one or more accounts outperform the Fund. A conflict may arise if a portfolio manager identifies a limited investment opportunity that may be appropriate for a Fund, but the Fund is not able to take full advantage of that opportunity due to the need to allocate that opportunity among other accounts also managed by

the portfolio manager. A conflict may also arise if a portfolio manager executes transactions in one or more accounts that adversely impact the value of securities held by a Fund. Janus believes that these and other conflicts are mitigated by policies, procedures, and practices in place, including those governing personal trading, proprietary trading and seed capital deployment, aggregation and allocation of trades, allocation of limited offerings, cross trades, and best execution. In addition, Janus generally requires portfolio managers to manage accounts with similar investment strategies in a similar fashion, subject to a variety of exceptions, including, but not limited to, investment restrictions or policies applicable only to certain accounts, certain portfolio holdings that may be transferred in-kind when an account is opened, differences in cash flows and account sizes, and similar factors. Janus monitors accounts with similar strategies for any holdings, risk, or performance dispersion or unfair treatment. Janus (and its affiliates) generate trades throughout the day, depending on the volume of orders received from investment personnel, for all of its clients using trade system software. Trades are pre-allocated to individual clients and submitted to selected brokers via electronic files, in alignment with Janus' best execution policy. If an order is not completely filled, executed shares are allocated to client accounts in proportion to the order. In addition, Janus has adopted trade allocation procedures that govern allocation of securities among various Janus Henderson accounts.

Janus is the adviser to the Funds and the Janus "funds of funds," which are funds that invest primarily in other Janus Henderson funds. Because Janus is the adviser to the Janus "funds of funds" and the Funds, it is subject to certain potential conflicts of interest when allocating the assets of a Janus "fund of funds" among such Funds. For example, the Janus "funds of funds" investments have been and may continue to be a significant portion of the investments in other Janus Henderson funds, allowing Janus the opportunity to recoup expenses it previously waived or reimbursed for a Fund, or to reduce the amount of seed capital investment needed by Janus for the Janus Henderson funds. In addition, the Janus "funds of funds" portfolio manager, Ashwin Alankar, who also serves as Head of Global Asset Allocation of Janus Henderson Investors, has access to and regularly monitors certain information regarding the characteristics of the Funds, as well as knowledge of, and potential impact on, investment strategies and techniques of the Funds. Mr. Alankar may also be subject to conflicts of interest in allocating the Janus "funds of funds" assets among the Fund's and other investments since he serves as portfolio manager of Janus Henderson Adaptive Global Allocation Fund, which is an eligible investment for the Janus "funds of funds".

PanAgora

Compensation. SIMC pays PanAgora a fee based on the assets under management of the Multi-Asset Accumulation Fund (and its Subsidiary) as set forth in an investment sub-advisory agreement between PanAgora and SIMC. PanAgora pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Accumulation Fund. The following information relates to the period ended September 30, 2020.

All investment professionals receive industry competitive salaries (based on an annual benchmarking study) and are rewarded with meaningful performance-based annual bonuses. All employees of the firm are evaluated by comparing their performance against tailored and specific objectives. These goals are developed and monitored through the cooperation of employees and their immediate supervisors. Portfolio managers have specific goals regarding the investment performance of the accounts they manage and not revenue associated with these accounts. Long-term investment performance is typically assessed based on performance over multiple time periods against competitors or, for certain strategies, against other relevant investment benchmarks. Actual incentive compensation may be higher or lower than the target, based on individual, group, and subjective performance, and also reflect the performance of PanAgora as a firm. Such targets are reviewed each year to adjust for changes in responsibility and market conditions. Long-term investment performance is typically assessed based on performance over multiple time periods against competitors or, for certain strategies, against other relevant investment benchmarks. Actual incentive compensation may be higher or lower than the target, based on individual, group, and subjective performance, and also reflect the performance of PanAgora as a firm. Such targets are reviewed each year to adjust for changes in responsibility and market conditions.

Senior employees of the company can own up to 20% of the economic interest in PanAgora through restricted stocks and options under the provisions of the PanAgora Employees Ownership Plan. To ensure the retention benefit of the plan, the ownership is subject to a vesting schedule. The ownership is primarily shared by members of the senior management team as well as senior investment and research professionals.

Ownership of Fund Shares. As of September 30, 2020, PanAgora's portfolio managers did not beneficially own any shares of the Multi-Asset Accumulation Fund (or its Subsidiary).

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Accumulation Fund (and its Subsidiary), PanAgora's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Edward Qian, Ph.D., CFA . . .	3	\$287.96	105	\$11,938.81	23	\$2,782.97
	0	\$ 0	4*	\$ 165.17	0	\$ 0
Bryan Belton, CFA	3	\$287.96	105	\$11,938.81	23	\$2,757.46
	0	\$ 0	5*	\$ 165.17	0	\$ 0
Jonathon Beaulieu, CFA . . .	2	\$278.66	95	\$11,075.51	2	\$ 532.83
	0	\$ 0	2*	\$13,586.05	0	\$ 0

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

Conflicts of Interest. The portfolio managers' management of other accounts may give rise to potential conflicts of interest in connection with their management of Multi-Asset Accumulation Fund's (and its Subsidiary's) investments, on the one hand, and the investments of the other accounts, on the other. The other accounts include retirement plans and separately managed accounts, as well as incubated accounts. The other accounts might have similar investment objectives as the Multi-Asset Accumulation Fund (and its Subsidiary), or hold, purchase or sell securities that are eligible to be held, purchased or sold by the Multi-Asset Accumulation Fund (and its Subsidiary). While the portfolio managers' management of other accounts may give rise to the following potential conflicts of interest, PanAgora does not believe that the conflicts, if any, are material or, to the extent any such conflicts are material, PanAgora believes that it has designed policies and procedures to manage those conflicts in an appropriate way.

A potential conflict of interest may arise as a result of the portfolio managers' day-to-day management of the Multi-Asset Accumulation Fund (and its Subsidiary). Because of their positions with the Multi-Asset Accumulation Fund (and its Subsidiary), the portfolio managers know the size, timing and possible market impact of the Multi-Asset Accumulation Fund's (and its Subsidiary's) trades. It is theoretically possible that the portfolio managers could use this information to the advantage of other accounts they manage and to the possible detriment of the Multi-Asset Accumulation Fund (and its Subsidiary). However, PanAgora has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time.

A potential conflict of interest may arise as a result of the portfolio managers' management of the Multi-Asset Accumulation Fund (and its Subsidiary), and other accounts, which, in theory, may allow them to allocate investment opportunities in a way that favors other accounts over the Multi-Asset Accumulation Fund (and its Subsidiary). This conflict of interest may be exacerbated to the extent that PanAgora or the portfolio managers receive, or expect to receive, greater compensation from their management of the other accounts than the Multi-Asset Accumulation Fund (and its Subsidiary). Notwithstanding this theoretical conflict of interest, it is PanAgora's policy to manage each account based on its investment objectives and related restrictions and, as discussed above, PanAgora has adopted policies and procedures reasonably designed to allocate investment opportunities on a fair and equitable basis over time and in a manner

consistent with each account's investment objectives and related restrictions. For example, while the portfolio managers may buy for other accounts securities that differ in identity or quantity from securities bought for the Multi-Asset Accumulation Fund (and its Subsidiary), such securities might not be suitable for the Multi-Asset Accumulation Fund (and its Subsidiary) given its investment objective and related restrictions.

QS Investors

Compensation. SIMC pays QS Investors a fee based on the assets under management of the Multi-Asset Inflation Managed Fund as set forth in an investment sub-advisory agreement between QS Investors and SIMC. QS Investors pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Inflation Managed Fund. The following information relates to the period ended September 30, 2020.

Compensation for all investment professionals includes a combination of base salary and annual discretionary bonuses as well as generous benefits package made available to all employees on a non-discretionary basis. Specifically, the compensation package includes:

- Competitive base salaries;
- Individual discretionary bonuses based on the investment professional's added value to the products for which they are responsible. The analysis of an investment professional's individual performance is based on, among other things, the results of an annual management and internal peer review process, management's assessment of contributions to the investment team, the investment process and overall performance, and fund and other account performance. Other factors taken into consideration include the individual's contributions to model and investment process research, risk management, client service and new business development; and
- Corporate profit sharing.

Ownership of Fund Shares. As of September 30, 2020, QS Investors' portfolio managers did not beneficially own any shares of the Multi-Asset Inflation Managed Fund.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Inflation Managed Fund, QS Investors' portfolio managers were responsible for of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
Russell Shtern, CFA	12	\$2,279.7	5	\$273.6	5	\$251.70
Jacqueline Hurley, CFA . . .	17	\$2,327.1	7	\$346.5	7	\$ 167.2

None of the accounts listed above are subject to a performance-based advisory fee.

Conflicts of Interest. QS Investors maintains policies and procedures reasonably designed to detect and minimize potential conflicts of interest inherent in circumstances when a portfolio manager has day-to-day portfolio management responsibilities for multiple portfolios. Nevertheless, no set of policies and procedures can possibly anticipate or relieve all potential conflicts of interest. These conflicts may be real, potential, or perceived; certain of these conflicts are described in detail below.

Allocation of Limited Investment Opportunities. If a portfolio manager identifies a limited investment opportunity (including initial public offerings) that may be suitable for multiple funds and/or accounts, the investment opportunity may be allocated among these several funds or accounts, which may limit a client's ability to take full advantage of the investment opportunity, due to liquidity constraints or other factors.

QS Investors has adopted trade allocation procedures designed to ensure that allocations of limited investment opportunities are conducted in a fair and equitable manner between client accounts.

Nevertheless, investment opportunities may be allocated differently among client accounts due to the particular characteristics of an account, such as the size of the account, cash position, investment guidelines and restrictions or its sector/country/region exposure or other risk controls, or market restrictions.

Similar Investment Strategies. QS Investors and its portfolio management team may manage multiple portfolios with similar investment strategies. Investment decisions for each portfolio are generally made based on each portfolio's investment objectives and guidelines, cash availability, and current holdings. Purchases or sales of securities for the portfolios may be appropriate for other portfolios with like objectives and may be bought or sold in different amounts and at different times in multiple portfolios. In these cases, transactions are allocated to portfolios in a manner believed fair and equitable across client account portfolios by QS Investors methodology. Purchase and sale orders for a portfolio may be combined with those of other portfolios in the interest of achieving the most favorable net results for all clients.

Different Investment Strategies. QS Investors may manage long-short strategies alongside long-only strategies. As such, the potential exists for short sales of securities in certain portfolios while the same security is held long in one or more other portfolios. In an attempt to mitigate the inherent risks of simultaneous management of long-short and long-only strategies, QS Investors has established and implemented procedures to promote fair and equitable treatment of all portfolios. The procedures include monitoring and surveillance, supervisory reviews, and compliance oversight of short sale activity.

Differences in Financial Incentives. A conflict of interest may arise where the financial or other benefits available to a portfolio manager or an investment adviser differ among the funds and/or accounts under management. For example, when the structure of an investment adviser's management fee differs among the funds and/or accounts under its management (such as where certain funds or accounts pay higher management fees or performance-based management fees), a portfolio manager might be motivated to favor certain funds and/or accounts over others. Performance-based fees could also create an incentive for an investment adviser to make investments that are riskier or more speculative. In addition, a portfolio manager might be motivated to favor funds and/or accounts in which he or she or the investment adviser and/or its affiliates have a financial interest. Similarly, the desire to maintain or raise assets under management or to enhance the portfolio manager's performance record in a particular investment strategy or to derive other rewards, financial or otherwise, could influence a portfolio manager to lend preferential treatment to those funds and/or accounts that could most significantly benefit the portfolio manager.

QS Investors has established and implemented various policies and procedures to promote fair and equitable treatment and to manage these and other potential conflicts that may arise from differences in financial incentives. For example, in regard to the management of portfolios with performance-based fees, performance in portfolios with like strategies is regularly reviewed by management. In regard to conflicts associated with fund/manager selection, QS Investors employs an asset allocation process that is primarily quantitative, and certain investment decisions that could be deemed to result in conflicts of interest (e.g., initial allocations or substantial increases in allocations to funds or accounts managed by QS Investors) are subject to review and pre-approval by certain management and compliance personnel.

Personal Holdings and Transactions. Investment professionals employed by QS Investors may manage personal accounts in which they have a fiduciary interest with holdings similar to those of client accounts. QS Investors also allows its employees to trade in securities that it recommends to advisory clients. QS Investors purchasing, holding or selling the same or similar securities for client account portfolios and the actions taken by such individuals on a personal basis may differ from, or be inconsistent with, the nature and timing of advice or actions taken by QS Investors for its client accounts. QS Investors and its employees may also invest in mutual funds and other pooled investment vehicles that are managed by QS Investors. This may result in a potential conflict of interest since QS Investors' employees have knowledge of such funds' investment holdings, which is non-public information. QS Investors has implemented a Code of Ethics which is designed to address and mitigate the possibility that these professionals could place their own interests ahead of those of clients. The Code of Ethics addresses this potential conflict of interest by imposing pre-clearance and reporting requirements, blackout periods, supervisory oversight, and other measures designed to reduce conflict.

SSGA FM

Compensation. SIMC pays SSGA FM a fee based on the assets under management of the Multi-Asset Income Fund as set forth in the respective investment sub-advisory agreement between SSGA FM and SIMC. SSGA FM pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Income Fund. The following information relates to the period ended September 30, 2020.

SSGA FM's culture is complemented and reinforced by a total rewards strategy that is based on a pay for performance philosophy which seeks to offer a competitive pay mix of base salary, benefits, cash incentives and deferred compensation.

Salary is based on a number of factors, including external benchmarking data and market trends, State Street performance, SSGA FM performance, and individual overall performance. SSGA FM's Global Human Resources department regularly participates in compensation surveys in order to provide SSGA FM with market-based compensation information that helps support individual pay decisions.

Additionally, subject to State Street and SSGA FM business results, State Street allocates an incentive pool to SSGA FM to reward its employees. The size of the incentive pool for most business units is based on the firm's overall profitability and other factors, including performance against risk-related goals. For most SSGA FM investment teams, SSGA FM recognizes and rewards performance by linking annual incentive decisions for investment teams to the firm's or business unit's profitability and business unit investment performance over a multi-year period.

Incentive pool funding for most active investment teams is driven in part by the post-tax investment performance of fund(s) managed by the team versus the return levels of the benchmark index(es) of the fund(s) on a one-, three- and, in some cases, five-year basis. For most active investment teams, a material portion of incentive compensation for senior staff is deferred over a four-year period into the SSGA Long-Term Incentive ("SSGA LTI") program. For these teams, The SSGA LTI program indexes the performance of these deferred awards against the post-tax investment performance of fund(s) managed by the team. This is intended to align the investment team's compensation with client interests, both through annual incentive compensation awards and through the long-term value of deferred awards in the SSGA LTI program.

For the passive equity investment team, incentive pool funding is driven in part by the post-tax 1- and 3-year tracking error of the funds managed by the team against the benchmark indexes of the funds.

The discretionary allocation of the incentive pool to the business units within SSGA FM is influenced by market-based compensation data, as well as the overall performance of each business unit. Individual compensation decisions are made by the employee's manager, in conjunction with the senior management of the employee's business unit. These decisions are based on the overall performance of the employee and, as mentioned above, on the performance of the firm and business unit. Depending on the job level, a portion of the annual incentive may be awarded in deferred compensation, which may include cash and/or Deferred Stock Awards (State Street stock), which typically vest over a four-year period. This helps to retain staff and further aligns SSGA FM employees' interests with SSGA FM clients' and shareholders' long-term interests.

SSGA FM recognizes and rewards outstanding performance by:

- Promoting employee ownership to connect employees directly to the company's success.
- Using rewards to reinforce mission, vision, values and business strategy.
- Seeking to recognize and preserve the firm's unique culture and team orientation.
- Providing all employees the opportunity to share in the success of SSGA FM.

Ownership of Fund Shares. As of September 30, 2020, SSGA FM's portfolio managers did not beneficially own any shares of the Multi-Asset Income Fund.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Income Fund, SSGA FM's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in billions)	Number of Accounts	Total Assets (in billions)	Number of Accounts	Total Assets (in billions)
Karl Schneider, CAIA	138	\$623.01	388	\$634.61	388	\$420.44
Michael Feehily, CFA	138	\$623.01	388	\$634.61	388	\$420.44
Emiliano Rabinovich, CFA	138	\$623.01	388	\$634.61	388	\$420.44

None of the accounts listed above are subject to a performance-based advisory fee.

Conflicts of Interest. A portfolio manager that has responsibility for managing more than one account may be subject to potential conflicts of interest because he or she is responsible for other accounts in addition to the Funds. Those conflicts could include preferential treatment of one account over others in terms of: (a) the portfolio manager's execution of different investment strategies for various accounts; or (b) the allocation of resources or of investment opportunities.

Portfolio managers may manage numerous accounts for multiple clients. These accounts may include registered investment companies, other types of pooled accounts (e.g., collective investment funds), and separate accounts (i.e., accounts managed on behalf of individuals or public or private institutions). Portfolio managers make investment decisions for each account based on the investment objectives and policies and other relevant investment considerations applicable to that portfolio. A potential conflict of interest may arise as a result of the portfolio managers' responsibility for multiple accounts with similar investment guidelines. Under these circumstances, a potential investment may be suitable for more than one of the portfolio managers' accounts, but the quantity of the investment available for purchase is less than the aggregate amount the accounts would ideally devote to the opportunity. Similar conflicts may arise when multiple accounts seek to dispose of the same investment. The portfolio managers may also manage accounts whose objectives and policies differ from that of the Multi-Asset Income Fund. These differences may be such that under certain circumstances, trading activity appropriate for one account managed by the portfolio manager may have adverse consequences for another account managed by the portfolio manager. For example, an account may sell a significant position in a security, which could cause the market price of that security to decrease, while the fund maintained its position in that security.

A potential conflict may arise when the portfolio managers are responsible for accounts that have different advisory fees—the difference in fees could create an incentive for the portfolio manager to favor one account over another, for example, in terms of access to investment opportunities. Another potential conflict may arise when the portfolio manager has an investment in one or more accounts that participate in transactions with other accounts. His or her investment(s) may create an incentive for the portfolio manager to favor one account over another. SSGA FM has adopted policies and procedures reasonably designed to address these potential material conflicts. For instance, portfolio managers are normally responsible for all accounts within a certain investment discipline, and do not, absent special circumstances, differentiate among the various accounts when allocating resources. Additionally, SSGA FM and its advisory affiliates have processes and procedures for allocating investment opportunities among portfolios that are designed to provide a fair and equitable allocation.

Western Asset

Compensation. SIMC pays Western Asset a fee based on the assets under management of the Multi-Asset Income Fund as set forth in an investment sub-advisory agreement between Western Asset and SIMC. Western Asset pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Income Fund. The following information relates to the period ended September 30, 2020.

At Western Asset, one compensation methodology covers all products and functional areas, including portfolio managers. The firm's philosophy is to reward its employees through total compensation. Total compensation is reflective of the external market value for skills, experience, ability to produce results and the performance of one's group and the firm as a whole.

Discretionary bonuses make up the variable component of total compensation. These are structured to reward sector specialists for contributions to the firm as well as relative performance of their specific portfolios/product and are determined by the professional's job function and performance as measured by a formal review process.

For portfolio managers, the formal review process includes a thorough review of portfolios they were assigned to lead or with which they were otherwise involved and includes not only investment performance, but maintaining a detailed knowledge of client portfolio objectives and guidelines, monitoring of risks and performance for adherence to these parameters, execution of asset allocation consistent with current firm and portfolio strategy, and communication with clients. In reviewing investment performance, one-, three- and five-year annualized returns are measured against appropriate market peer groups and to each fund's benchmark index.

Ownership of Fund Shares. As of September 30, 2020, Western Asset's portfolio managers did not beneficially own any shares of the Multi-Asset Income Fund.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Income Fund, Western Asset's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
S. Kenneth Leech	100	\$173,937	226	\$80,090	635	\$225,473
	0	\$ 0	10*	\$ 1,425	25*	\$ 15,191
Mark S. Lindbloom	25	\$ 80,306	19	\$15,623	186	\$ 61,890
	0	\$ 0	0*	\$ 0	7*	\$ 4,969
Michael C. Buchanan, CFA	35	\$ 19,365	64	\$21,406	163	\$ 73,653
	0	\$ 0	5	\$ 775	10*	\$ 6,966

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

Conflicts of Interest. Potential conflicts of interest may arise in connection with the management of multiple accounts (including accounts managed in a personal capacity). Western Asset has adopted compliance policies and procedures to address a wide range of potential conflicts of interest that could directly impact the Multi-Asset Income Fund. These could include potential conflicts of interest related to the knowledge and timing of the Multi-Asset Income Fund's trades, investment opportunities and broker selection. Portfolio managers may be privy to the size, timing and possible market impact of the Multi-Asset Income Fund's trades.

It is possible that an investment opportunity may be suitable for both a portfolio and other accounts managed by a portfolio manager, but may not be available in sufficient quantities for both the portfolio and the other accounts to participate fully. Similarly, there may be limited opportunity to sell an investment held by a portfolio and another account. A conflict may arise where a portfolio manager may have an incentive to treat an account preferentially as compared to a portfolio because the account pays a performance-based fee or the portfolio manager, Western Asset or an affiliate has an interest in the account. Western Asset has adopted procedures for allocation of portfolio transactions and investment opportunities across multiple client accounts on a fair and equitable basis over time. All eligible accounts that can participate in a trade share the same price on a pro-rata allocation basis to ensure that no conflict of

interest occurs. Trades are allocated among similarly managed accounts to maintain consistency of portfolio strategy, taking into account cash availability, investment restrictions and guidelines and portfolio composition versus strategy.

With respect to securities transactions, Western Asset determines which broker or dealer to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as pooled investment vehicles that are not registered investment companies and other accounts managed for organizations and individuals), Western Asset may be limited by the client with respect to the selection of brokers or dealers or may be instructed to direct trades through a particular broker or dealer. In these cases, trades for a portfolio in a particular security may be placed separately from, rather than aggregated with, such other accounts. Having separate transactions with respect to a security may temporarily affect the market price of the security or the execution of the transaction, or both, to the possible detriment of a portfolio or the other account(s) involved. Additionally, the management of multiple portfolios and/or other accounts may result in a portfolio manager devoting unequal time and attention to the management of each portfolio and/or other account. Western Asset's team approach to portfolio management and block trading approach works to limit this potential risk.

Western Asset also maintains a gift and entertainment policy to address the potential for a business contact to give gifts or host entertainment events that may influence the business judgment of an employee. Employees are permitted to retain gifts of only a nominal value and are required to make reimbursement for entertainment events above a certain value. All gifts (except those of a de minimus value) and entertainment events that are given or sponsored by a business contact are required to be reported in a gift and entertainment log, which is reviewed on a regular basis for possible issues.

Employees of Western Asset have access to transactions and holdings information regarding client accounts and Western Asset's overall trading activities. This information represents a potential conflict of interest because employees may take advantage of this information as they trade in their personal accounts. Accordingly, Western Asset maintains a Code of Ethics that is compliant with Rule 17j-1 of the 1940 Act and Rule 204A-1 of the Investment Advisers Act of 1940 (the "Advisers Act") to address personal trading. In addition, the Code of Ethics seeks to establish broader principles of good conduct and fiduciary responsibility in all aspects of Western Asset's business. The Code of Ethics is administered by the Legal & Compliance Department and monitored through Western Asset's compliance monitoring program.

Western Asset may also face other potential conflicts of interest with respect to managing client assets, and the description above is not a complete description of every conflict of interest that could be deemed to exist. The firm also maintains a compliance monitoring program and engages independent auditors to conduct a SSAE 16/ISAE 3402 audit on an annual basis. These steps help to ensure that potential conflicts of interest have been addressed.

Western Asset Limited

Compensation. SIMC pays Western Asset Limited a fee based on the assets under management of the Multi-Asset Income Fund as set forth in an investment sub-advisory agreement between Western Asset Limited and SIMC. Western Asset Limited pays its investment professionals out of its total revenues and other resources, including the sub-advisory fees earned with respect to the Multi-Asset Income Fund. The following information relates to the period ended September 30, 2020.

At Western Asset Limited, one compensation methodology covers all products and functional areas, including portfolio managers. The firm's philosophy is to reward its employees through total compensation. Total compensation is reflective of the external market value for skills, experience, ability to produce results and the performance of one's group and the firm as a whole.

Discretionary bonuses make up the variable component of total compensation. These are structured to reward sector specialists for contributions to the firm as well as relative performance of their specific portfolios/product and are determined by the professional's job function and performance as measured by a formal review process.

For portfolio managers, the formal review process includes a thorough review of portfolios they were assigned to lead or with which they were otherwise involved and includes not only investment performance, but maintaining a detailed knowledge of client portfolio objectives and guidelines, monitoring of risks and performance for adherence to these parameters, execution of asset allocation consistent with current firm and portfolio strategy and communication with clients. In reviewing investment performance, one-, three- and five-year annualized returns are measured against appropriate market peer groups and to each fund's benchmark index.

Ownership of Fund Shares. As of September 30, 2020, Western Asset Limited's portfolio managers did not beneficially own any shares of the Multi-Asset Income Fund.

Other Accounts. As of September 30, 2020, in addition to the Multi-Asset Income Fund, Western Asset Limited's portfolio managers were responsible for the day-to-day management of certain other accounts, as follows:

Portfolio Manager	Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)	Number of Accounts	Total Assets (in millions)
S. Kenneth Leech	100	\$173,937	226	\$80,090	635	\$225,473
	0	\$ 0	10*	\$ 1,425	25*	\$ 15,191
Annabel Rudebeck	6	\$ 4,596	19	\$ 4,470	21	\$ 7,169
	0	\$ 0	1*	\$ 100.0	2*	\$ 1,317

* These accounts, which are a subset of the accounts in the preceding row, are subject to a performance-based advisory fee.

Conflicts of Interest. Potential conflicts of interest may arise in connection with the management of multiple accounts (including accounts managed in a personal capacity). Western Asset Limited has adopted compliance policies and procedures to address a wide range of potential conflicts of interest that could directly impact the Multi-Asset Income Fund. These could include potential conflicts of interest related to the knowledge and timing of the Multi-Asset Income Fund's trades, investment opportunities and broker selection. Portfolio managers may be privy to the size, timing and possible market impact of the Multi-Asset Income Fund's trades.

It is possible that an investment opportunity may be suitable for both a portfolio and other accounts managed by a portfolio manager, but may not be available in sufficient quantities for both the portfolio and the other accounts to participate fully. Similarly, there may be limited opportunity to sell an investment held by a portfolio and another account. A conflict may arise where the portfolio manager may have an incentive to treat an account preferentially as compared to a portfolio because the account pays a performance-based fee or the portfolio manager, Western Asset Limited or an affiliate has an interest in the account. Western Asset Limited has adopted procedures for allocation of portfolio transactions and investment opportunities across multiple client accounts on a fair and equitable basis over time. All eligible accounts that can participate in a trade share the same price on a pro-rata allocation basis to ensure that no conflict of interest occurs. Trades are allocated among similarly managed accounts to maintain consistency of portfolio strategy, taking into account cash availability, investment restrictions and guidelines and portfolio composition versus strategy.

With respect to securities transactions, Western Asset Limited determines which broker or dealer to use to execute each order, consistent with its duty to seek best execution of the transaction. However, with respect to certain other accounts (such as pooled investment vehicles that are not registered investment companies and other accounts managed for organizations and individuals), Western Asset Limited may be limited by the client with respect to the selection of brokers or dealers or may be instructed to direct trades through a particular broker or dealer. In these cases, trades for a portfolio in a particular security may be placed separately from, rather than aggregated with, such other accounts. Having separate transactions with respect to a security may temporarily affect the market price of the security or the execution of the transaction, or both, to the possible detriment of a portfolio or the other account(s)

involved. Additionally, the management of multiple portfolios and/or other accounts may result in a portfolio manager devoting unequal time and attention to the management of each portfolio and/or other account. Western Asset Limited's team approach to portfolio management and block trading approach works to limit this potential risk.

Western Asset Limited also maintains a gift and entertainment policy to address the potential for a business contact to give gifts or host entertainment events that may influence the business judgment of an employee. Employees are permitted to retain gifts of only a nominal value and are required to make reimbursement for entertainment events above a certain value. All gifts (except those of a de minimus value) and entertainment events that are given or sponsored by a business contact are required to be reported in a gift and entertainment log, which is reviewed on a regular basis for possible issues.

Employees of Western Asset Limited have access to transactions and holdings information regarding client accounts and Western Asset Limited's overall trading activities. This information represents a potential conflict of interest because employees may take advantage of this information as they trade in their personal accounts. Accordingly, Western Asset Limited maintains a Code of Ethics that is compliant with Rule 17j-1 of the 1940 Act and Rule 204A-1 of the Advisers Act to address personal trading. In addition, the Code of Ethics seeks to establish broader principles of good conduct and fiduciary responsibility in all aspects of Western Asset Limited's business. The Code of Ethics is administered by the Legal & Compliance Department and monitored through Western Asset Limited's compliance monitoring program.

Western Asset Limited may also face other potential conflicts of interest with respect to managing client assets, and the description above is not a complete description of every conflict of interest that could be deemed to exist. The firm also maintains a compliance monitoring program and engages independent auditors to conduct a SSAE 16/ISAE 3402 audit on an annual basis. These steps help to ensure that potential conflicts of interest have been addressed.

DISTRIBUTION AND SHAREHOLDER SERVICING

General. SEI Investments Distribution Co. (the "Distributor"), serves as each Fund's distributor. The Distributor, a wholly owned subsidiary of SEI, has its principal business address at One Freedom Valley Drive, Oaks, Pennsylvania 19456.

Distribution Agreement and Shareholder Service Plan. The Distributor serves as each Fund's distributor pursuant to a distribution agreement (the "Distribution Agreement") with the Trust.

For the fiscal year ended September 30, 2020, the Funds did not incur any 12b-1 expenses.

Pursuant to a Shareholder Service Plan (the "Shareholder Service Plan"), the various classes of Shares are authorized to pay service providers a fee in connection with the ongoing servicing of shareholder accounts owning such Shares at the annual rate of up to 0.25% of the value of the average daily net assets attributable to the Class F Shares of the Fund, which is calculated daily and payable monthly.

The service fees payable under the Shareholder Service Plan are intended to compensate service providers for the provision of shareholder services and may be used to provide compensation to financial intermediaries for ongoing service and/or maintenance of shareholder accounts with respect to Fund shares of the applicable Funds. Shareholder services under the Shareholder Service Plan may include: (i) maintaining accounts relating to clients; (ii) arranging for bank wires; (iii) responding to client inquiries relating to the services performed by service providers; (iv) responding to inquiries from clients concerning their investment in Fund shares; (v) assisting clients in changing dividend options, account designations and addresses; (vi) providing information periodically to clients showing their position in Fund shares; (vii) forwarding shareholder communications from the Funds such as proxies, shareholder reports, annual reports, and dividend distribution and tax notices to clients; (viii) processing purchase, exchange and redemption requests from clients and placing orders with the Funds or their service providers; (ix) providing sub-accounting with respect to Fund shares beneficially owned by clients; (x) processing dividend payments from the Funds on behalf of clients; and (xi) providing such other similar services as a Fund may reasonably

request to the extent the service provider is permitted to do so under applicable statutes, rules and regulations.

Distribution Expenses Incurred by Adviser. The Funds are sold primarily through independent registered investment advisers, financial planners, bank trust departments and other financial advisors (“Financial Advisors”) who provide their clients with advice and services in connection with their investments in the SEI Funds. SEI Funds are typically combined into complete investment portfolios and strategies using asset allocation techniques to serve investor needs. In connection with its distribution activities, SIMC and its affiliates may provide Financial Advisors, without charge, asset allocation models and strategies, custody services, risk assessment tools and other investment information and services to assist the Financial Advisor in providing advice to investors.

SIMC may hold conferences, seminars and other educational and informational activities for Financial Advisors for the purpose of educating Financial Advisors about the Funds and other investment products offered by SIMC or its affiliates. SIMC may pay for lodging, meals and other similar expenses incurred by Financial Advisors in connection with such activities. SIMC also may pay expenses associated with joint marketing activities with Financial Advisors, including, without limitation, seminars, conferences, client appreciation dinners, direct market mailings and other marketing activities designed to further the promotion of the Funds. In certain cases, SIMC may make payments to Financial Advisors or their employers in connection with their solicitation or referral of investment business, subject to any regulatory requirements for disclosure to and consent from the investor. All such marketing expenses and solicitation payments are paid by SIMC or its affiliates out of their past profits or other available resources and are not charged to the Funds.

Many Financial Advisors may be affiliated with broker-dealers. SIMC and its affiliates may pay compensation to broker-dealers or other financial institutions for services such as, without limitation, providing the Funds with “shelf space” or a higher profile for the firm’s associated Financial Advisors and their customers, placing the Funds on the firm’s preferred or recommended fund list, granting the Distributor access to the firm’s associated Financial Advisors, providing assistance in training and educating the firm’s personnel, allowing sponsorship of seminars or informational meetings and furnishing marketing support and other specified services. These payments may be based on the average net assets of SEI Funds attributable to that broker-dealer, gross or net sales of SEI Funds attributable to that broker-dealer, a negotiated lump sum payment or other appropriate compensation for services rendered.

Payments may also be made by SIMC or its affiliates to financial institutions to compensate or reimburse them for administrative or other client services provided such as sub-transfer agency services for shareholders or retirement plan participants, omnibus accounting or sub-accounting, participation in networking arrangements, account set-up, recordkeeping and other shareholder services. These fees may be used by the financial institutions to offset or reduce fees that would otherwise be paid directly to them by certain account holders, such as retirement plans.

The payments discussed above may be significant to the financial institutions receiving them, and may create an incentive for the financial institutions or their representatives to recommend or offer shares of the SEI Funds to their customers rather than other funds or investment products. These payments are made by SIMC and its affiliates out of their past profits or other available resources.

Although the Funds may use broker-dealers that sell Fund shares to effect transactions for a Fund’s portfolios, the Funds, SIMC and the Sub-Advisers will not consider the sale of Fund shares as a factor when choosing broker-dealers to effect those transactions and will not direct brokerage transactions to broker-dealers as compensation for the sales of Fund shares.

SECURITIES LENDING ACTIVITY

During the most recent fiscal year, the Multi-Asset Accumulation Fund, Multi-Asset Income Fund, Multi-Asset Inflation Managed Fund and Multi-Asset Capital Stability Fund did not engage in securities lending.

TRUSTEES AND OFFICERS OF THE TRUST

Board Responsibilities. The management and affairs of the Trust and its series, including the Funds described in this SAI, are overseen by the Trustees. The Board has approved contracts, as described above, under which certain companies provide essential management services to the Trust.

Like most mutual funds, the day-to-day business of the Trust, including the management of risk, is performed by third party service providers, such as SIMC, the Distributor and the Administrator. The Trustees are responsible for overseeing the Trust's service providers and thus have oversight responsibility with respect to risk management performed by those service providers. Risk management seeks to identify and address risks, *i.e.*, events or circumstances that could have adverse material effects on the business, operations, shareholder services, investment performance or reputation of the Funds. The Funds and their service providers employ a variety of processes, procedures and controls to identify risks, lessen the probability of their occurrence and/or to mitigate the effects of such risks if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust's business (*e.g.*, SIMC is responsible for the investment performance of the Funds and, along with the Board, is responsible for the oversight of the Funds' Sub-Advisers, which, in turn, are responsible for the day-to-day management of the Funds' portfolio investments) and, consequently, for managing the risks associated with that business. The Board has emphasized to the Funds' service providers the importance of maintaining vigorous risk management.

The Trustees' role in risk oversight begins before the inception of a Fund, at which time SIMC presents to the Board information concerning the investment objectives, strategies and risks of the Fund as well as proposed investment limitations for the Fund. Additionally, each Sub-Adviser and SIMC provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board continues its oversight function as various personnel, including the Trust's Chief Compliance Officer, as well as personnel of SIMC and other service providers, such as the Fund's independent accountants, make periodic reports to the Audit Committee or to the Board with respect to various aspects of risk management. The Board and the Audit Committee oversee efforts by management and service providers to manage risks to which the Funds may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Funds by the Adviser and Sub-Advisers and receives information about those services at its regular meetings. In addition, in connection with its consideration of whether to annually renew the Advisory Agreement between the Trust, on behalf of the Funds, and SIMC and the various Sub-Advisory Agreements between SIMC and the Sub-Advisers with respect to the Funds, the Board annually meets with SIMC and, at least every other year, the Sub-Advisers, to review such services. Among other things, the Board regularly considers the Adviser's and each Sub-Adviser's adherence to the Funds' investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations.

The Trust's Chief Compliance Officer regularly reports to the Board to review and discuss compliance issues and Fund, Adviser and Sub-Adviser risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser and Sub-Advisers. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report, any material changes to the policies and procedures since the date of the last report, any recommendations for material changes to the policies and procedures and any material compliance matters since the date of the last report.

The Board receives reports from the Funds' service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. The Trust's Fair Value Pricing Committee provides regular reports to the Board concerning investments for which market prices are not readily available or may be unreliable. The independent registered public accounting firm reviews with the Audit Committee its audit of the Funds' financial statements annually, focusing on major areas of financial statement risk encountered by the Funds and noting any significant deficiencies or material weaknesses that were identified in the Funds' internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which

are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their respective reviews of these reports and discussions with SIMC, the Sub-Advisers, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn about the material risks of the Funds, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Funds can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Funds' goals and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Reports received by the Trustees as to risk management matters are typically summaries of the relevant information. Most of the Funds' investment management and business affairs are carried out by or through SIMC, the Sub-Advisers and the Funds' other service providers, each of which has an independent interest in risk management and each of which has policies and methods by which one or more risk management functions are carried out. These risk management policies and methods may differ in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

Members of the Board. There are ten members of the Board of Trustees, eight of whom are not interested persons of the Trust, as that term is defined in the 1940 Act ("independent Trustees"). Robert A. Neshier, an interested person of the Trust, serves as Chairman of the Board. James M. Williams, an independent Trustee, serves as the lead independent Trustee. The Trust has determined its leadership structure is appropriate given the specific characteristics and circumstances of the Trust. The Trust made this determination in consideration of, among other things, the fact that the chairperson of each Committee of the Board is an independent Trustee, the amount of assets under management in the Trust and the number of funds (and classes of shares) overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from Fund management.

The Board of Trustees has three standing committees: the Audit Committee, the Governance Committee and the Fair Value Pricing Committee. The Audit Committee and Governance Committee are each chaired by an independent Trustee and composed of all of the independent Trustees. In addition, the Board of Trustees has a lead independent Trustee.

In his role as lead independent Trustee, Mr. Williams, among other things: (i) presides over Board meetings in the absence of the Chairman of the Board; (ii) presides over executive sessions of the independent Trustees; (iii) along with the Chairman of the Board, oversees the development of agendas for Board meetings; (iv) facilitates dealings and communications between the independent Trustees and management and among the independent Trustees; and (v) has such other responsibilities as the Board or independent Trustees determine from time to time.

Set forth below are the names, years of birth, position with the Trust, the year in which the Trustee was elected, and the principal occupations and other directorships held during at least the last five years of each of the persons currently serving as a Trustee of the Trust. There is no stated term of office for the Trustees of the Trust; however, a Trustee must retire from the Board by the end of the calendar year in which the Trustee turns 75 provided that, although there shall be a presumption that each Trustee attaining such age shall retire, the Board may, if it deems doing so to be consistent with the best interests of the Trust, and with the consent of any Trustee that is eligible for retirement, by unanimous vote of the Governance Committee and majority vote of the full Board, extend the term of such Trustee for successive periods of one year. Unless otherwise noted, the business address of each Trustee is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456.

Interested Trustees.

ROBERT A. NESHER (Born: 1946)—Chairman of the Board of Trustees¹ (since 1989)—President and Chief Executive Officer of the Trust since 2005. Trustee of SEI Tax Exempt Trust, SEI Daily Income Trust, SEI Institutional International Trust, SEI Asset Allocation Trust, SEI Institutional Investments Trust, Adviser Managed Trust, New Covenant Funds, and SEI Catholic Values Trust.

Individual Trustee Qualifications. The Trust has concluded that each of the Trustees should serve on the Board because of their ability to review and understand information about the Funds provided to them by management, to identify and request other information they may deem relevant to the performance of their duties, to question management and other service providers regarding material factors bearing on the management and administration of the Funds and to exercise their business judgment in a manner that serves the best interests of the Funds’ shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on their own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Neshor should serve as Trustee because of the experience he has gained in his various roles with SEI Investments Company, which he joined in 1974, his knowledge of and experience in the financial services industry and the experience he has gained serving as Trustee of the various SEI Trusts since 1989.

The Trust has concluded that Mr. Doran should serve as Trustee because of the experience he gained serving as a Partner in the Investment Management and Securities Industry Practice of a large law firm, his experience in and knowledge of the financial services industry and the experience he has gained serving as Trustee of the various SEI Trusts since 1982.

The Trust has concluded that Mr. Sullivan should serve as Trustee because of the experience he gained as a certified public accountant and financial consultant, his experience in and knowledge of public company accounting and auditing and the financial services industry, the experience he gained as an officer of a large financial services firm in its operations department and his experience from serving as Trustee of the various SEI Trusts since 1996.

The Trust has concluded that Ms. Lesavoy should serve as Trustee⁺ because of the experience she gained as a Director of several private equity fundraising firms and marketing and selling a wide range of investment products to institutional investors, her experience in and knowledge of the financial services industry and the experience she has gained serving as Trustee of the various SEI Trusts since 2003.

The Trust has concluded that Mr. Williams should serve as Trustee because of the experience he gained as Chief Investment Officer of a non-profit foundation, the President of an investment management firm, the President of a registered investment company and the Manager of a public company’s pension assets, his experience in and knowledge of the financial services industry and the experience he has gained serving as Trustee of the various SEI Trusts since 2004.

The Trust has concluded that Mr. Johnson should serve as Trustee because of the experience he gained as a senior vice president, corporate finance, of a Fortune 500 Company, his experience in and knowledge of the financial services and banking industries, the experience he gained serving as a director of other mutual funds and the experience he has gained serving as Trustee of the various SEI Trusts since 2007.

The Trust has concluded that Mr. Harris should serve as Trustee because of the experience he gained as Chief Executive Officer and Director of an investment management firm, the experience he gained serving on the Board of a public company, his experience in and knowledge of the financial services and banking industries and the experience he has gained serving as Trustee of the various SEI Trusts since 2008.

The Trust has concluded that Ms. Cote should serve as Trustee because of her education, knowledge of financial services and investment management, and the experience she has gained as a partner at a major accounting firm, where she served as both the Global Asset Management Assurance Leader and the Americas Director of Asset Management, and other professional experience gained through her prior employment and directorships.

The Trust has concluded that Mr. Taylor should serve as Trustee because of his education, knowledge of financial services and investment management, and the experience he has gained as a Chief Investment Officer at an endowment of a large university, and other professional experience gained through his prior employment and leadership positions.

The Trust has concluded that Ms. Reynolds should serve as Trustee because of the experience she has gained in her various roles with Fidelity, which she joined in 2002, including Chief Financial Officer of Fidelity Funds, her experience as a partner of a major accounting firm, and her experience in and knowledge of the financial services industry.

In its periodic assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Funds. Moreover, references to the qualifications, attributes and skills of Trustees are pursuant to requirements of the SEC, do not constitute holding out of, or reflect any conclusion that, the Board or any Trustee has any special expertise or experience and shall not be deemed to impose any greater responsibility or liability on any such person or on the Board by reason thereof.

Board Standing Committees. The Board has established the following standing committees:

- **Audit Committee.** The Board has a standing Audit Committee that is composed of each of the independent Trustees of the Trust. The Audit Committee operates under a written charter approved by the Board. The principal responsibilities of the Audit Committee include: (i) recommending which firm to engage as the Trust's independent auditor and whether to terminate this relationship; (ii) reviewing the independent auditor's compensation, the proposed scope and terms of its engagement and the firm's independence; (iii) pre-approving audit and non-audit services provided by the Trust's independent auditor to the Trust and certain other affiliated entities; (iv) serving as a channel of communication between the independent auditor and the Trustees; (v) reviewing the results of each external audit, including any qualifications in the independent auditor's opinion, any related management letter, management's responses to recommendations made by the independent auditor in connection with the audit, reports submitted to the Audit Committee by the internal auditing department of the Trust's Administrator that are material to the Trust as a whole, if any, and management's responses to any such reports; (vi) reviewing the Trust's audited financial statements and considering any significant disputes between the Trust's management and the independent auditor that arose in connection with the preparation of those financial statements; (vii) considering, in consultation with the independent auditor and the Trust's senior internal accounting executive, if any, the independent auditor's report on the adequacy of the Trust's internal financial controls; (viii) reviewing, in consultation with the Trust's independent auditor, major changes regarding auditing and accounting principles and practices to be followed when preparing the Trust's financial statements; and (ix) other audit related matters. In addition, the Audit Committee is responsible for the oversight of the Trust's compliance program. Messrs. Sullivan, Williams, Johnson, Harris and Taylor and Mes. Lesavoy, Cote and Reynolds currently serve as members of the Audit Committee. The Audit Committee meets periodically, as necessary, and met four (4) times during the Trust's most recently completed fiscal year.
- **Fair Value Pricing Committee.** The Board has a standing Fair Value Pricing Committee that is composed of at least one Trustee and various representatives of the Trust's service providers, as appointed by the Board. The Fair Value Pricing Committee operates under procedures approved

by the Board. The principal responsibility of the Fair Value Pricing Committee is to determine the fair value of securities for which current market quotations are not readily available. The Fair Value Pricing Committee's determinations are reviewed by the Board. Mr. Neshar currently serves as the Board's delegate on the Fair Value Pricing Committee. The Fair Value Pricing Committee meets as necessary, and met thirty-two (32) times during the Trust's most recently completed fiscal year.

- **Governance Committee.** The Board has a standing Governance Committee that is composed of each of the Independent Trustees of the Trust. The Governance Committee operates under a written charter approved by the Board. The principal responsibilities of the Governance Committee include: (i) considering and reviewing Board governance and compensation issues; (ii) conducting a self assessment of the Board's operations; (iii) selecting and nominating all persons to serve as independent Trustees and evaluating the qualifications of "interested" (as that term is defined under the 1940 Act) Trustee candidates; and (iv) reviewing shareholder recommendations for nominations to fill vacancies on the Board if such recommendations are submitted in writing and addressed to the Governance Committee at Trust's offices, which are located at One Freedom Valley Drive, Oaks, Pennsylvania 19456. Messrs. Sullivan, Williams, Johnson, Harris and Taylor and Mmes. Lesavoy, Cote and Reynolds currently serve as members of the Governance Committee. The Governance Committee shall meet at the direction of its Chair as often as appropriate to accomplish its purpose. In any event, the Governance Committee shall meet at least once each year and shall conduct at least one meeting in person. The Governance Committee met four (4) times during the Trust's most recently completed fiscal year.

Fund Shares Owned by Board Members. The following table shows the dollar amount range of each Trustee's "beneficial ownership" of shares of each of the Funds and shares of funds in the Fund Complex (as described below) as of the end of the most recently completed calendar year. Dollar amount ranges disclosed are established by the SEC.

"Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the Securities and Exchange Act of 1934, as amended (the "1934 Act"). The Trustees and officers of the Trust own less than 1% of the outstanding shares of the Trust.

Name	Dollar Range of Fund Shares (Fund)*	Aggregate Dollar Range of Shares (Fund Complex)*
Interested		
Mr. Neshar	\$10,001-\$50,000	Over \$100,000
Mr. Doran	None	Over \$100,000
Independent		
Mr. Sullivan	None	Over \$100,000
Ms. Lesavoy	\$50,001-\$100,000	Over \$100,000
Mr. Williams	None	\$50,001-\$100,000
Mr. Johnson	None	None
Mr. Harris	None	None
Ms. Cote	None	None
Mr. Taylor	None	None
Ms. Reynolds	None	None

* Valuation date is December 31, 2020. The Fund Complex currently consists of 99 portfolios of the following trusts: SEI Asset Allocation Trust, SEI Daily Income Trust, SEI Institutional International Trust, SEI Institutional Investments Trust, SEI Institutional Managed Trust, SEI Tax Exempt Trust, Adviser Managed Trust, New Covenant Funds and SEI Catholic Values Trust.

Board Compensation. The Trust and the Fund Complex paid the following fees to the Trustees during its most recently completed fiscal year.

Name	Aggregate Compensation	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From the Trust and Fund Complex*
Interested				
Mr. Neshar	\$ 0	\$0	\$0	\$ 0
Mr. Doran	\$ 0	\$0	\$0	\$ 0
Independent				
Mr. Sullivan	\$74,277	\$0	\$0	\$287,500
Ms. Lesavoy	\$80,737	\$0	\$0	\$312,500

Mr. Taylor	\$74,277	\$0	\$0	\$287,500
Ms. Reynolds ¹	\$55,943	\$0	\$0	\$214,500

* The Fund Complex currently consists of 93 portfolios of the following trusts: SEI Asset Allocation Trust, SEI Daily Income Trust, SEI Institutional International Trust, SEI Institutional Investments Trust, SEI Institutional Managed Trust, SEI Tax Exempt Trust, Adviser Managed Trust, New Covenant Funds and SEI Catholic Values Trust.

¹ Ms. Reynolds became a Trustee for the Trust effective December 4, 2019.

Trust Officers. Set forth below are the names, dates of birth, position with the Trust, length of term of office, and the principal occupations for at least the last five years of each of the persons currently serving as officers of the Trust. Unless otherwise noted, the business address of each officer is SEI Investments Company, One Freedom Valley Drive, Oaks, Pennsylvania 19456. None of the officers, except for Russell Emery, the Chief Compliance Officer of the Trust, receives compensation from the Trust for his or her services. The Trust's Chief Compliance Officer serves in the same capacity for the other SEI trusts included in the Fund Complex, and the Trust pays its pro-rata share of the aggregate compensation payable to the Chief Compliance Officer for his services.

Certain officers of the Trust also serve as officers to one or more mutual funds to which SEI or its affiliates act as investment adviser, administrator or distributor.

The officers of the Trust have been elected by the Board. Each officer shall hold office until the election and qualification of his or her successor or until earlier resignation or removal.

ROBERT A. NESHER (Born: 1946)—President and Chief Executive Officer (since 2005)—See biographical information above under the heading “Interested Trustees.”

TIMOTHY D. BARTO (Born: 1968)—Vice President and Secretary (since 2002)—Vice President and Secretary of SEI Institutional Transfer Agent, Inc. since 2009. General Counsel and Secretary of SIMC since 2004. Vice President of SIMC and the Administrator since 1999. Vice President and Assistant Secretary of SEI since 2001.

PETER RODRIGUEZ (Born: 1962)—Controller and Chief Financial Officer (since 2020)—Director, Fund Accounting, SEI Investments Global Funds Services since April 2020 and previously from March 2011 to March 2015; Director, Financial Reporting from June 2017 to March 2020. Director, Centralized Operations from March 2015 to June 2017.

GLENN R. KURDZIEL (Born: 1974)—Assistant Controller (since 2017)—Senior Manager of Funds Accounting of SEI Investments Global Funds Services since 2005.

STEPHEN G. MACRAE (Born: 1967)—Vice President (since 2012)—Director of Global Investment Product Management since January 2004.

BRIDGET E. SUDALL (Born: 1980)—Anti-Money Laundering Compliance Officer and Privacy Officer (since 2015)—Senior Associate and AML Officer at Morgan Stanley Alternative Investment Partners from April 2011 to March 2015. Investor Services Team Lead at Morgan Stanley Alternative Investment Partners from July 2007 to April 2011.

PROXY VOTING POLICIES AND PROCEDURES

The Funds have delegated proxy voting responsibilities to SIMC, subject to the Board's general oversight. In delegating proxy voting responsibilities, each Fund has directed that proxies be voted consistent with a Fund's best economic interests. SIMC has adopted its own proxy voting policies and guidelines for this purpose (the "Procedures"). As required by applicable regulations, SIMC has provided this summary of its Procedures concerning proxies voted by SIMC on behalf of each investment advisory client who delegates voting responsibility to SIMC, which includes the Funds (each a "Client"). The Procedures may be changed as necessary to remain current with regulatory requirements and internal policies and procedures.

SIMC votes proxies in the best economic interests of Clients. SIMC has elected to retain an independent proxy voting service (the "Service") to vote proxies for Client accounts, which votes proxies in accordance with Proxy Voting Guidelines (the "Proxy Guidelines") approved by SIMC's Proxy Voting Committee (the "Proxy Committee"). The Proxy Guidelines set forth the manner in which SIMC will vote on matters that may come up for shareholder vote. The Service will review each matter on a case-by-case basis, and vote the proxies in accordance with the Proxy Guidelines. For example, the Proxy Guidelines provide that SIMC will vote in favor of proposals to require shareholder ratification of any poison pill, shareholder proposals that request companies to adopt confidential voting, and for management proposals to do so, and shareholder social, workforce, and environmental proposals that create good corporate citizens while enhancing long-term shareholder value. The Proxy Guidelines also provide, among other items, that SIMC generally will vote against: proposals to limit the tenure of outside directors through mandatory retirement ages; management proposals to limit the tenure of outside directors through term limits; proposals that give management the ability to alter board size outside of a specific range without shareholder approval; proposals to classify the board; proposals to eliminate cumulative voting; proposals

that provide that directors may be removed only for cause; proposals giving the board exclusive authority to amend the bylaws; retirement plans for non-employee directors; shareholder proposals seeking to set absolute levels on executive and director compensation or otherwise dictate the amount or form of compensation, eliminate stock options or other equity grants to employees or directors, or requiring director fees be paid in stock only; and proposals to phase out the use of animals in product testing unless certain circumstances apply. The Proxy Guidelines also provide, among other items, that SIMC generally will vote for: proposals seeking to fix board size or designate a range for board size; proposals that permit shareholders to elect directors to fill board vacancies; and proposals seeking a report on the company's animal welfare standards. In addition to these examples, the Proxy Guidelines cover numerous other specific policies. In addition, the Proxy Guidelines provide that SIMC will vote against director nominees (or the Board) if it believes that a nominee (or the Board) has not served the economic long-term interests of shareholders.

Prior to voting a proxy, the Service makes available to SIMC its recommendation on how to vote in light of the Guidelines. SIMC retains the authority to overrule the Service's recommendation on any specific proxy proposal and to instruct the Service to vote in a manner determined by the Committee. Before doing so, the Committee will determine whether SIMC may have a material conflict of interest regarding the proposal. If the Committee determines that SIMC has such a material conflict, SIMC shall instruct the Service to vote in accordance with the Service's recommendation unless SIMC, after full disclosure to the Client of the nature of the conflict, obtains the Client's consent to voting in the manner determined by the Committee (or otherwise obtains instructions from the Client as to how to vote on the proposal).

With respect to proxies of an affiliated investment company or series thereof, the Committee will vote such proxies in the same proportion as the vote of all other shareholders of the investment company or series thereof (*i.e.*, "echo vote" or "mirror vote").

For each proxy, SIMC maintains all related records as required by applicable law. The Trust is required to file how all proxies were voted with respect to portfolio securities held by the Funds. A Client may obtain, without charge, a copy of SIMC's Procedures and Proxy Guidelines, or information regarding how the Funds voted proxies relating to portfolio securities for the most recent 12-month period ended June 30, by calling SIMC at 1-800-DIAL-SEI, by writing to SIMC at One Freedom Valley Drive, Oaks, Pennsylvania 19456, or on the SEC's website at <http://www.sec.gov>.

PURCHASE AND REDEMPTION OF SHARES

Shares of each Fund may be purchased in exchange for securities included in the Fund subject to the Administrator's determination that the securities are acceptable. Securities accepted in an exchange will be valued at the market value. All accrued interest and subscription of other rights that are reflected in the market price of accepted securities at the time of valuation become the property of the Trust and must be delivered by the shareholder to the Trust upon receipt from the issuer. A shareholder may recognize a gain or a loss for federal income tax purposes in making the exchange.

The Administrator will not accept securities for a Fund unless: (i) such securities are appropriate for the Fund at the time of the exchange; (ii) such securities are acquired for investment and not for resale; (iii) the shareholder represents and agrees that all securities offered to the Trust for the Fund are not subject to any restrictions upon their sale by the Fund under the 1933 Act, or otherwise; (iv) such securities are traded on the American Stock Exchange, the New York Stock Exchange ("NYSE") or on NASDAQ in an unrelated transaction with a quoted sales price on the same day the exchange valuation is made or, if not listed on such exchanges or on NASDAQ, have prices available from an independent pricing service approved by the Board; and (v) the securities may be acquired under the investment restrictions applicable to the Fund.

The Trust reserves the right to suspend the right of redemption and/or to postpone the date of payment upon redemption for any period during which trading on the NYSE is restricted, or during the existence of an emergency (as determined by the SEC by rule or regulation) as a result of which disposal

or evaluation of the portfolio securities is not reasonably practicable, or for such other periods as the SEC may by order permit. The Trust also reserves the right to suspend sales of shares of one or more of the Funds for any period during which the NYSE, the Administrator, the advisers, the Distributor and/or the custodian are not open for business. Currently, the following holidays are observed by the Trust: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

It is currently the Trust's policy to pay for all redemptions in cash. The Trust retains the right, however, to alter this policy to provide for redemptions in whole or in part by a distribution in kind of securities held by a Fund in lieu of cash. Shareholders may incur brokerage charges in connection with the sale of such securities. However, a shareholder will at all times be entitled to aggregate cash redemptions from a Fund of the Trust during any 90-day period of up to the lesser of \$250,000 or 1% of the Trust's net assets in cash. A gain or loss for federal income tax purposes would be realized by a shareholder subject to taxation upon an in-kind redemption depending upon the shareholder's basis in the shares of the Fund redeemed.

Fund securities may be traded on foreign markets on days other than a Business Day or the net asset value of a Fund may be computed on days when such foreign markets are closed. In addition, foreign markets may close at times other than 4:00 p.m. Eastern Time. As a consequence, the net asset value of a share of a Fund may not reflect all events that may affect the value of the Fund's foreign securities unless an adviser determines that such events materially affect net asset value, in which case net asset value will be determined by consideration of other factors.

Certain shareholders in the Funds may obtain asset allocation services from SIMC and other financial intermediaries with respect to their investments in the Funds. If a sufficient amount of a Fund's assets are subject to such asset allocation services, the Fund may incur higher transaction costs and a higher portfolio turnover rate than would otherwise be anticipated as a result of redemptions and purchases of Fund shares pursuant to such services. Further, to the extent that SIMC is providing asset allocation services and providing investment advice to a Fund, it may face conflicts of interest in fulfilling its responsibilities because of the possible differences between the interests of its asset allocation clients and the interests of the Fund.

Use of Third-Party Independent Pricing Agents. The Funds' Pricing and Valuation Procedures provide that any change in a primary pricing agent or a pricing methodology requires prior approval by the Board. However, when the change would not materially affect valuation of a Fund's net assets or involve a material departure in pricing methodology from that of the Fund's existing pricing agent or pricing methodology, Board approval may be obtained at the next regularly scheduled Board meeting after the change.

TAXES

The following is only a summary of certain additional U.S. federal income tax considerations generally affecting the Funds and their shareholders that is intended to supplement the discussion contained in the Funds' prospectuses. No attempt is made to present a detailed explanation of the tax treatment of the Funds or their shareholders, and the discussion here and in the Funds' prospectuses is not intended as a substitute for careful tax planning. Shareholders are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

The following general discussion of certain federal income tax consequences is based on the Code and the regulations issued thereunder as in effect on the date of this SAI. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Qualification as a Regulated Investment Company. Each Fund has elected and intends to qualify to be treated as a RIC. By following such a policy, each Fund expects to eliminate or reduce to a nominal amount the federal taxes to which it may be subject. A Fund that qualifies as a RIC will generally not be subject to federal income taxes on the net investment income and net realized capital gains that the Fund

timely distributes to its shareholders. The Board reserves the right not to maintain the qualification of a Fund as a RIC if it determines such course of action to be beneficial to shareholders.

In order to qualify as a RIC under the Code, each Fund must distribute annually to its shareholders at least 90% of its net investment income (which, includes dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses) and at least 90% of its net tax exempt interest income, for each tax year, if any (the "Distribution Requirement") and also must meet certain additional requirements. Among these requirements are the following: (i) at least 90% of each Fund's gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities, or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities, or currencies, and net income derived from an interest in a qualified publicly traded partnership (the "Qualifying Income Test"); and (ii) at the close of each quarter of each Fund's taxable year: (A) at least 50% of the value of each Fund's total assets must be represented by cash and cash items, U.S. government securities, securities of other RICs and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of each Fund's total assets and that does not represent more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (B) not more than 25% of the value of each Fund's total assets is invested, including through corporations in which a Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or the securities of other RICs) of any one issuer or the securities (other than the securities of another RIC) of two or more issuers that a Fund controls and which are engaged in the same or similar trades or businesses or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Asset Test").

Although the Funds intend to distribute substantially all of their net investment income and may distribute their capital gains for any taxable year, the Funds will be subject to federal income taxation to the extent any such income or gains are not distributed. Each Fund is treated as a separate corporation for federal income tax purposes. A Fund therefore is considered to be a separate entity in determining its treatment under the rules for RICs described herein. Losses in one Fund do not offset gains in another and the requirements (other than certain organizational requirements) for qualifying RIC status are determined at the Fund level rather than at the Trust level.

If a Fund fails to satisfy the Qualifying Income or Asset Tests in any taxable year, such Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the diversification requirements where the Fund corrects the failure within a specified period. If a Fund fails to maintain qualification as a RIC for a tax year, and the relief provisions are not available, such Fund will be subject to federal income tax at the regular corporate rate (currently 21%) without any deduction for distributions to shareholders. In such case, its shareholders would be taxed as if they received ordinary dividends, although corporate shareholders could be eligible for the dividends received deduction (subject to certain limitations) and individuals may be able to benefit from the lower tax rates available to qualified dividend income. In addition, a Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC.

A Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as "post-October losses") and certain other late-year losses.

The treatment of capital loss carryovers for the Funds is similar to the rules that apply to capital loss carryovers of individuals, which provide that such losses are carried over indefinitely. Thus, if a Fund has a “net capital loss” (that is, capital losses in excess of capital gains) the excess of the Fund’s net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund’s next taxable year, and the excess (if any) of the Fund’s net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund’s next taxable year. In addition, the carryover of capital losses may be limited under the general loss limitation rules if a Fund experiences an ownership change as defined in the Code.

Federal Excise Tax. Notwithstanding the Distribution Requirement described above, which generally requires a Fund to distribute at least 90% of its annual investment company taxable income and the excess of its exempt interest income (but does not require any minimum distribution of net capital gain), a Fund will be subject to a nondeductible 4% federal excise tax to the extent it fails to distribute by the end of the calendar year at least 98% of its ordinary income and 98.2% of its capital gain net income (the excess of short- and long-term capital gains over short- and long-term capital losses) for the one-year period ending on October 31 of such year (including any retained amount from the prior calendar year on which a Fund paid no federal income tax). The Funds intend to make sufficient distributions to avoid liability for federal excise tax, but can make no assurances that such tax will be completely eliminated. The Funds may in certain circumstances be required to liquidate Fund investments in order to make sufficient distributions to avoid federal excise tax liability at a time when the investment adviser might not otherwise have chosen to do so, and liquidation of investments in such circumstances may affect the ability of the Funds to satisfy the requirement for qualification as a RIC.

Distributions to Shareholders. The Funds receive income generally in the form of dividends and interest on investments. This income, plus net short-term capital gains, if any, less expenses incurred in the operation of a Fund, constitutes the Fund’s net investment income from which dividends may be paid to you. Any distributions by a Fund from such income will be taxable to you as ordinary income or at the lower capital gains rates that apply to individuals receiving qualified dividend income, whether you take them in cash or in additional shares.

Distributions by the Funds are currently eligible for the reduced maximum tax rate to individuals of 20% (lower rates apply to individuals in lower tax brackets) to the extent that the Funds receive qualified dividend income on the securities they hold and the Funds report the distributions as qualified dividend income. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (e.g., foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, or the stock of which is readily tradable on an established securities market in the United States). A dividend will not be treated as qualified dividend income to the extent that: (i) the shareholder has not held the shares on which the dividend was paid for more than 60 days during the 121-day period that begins on the date that is 60 days before the date on which the shares become “ex-dividend” (which is the day on which declared distributions (dividends or capital gains) are deducted from each Fund’s assets before it calculates the net asset value) with respect to such dividend, (ii) each Fund has not satisfied similar holding period requirements with respect to the securities it holds that paid the dividends distributed to the shareholder, (iii) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to substantially similar or related property, or (iv) the shareholder elects to treat such dividend as investment income under section 163(d)(4)(B) of the Code. Therefore, if you lend your shares in a Fund, such as pursuant to a securities lending arrangement, you may lose the ability to treat dividends (paid while the shares are held by the borrower) as qualified dividend income. Distributions that the Funds receive from an ETF, an underlying fund taxable as a RIC or from a REIT will be treated as qualified dividend income only to the extent so reported by such ETF, underlying fund or REIT. Certain Funds’ investment strategies may limit their ability to make distributions eligible for the reduced tax rates applicable to qualified dividend income.

Distributions by the Funds of their net short-term capital gains will be taxable as ordinary income. Capital gain distributions consisting of a Fund's net capital gains will be taxable as long-term capital gains for individual shareholders currently set at a maximum rate of 20% regardless of how long you have held your shares in such Fund. Distributions from capital gains are generally made after applying any available capital loss carryforwards.

In the case of corporate shareholders, Fund distributions (other than capital gain distributions) generally qualify for the dividends-received deduction to the extent such distributions are so reported and do not exceed the gross amount of qualifying dividends received by such Fund for the year. Generally, and subject to certain limitations (including certain holding period limitations), a dividend will be treated as a qualifying dividend if it has been received from a domestic corporation. Certain Funds' investment strategies will significantly limit their ability to distribute dividends eligible for the dividends-received deduction for corporations.

To the extent that a Fund makes a distribution of income received by such Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If a Fund's distributions exceed its taxable income and capital gains realized during a taxable year, all or a portion of the distributions made in the same taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in a Fund and result in a higher reported capital gain or lower reported capital loss when those shares on which the distribution was received are sold.

A dividend or distribution received shortly after the purchase of shares reduces the net asset value of the shares by the amount of the dividend or distribution and, although in effect a return of capital, will be taxable to the shareholder. If the net asset value of shares were reduced below the shareholder's cost by dividends or distributions representing gains realized on sales of securities, such dividends or distributions would be a return of investment though taxable to the shareholder in the same manner as other dividends or distributions. This is known as "buying a dividend" and should be avoided by taxable investors.

The Funds (or their administrative agents) will inform you of the amount of your ordinary income dividends, qualified dividend income and capital gain distributions, if any, and will advise you of their tax status for federal income tax purposes shortly after the close of each calendar year. If you have not held Fund shares for a full year, the Funds may report and distribute to you, as ordinary income, qualified dividend income or capital gain, a percentage of income that is not equal to the actual amount of such income earned during the period of your investment in the Funds.

Dividends declared to shareholders of record in October, November or December and actually paid in January of the following year will be treated as having been received by shareholders on December 31 of the calendar year in which declared. Under this rule, therefore, a shareholder may be taxed in one year on dividends or distributions actually received in January of the following year.

Sales, Exchanges or Redemptions. Any gain or loss recognized on a sale, exchange, or redemption of shares of a Fund by a shareholder who is not a dealer in securities will generally, for individual shareholders, be treated as a long-term capital gain or loss if the shares have been held for more than twelve months and otherwise will be treated as a short-term capital gain or loss. However, if shares on which a shareholder has received a net capital gain distribution are subsequently sold, exchanged, or redeemed and such shares have been held for six months or less, any loss recognized will be treated as a long-term capital loss to the extent of the net capital gain distribution. In addition, the loss realized on a sale or other disposition of shares will be disallowed to the extent a shareholder repurchases (or enters into a contract to or option to repurchase) shares within a period of 61 days (beginning 30 days before and ending 30 days after the disposition of the shares). This loss disallowance rule will apply to shares

received through the reinvestment of dividends during the 61-day period. For tax purposes, an exchange of your Fund shares for shares of a different fund is the same as a sale.

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% tax on their “net investment income,” including interest, dividends, and capital gains (including any capital gains realized on the sale or exchange of shares of a Fund).

The Funds (or their administrative agents) must report to the IRS and furnish to Fund shareholders the cost basis information for Fund shares. In addition to reporting the gross proceeds from the sale of Fund shares, each Fund (or its administrative agent) is also required to report the cost basis information for such shares and indicate whether these shares have a short-term or long-term holding period. For each sale of its shares, each Fund will permit its shareholders to elect from among several IRS-accepted cost basis methods, including the average cost basis method. In the absence of an election, each Fund will use a default cost basis method which has been separately communicated to you. The cost basis method elected by shareholders (or the cost basis method applied by default) for each sale of a Fund’s shares may not be changed after the settlement date of each such sale of a Fund’s shares. Shareholders should consult their tax advisors to determine the best IRS-accepted cost basis method for their tax situation and to obtain more information about cost basis reporting. Shareholders also should carefully review any cost basis information provided to them and make any additional basis, holding period or other adjustments that are required when reporting these amounts on their federal income tax returns.

Tax Treatment of Complex Securities. The Funds may invest in complex securities and these investments may be subject to numerous special and complex tax rules. These rules could affect the Funds’ ability to qualify as RICs, affect whether gains and losses recognized by the Funds are treated as ordinary income or capital gain, accelerate the recognition of income to the Funds and/or defer the Funds’ ability to recognize losses, and, in limited cases, subject the Funds to U.S. federal income tax on income from certain of their foreign securities. In turn, these rules may affect the amount, timing or character of the income distributed to you by the Funds.

Certain derivative investment by the Funds, such as ETPs and OTC derivatives may not produce qualifying income for purposes of the “Qualifying Income Test” described above, which must be met in order for a Fund to maintain its status as a RIC under the Code. In addition, the determination of the value and the identity of the issuer of such derivative investments are often unclear for purposes of the “Asset Test” described above. The Funds intend to carefully monitor such investments to ensure that any non-qualifying income does not exceed permissible limits and to ensure that they are adequately diversified under the Asset Test. The Funds, however, may not be able to accurately predict the non-qualifying income from these investments and there are no assurances that the IRS will agree with the Funds’ determination of the “Asset Test” with respect to such derivatives.

Each of the Commodity Funds may invest up to 25% of its total assets in a Subsidiary, which the Commodity Funds expect to be treated as a controlled foreign corporation under the Code. The Commodity Funds’ investment in their respective Subsidiary is expected to provide the Commodity Funds with exposure to the commodities markets within the limitations of the federal tax requirements of Subchapter M of the Code for qualification as a RIC. The “Subpart F” income (defined in Section 951 of the Code to include passive income, including from commodity-linked derivatives) of the Commodity Funds attributable to their investment in a Subsidiary is “qualifying income” to the Commodity Funds to the extent that such income is derived with respect to the Commodity Fund’s business of investing in stock, securities or currencies. Each Commodity Fund expects its “Subpart F” income attributable to its investment in its Subsidiary to be derived with respect to the Commodity Fund’s business of investing in stock, securities or currencies and to be treated as “qualifying income.” The Adviser will carefully monitor the Commodity Funds’ investments in their respective Subsidiary to ensure that no more than 25% of the Commodity Fund’s assets are invested in its Subsidiary.

Certain of the Commodity Funds’ investments, such as commodity futures contracts, other commodity-related derivative instruments and commodities, when made directly, may not produce qualifying income to the Commodity Funds. To the extent a Commodity Fund invests in such investments directly, the Fund

will seek to restrict its income from such instruments that do not generate qualifying income to a maximum of 10% of its gross income (when combined with its other investments that produce non-qualifying income).

Each Fund is required for federal income tax purposes to mark-to-market and recognize as income for each taxable year its net unrealized gains and losses on certain futures and options contracts subject to section 1256 of the Code (“Section 1256 Contracts”) as of the end of the year as well as those actually realized during the year. Gain or loss from Section 1256 Contracts on broad-based indexes required to be marked to market will be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders. A Fund may be required to defer the recognition of losses on Section 1256 Contracts to the extent of any unrecognized gains on offsetting positions held by the Fund. These provisions may also require the Funds to mark-to-market certain types of positions in their portfolios (*i.e.*, treat them as if they were closed out), which may cause a Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirement and for avoiding the excise tax discussed above. Accordingly, in order to avoid certain income and excise taxes, a Fund may be required to liquidate its investments at a time when the investment adviser might not otherwise have chosen to do so.

With respect to investments in STRIPS, Treasury Receipts, and other zero coupon securities which are sold at original issue discount and thus do not make periodic cash interest payments, a Fund will be required to include as part of its current income the imputed interest on such obligations even though the Fund has not received any interest payments on such obligations during that period. Because each Fund intends to distribute all of its net investment income to its shareholders, a Fund may have to sell Fund securities to distribute such imputed income which may occur at a time when the Adviser would not have chosen to sell such securities and which may result in taxable gain or loss.

Any market discount recognized on a bond is taxable as ordinary income. A market discount bond is a bond acquired in the secondary market at a price below redemption value or adjusted issue price if issued with original issue discount. Absent an election by a Fund to include the market discount in income as it accrues, gain on the Fund’s disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount.

A Fund may invest in inflation-linked debt securities. Any increase in the principal amount of an inflation-linked debt security will be original interest discount, which is taxable as ordinary income and is required to be distributed, even though the Fund will not receive the principal, including any increase thereto, until maturity. As noted above, if a Fund invests in such securities it may be required to liquidate other investments, including at times when it is not advantageous to do so, in order to satisfy its distribution requirements and to eliminate any possible taxation at the Fund level.

In general, for purposes of the Qualifying Income Test described above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by a Fund. However, 100% of the net income derived from an interest in a “qualified publicly traded partnership” (generally, a partnership (i) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, (ii) that derives at least 90% of its income from the passive income sources specified in Code section 7704(d), and (iii) that, in general, derives less than 90% of its income from the qualifying income described in the Qualifying Income Test) will be treated as qualifying income. In addition, although in general the passive loss rules of the Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership.

A Fund may invest in certain MLPs which may be treated as “qualified publicly traded partnerships.” Income from qualified publicly traded partnerships is qualifying income for purposes of the Qualifying Income Test, but a Fund’s investment in one or more of such “qualified publicly traded partnerships” is limited under the Asset Test to no more than 25% of the value of the Fund’s assets. The Funds will monitor their investments in such qualified publicly traded partnerships in order to ensure compliance with the Qualifying Income and Asset Tests. MLPs and other partnerships that the Funds may invest in will deliver

Schedule K-1s to the Funds to report their share of income, gains, losses, deductions and credits of the MLP or other partnership. These Schedule K-1s may be delayed and may not be received until after the time that a Fund issues its tax reporting statements. As a result, a Fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement.

“Qualified publicly traded partnership income” within the meaning of Section 199A(e)(5) of the Code as eligible for a 20% deduction by non-corporate taxpayers. Qualified publicly traded partnership income is generally income of a “publicly traded partnership” that is not treated as a corporation for U.S. federal income tax purposes that is effectively connected with such entity’s trade or business, but does not include certain investment income. A “publicly traded partnership” for purposes of this deduction is not necessarily the same as a “qualified publicly traded partnership” as defined for the purpose of the immediately preceding paragraphs. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). The Code does not contain a provision permitting a RIC, such as the Multi-Asset Income Fund, to pass the special character of this income through to its shareholders. Currently, direct investors in entities that generate “qualified publicly traded partnership income” will enjoy the lower rate, but investors in RICs that invest in such entities will not. It is uncertain whether future technical corrections or administrative guidance will address this issue to enable the Multi-Asset Income Fund to pass through the special character of “qualified publicly traded partnership income” to its shareholders.

A Fund may invest in REITs. Investments in REIT equity securities may require a Fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, a Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. A Fund’s investments in REIT equity securities may at other times result in a Fund’s receipt of cash in excess of the REIT’s earnings; if a Fund distributes these amounts, these distributions could constitute a return of capital to such Fund’s shareholders for federal income tax purposes. Dividends paid by a REIT, other than capital gain distributions, will be taxable as ordinary income up to the amount of the REIT’s current and accumulated earnings and profits. Capital gain dividends paid by a REIT to a Fund will be treated as long-term capital gains by the Fund and, in turn, may be distributed by the Fund to its shareholders as a capital gain distribution. Dividends received by a Fund from a REIT generally will not constitute qualified dividend income or qualify for the dividends received deduction. If a REIT is operated in a manner such that it fails to qualify as a REIT, an investment in the REIT would become subject to double taxation, meaning the taxable income of the REIT would be subject to federal income tax at the regular corporate rate without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the REIT’s current and accumulated earnings and profits.

“Qualified REIT dividends” (*i.e.*, ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income eligible for capital gain tax rates) as eligible for a 20% deduction by non-corporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). Distributions by a Fund to its shareholders that are attributable to qualified REIT dividends received by the Fund and which the Fund properly reports as “section 199A dividends,” are treated as “qualified REIT dividends” in the hands of non-corporate shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. A Fund is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

REITs in which a Fund invests often do not provide complete and final tax information to the Funds until after the time that the Funds issue a tax reporting statement. As a result, a Fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement. When such reclassification is necessary, a Fund (or its administrative agent) will send you a corrected, final Form 1099-DIV to reflect the reclassified information. If you receive a corrected

Form 1099-DIV, use the information on this corrected form, and not the information on the previously issued tax reporting statement, in completing your tax returns.

If a Fund owns shares in certain foreign investment entities, referred to as “passive foreign investment companies” or “PFICs”, the Fund will generally be subject to one of the following special tax regimes: (i) the Fund may be liable for U.S. federal income tax, and an additional interest charge, on a portion of any “excess distribution” from such foreign entity or any gain from the disposition of such shares, even if the entire distribution or gain is paid out by the Fund as a dividend to its shareholders; (ii) if the Fund were able and elected to treat a PFIC as a “qualified electing fund” or “QEF,” the Fund would be required each year to include in income, and distribute to shareholders in accordance with the distribution requirements set forth above, the Fund’s pro rata share of the ordinary earnings and net capital gains of the PFIC, whether or not such earnings or gains are distributed to the Fund; or (iii) the Fund may be entitled to mark-to-market annually shares of the PFIC, and in such event would be required to distribute to shareholders any such mark-to-market gains in accordance with the distribution requirements set forth above. Such Fund intends to make the appropriate tax elections, if possible, and take any additional steps that are necessary to mitigate the effect of these rules. Amounts included in income each year by a Fund arising from a QEF election will be “qualifying income” under the Qualifying Income Test (as described above) even if not distributed to the Fund, if the Fund derives such income from its business of investing in stock, securities or currencies.

Certain Foreign Currency Tax Issues. A Fund’s transactions in foreign currencies and forward foreign currency contracts will generally be subject to special provisions of the Code that, among other things, may affect the character of gains and losses realized by the Fund (*i.e.*, may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require a Fund to mark-to-market certain types of positions in its portfolio (*i.e.*, treat them as if they were closed out) which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the Distribution Requirements and for avoiding the excise tax described above. The Funds intend to monitor their transactions, intend to make the appropriate tax elections, and intend to make the appropriate entries in their books and records when they acquire any foreign currency or forward foreign currency contract in order to mitigate the effect of these rules so as to prevent disqualification of a Fund as a RIC and minimize the imposition of income and excise taxes. Accordingly, a Fund may be required to liquidate its investments at a time when the Adviser might not otherwise have chosen to do so.

Foreign Taxes. Dividends and interest received by a Fund may be subject to income, withholding or other taxes imposed by foreign countries and U.S. possessions that would reduce the yield on the Fund’s stock or securities. Tax conventions between certain countries and the United States may reduce or eliminate these taxes. Foreign countries generally do not impose taxes on capital gains with respect to investments by foreign investors.

If more than 50% of the value of a Fund’s total assets at the close of their taxable year consists of stocks or securities of foreign corporations, the Fund will be eligible to and intends to file an election with the IRS that may enable shareholders, in effect, to receive either the benefit of a foreign tax credit, or a deduction from such taxes, with respect to any foreign and U.S. possessions income taxes paid by the Fund, subject to certain limitations. Pursuant to the election, such Fund will treat those taxes as dividends paid to its shareholders. Each such shareholder will be required to include a proportionate share of those taxes in gross income as income received from a foreign source and must treat the amount so included as if the shareholder had paid the foreign tax directly. The shareholder may then either deduct the taxes deemed paid by him or her in computing his or her taxable income or, alternatively, use the foregoing information in calculating any foreign tax credit they may be entitled to use against the shareholders’ federal income tax. If a Fund makes the election, such Fund (or its administrative agent) will report annually to their shareholders the respective amounts per share of the Fund’s income from sources within, and taxes paid to, foreign countries and U.S. possessions. If a Fund does not hold sufficient foreign securities

to meet the above threshold, then shareholders will not be entitled to claim a credit or further deduction with respect to foreign taxes paid by the Fund.

A shareholder's ability to claim a foreign tax credit or deduction in respect of foreign taxes paid by a Fund may be subject to certain limitations imposed by the Code, which may result in a shareholder not receiving a full credit or deduction (if any) for the amount of such taxes. In particular, shareholders must hold their Fund shares (without protection from risk of loss) on the ex-dividend date and for at least 15 additional days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a given dividend. Shareholders who do not itemize on their federal income tax returns may claim a credit (but no deduction) for such foreign taxes. Even if a Fund were eligible to make such an election for a given year, it may determine not to do so. Shareholders that are not subject to U.S. federal income tax, and those who invest in a Fund through tax-advantaged accounts (including those who invest through individual retirement accounts or other tax-advantaged retirement plans), generally will receive no benefit from any tax credit or deduction passed through by a Fund.

Foreign tax credits, if any, received by a Fund as a result of an investment in another RIC (including an ETF which is taxable as a RIC) will not be passed through to you unless the Fund qualifies as a "qualified fund-of-funds" under the Code. If a Fund is a "qualified fund-of-funds" it will be eligible to file an election with the IRS that will enable the Fund to pass along these foreign tax credits to its shareholders. A Fund will be treated as a "qualified fund-of-funds" under the Code if at least 50% of the value of the Fund's total assets (at the close of each quarter of the Fund's taxable year) is represented by interests in other RICs.

Tax-Exempt Shareholders. Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k)s, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income ("UBTI"). Tax-exempt entities are not permitted to offset losses from one trade or business against the income or gain of another trade or business. Certain net losses incurred prior to January 1, 2018 are permitted to offset gain and income created by an unrelated trade or business, if otherwise available. Under current law, the Funds generally serve to block UBTI from being realized by their tax-exempt shareholders. However, notwithstanding the foregoing, a tax-exempt shareholder could realize UBTI by virtue of an investment in a Fund where, for example: (i) the Fund invests in residual interests of REMICs, (ii) the Fund invests in a REIT that is a taxable mortgage pool ("TMP") or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisor. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult their tax advisors regarding these issues.

The Funds' shares held in a tax-qualified retirement account will generally not be subject to federal taxation on income and capital gains distributions from a Fund until a shareholder begins receiving payments from their retirement account. Because each shareholder's tax situation is different, shareholders should consult their tax advisor about the tax implications of an investment in the Funds.

Backup Withholding. A Fund will be required in certain cases to withhold at a rate of 24% and remit to the U.S. Treasury the amount withheld on amounts payable to any shareholder who: (i) has provided the Fund either an incorrect tax identification number or no number at all; (ii) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends; (iii) has failed to certify to the Fund that such shareholder is not subject to backup withholding; or (iv) has failed to certify to the Fund that the shareholder is a U.S. person (including a resident alien).

Non-U.S. Investors. Any non-U.S. investors in the Funds may be subject to U.S. withholding and estate tax and are encouraged to consult their tax advisors prior to investing in the Funds. Foreign shareholders (*i.e.*, nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. This 30% withholding tax generally will not apply to exempt-interest dividends, distributions of the excess of net long-term capital gains over net short-term capital losses, or

to redemption proceeds. A Fund may also, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the United States for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of shares of a Fund generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the United States for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from a Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Under legislation generally known as “FATCA” (the Foreign Account Tax Compliance Act), a Fund is required to withhold 30% of certain ordinary dividends it pays to shareholders that fail to meet prescribed information reporting or certification requirements. In general, no such withholding will be required with respect to a U.S. person or non-U.S. person that timely provides the certifications required by a fund or its agent on a valid IRS Form W-9 or applicable series of IRS Form W-8, respectively. Shareholders potentially subject to withholding include foreign financial institutions (“FFIs”), such as non-U.S. investment funds, and non-financial foreign entities (“NFFEs”). To avoid withholding under FATCA, an FFI generally must enter into an information sharing agreement with the IRS in which it agrees to report certain identifying information (including name, address, and taxpayer identification number) with respect to its U.S. account holders (which, in the case of an entity shareholder, may include its direct and indirect U.S. owners), and an NFFE generally must identify and provide other required information to a Fund or other withholding agent regarding its U.S. owners, if any. Such non-U.S. shareholders also may fall into certain exempt, excepted or deemed compliant categories as established by regulations and other guidance. A non-U.S. shareholder resident or doing business in a country that has entered into an intergovernmental agreement with the United States to implement FATCA will be exempt from FATCA withholding provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

A non-U.S. entity that invests in a Fund will need to provide the fund with documentation properly certifying the entity’s status under FATCA in order to avoid FATCA withholding. Non-U.S. investors in the Funds should consult their tax advisors in this regard.

Tax Shelter Reporting Regulations. Under U.S. Treasury regulations, generally, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC such as a Fund are not excepted. Future guidance may extend the current exception from this reporting requirement to shareholders of most or all RICs. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

State Taxes. Depending upon state and local law, distributions by a Fund to its shareholders and the ownership of such shares may be subject to state and local taxes. Rules of state and local taxation of dividend and capital gains distributions from RICs often differ from the rules for federal income taxation described above. It is expected that a Fund will not be liable for any corporate excise, income or franchise tax in Massachusetts if it qualifies as a RIC for federal income tax purposes.

Many states grant tax-free status to dividends paid to you from interest earned on direct obligations of the U.S. government, subject in some states to minimum investment requirements that must be met by a Fund. Investment in GNMA or Fannie Mae securities, banker’s acceptances, commercial paper, and repurchase agreements collateralized by U.S. government securities do not generally qualify for such tax-

free treatment. The rules on exclusion of this income are different for corporate shareholders. Shareholders are urged to consult their tax advisors regarding state and local taxes applicable to an investment in a Fund.

PORTFOLIO TRANSACTIONS

Brokerage Transactions. Generally, equity securities are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Funds will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark-up or reflect a dealer's mark-down. When a Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

Brokerage Selection. The Trust has no obligation to deal with any broker-dealer or group of brokers or dealers in the execution of transactions in portfolio securities. Subject to policies established by the Trustees, the advisers are responsible for placing orders to execute Fund transactions. In placing orders, it is the Trust's policy to seek to obtain the best net results taking into account such factors as price (including the applicable dealer spread), size, type and difficulty of the transaction involved, the firm's general execution and operational facilities, and the firm's risk in positioning the securities involved. While the advisers generally seek reasonably competitive spreads or brokerage commissions, the Trust will not necessarily be paying the lowest spread or commission available. The Trust will not purchase portfolio securities from any affiliated person acting as principal except in conformity with the regulations of the SEC.

The Trust does not expect to use one particular broker or dealer, and when one or more brokers is believed capable of providing the best combination of price and execution, the Funds' advisers may select a broker based upon brokerage or research services provided to the advisers. The advisers may pay a higher commission than otherwise obtainable from other brokers in return for such services only if a good faith determination is made that the commission is reasonable in relation to the services provided.

Section 28(e) of the 1934 Act ("Section 28(e)") permits the advisers, under certain circumstances, to cause a Fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. Brokerage and research services include: (i) furnishing advice as to the value of securities, the advisability of investing in, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (ii) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and the performance of accounts; and (iii) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement and custody). In the case of research services, the advisers believe that access to independent investment research is beneficial to their investment decision-making processes and, therefore, to the Funds. In addition to agency transactions, the advisers may receive brokerage and research services in connection with certain riskless principal transactions, as defined by Financial Industry Regulatory Authority Rules ("FINRA") and in accordance with applicable SEC guidance.

To the extent research services may be a factor in selecting brokers, such services may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic, or institutional areas and information that assists in the valuation and pricing of investments. Examples of research-oriented services for which the advisers might utilize Fund commissions include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market

action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The advisers may use research services furnished by brokers in servicing all client accounts and not all services may necessarily be used in connection with the account that paid commissions to the broker providing such services. Information so received by the advisers will be in addition to and not in lieu of the services required to be performed by a Fund's advisers under the Investment Advisory Agreements. Any advisory or other fees paid to the advisers are not reduced as a result of the receipt of research services.

In some cases an adviser may receive a service from a broker that has both a "research" and a "non-research" use. When this occurs, the adviser makes a good faith allocation, under all the circumstances, between the research and non-research uses of the service. The percentage of the service that is used for research purposes may be paid for with client commissions, while the adviser will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the adviser faces a potential conflict of interest, but the adviser believes that its allocation procedures are reasonably designed to ensure that it appropriately allocates the anticipated use of such services to their research and non-research uses.

From time to time, the Funds may purchase new issues of securities for clients in a fixed price offering. In these situations, the seller may be a member of the selling group that will, in addition to selling securities, provide the advisers with research services. FINRA has adopted rules expressly permitting these types of arrangements under certain circumstances. Generally, the seller will provide research "credits" in these situations at a rate that is higher than that which is available for typical secondary market transactions. These arrangements may not fall within the safe harbor of Section 28(e).

The research services received from a broker-dealer may be complicated by MiFID II, which places restrictions on the receipt of research services by EU authorized investment firms and certain affiliated US asset managers.

SIMC also from time to time executes trades with the Distributor, again acting as introducing broker, in connection with the transition of the securities and other assets included in a Fund's portfolio when there is a change in Sub-Advisers in the Fund or a reallocation of assets among the Fund's Sub-Advisers. An unaffiliated third-party broker selected by SIMC or the relevant Sub-Adviser provides execution and clearing services with respect to such trades and is compensated for such services out of the commission paid to the Distributor on the trades. All such transactions effected using the Distributor as introducing broker must be accomplished in a manner that is consistent with the Trust's policy to achieve best net results and must comply with the Trust's procedures regarding the execution of Fund transactions through affiliated brokers. The Funds do not direct brokerage to brokers in recognition of, or as compensation for, the promotion or sale of Fund shares.

For the fiscal years ended September 30, 2018, 2019 and 2020, the Funds paid the following brokerage fees:

Fund	Total \$ Amount of Brokerage Commissions Paid (000)			Total \$ Amount of Brokerage Commissions Paid to Affiliated Brokers (000)			% of Total Brokerage Commissions Paid to Affiliated Brokers	% of Total Brokerage Transactions Effected Through Affiliated Brokers
	2018	2019	2020	2018	2019	2020	2020	2020
Multi-Asset Accumulation Fund	\$589	\$ —	\$1,563	\$—	\$—	\$0	0%	0%
Multi-Asset Income Fund	\$138	\$112	\$ 114	\$—	\$—	\$0	0%	0%
Multi-Asset Inflation Managed Fund	\$ 61	\$ 70	\$ 101	\$—	\$—	\$0	0%	0%
Multi-Asset Capital Stability Fund . .	\$175	\$240	\$ 92	\$—	\$—	\$0	0%	0%

The portfolio turnover rate for each Fund for the fiscal year ended September 30, 2019 and 2020 was as follows:

Fund	Turnover Rate	
	2019	2020
Multi-Asset Accumulation Fund	63%	61%
Multi-Asset Income Fund	76%	137%
Multi-Asset Inflation Managed Fund	30%	63%
Multi-Asset Capital Stability Fund	128%	124%

The Trust is required to identify any securities of its “regular brokers or dealers” (as such term is defined in the 1940 Act) that the Trust has acquired during its most recent fiscal year. Certain information about these issuers is set forth below, as of September 30, 2020:

Fund	Name of Issuer	Type of Security	Amount (000)
Multi-Asset Accumulation Fund	Citigroup Global Markets	Equity	\$ 491,602
	JP Morgan	Equity	\$ 453,450
	UBS Securities	Equity	\$ 404,266
	Bony/Toronto Dominion Securities Inc.	Equity	\$ 384,418
	Nomura Securities International, Inc.	Equity	\$ 164,592
Multi-Asset Income Fund	J.P. Morgan Securities	Debt	\$ 651,054
	Bank of America	Debt	\$ 490,102
	Morgan Stanley & Co, Inc	Debt	\$ 351,919
	Credit Suisse—First Boston	Debt	\$ 313,289
	Citigroup Global Markets	Debt	\$ 256,134
Multi-Asset Inflation Managed Fund	JP Morgan	Debt	\$4,061,584
	Goldman, Sachs & Co.	Debt	\$ 127,527
	Wachovia Securities, Inc.	Debt	\$ 87,439
	Citigroup Global Markets	Debt	\$ 86,915
	Morgan Stanley & Co, Inc	Debt	\$ 73,869
Multi-Asset Capital Stability Fund	JP Morgan	Debt	\$3,151,129
	Bank of America	Debt	\$ 691,076
	Citigroup Global Markets	Debt	\$ 375,962
	Barclays Capital Inc.	Debt	\$ 359,087
	Deutsche Bank Securities Inc.	Debt	\$ 228,995

DISCLOSURE OF PORTFOLIO HOLDINGS INFORMATION

Portfolio holdings information for the Funds can be obtained on the Internet at the following address: <http://www.seic.com/holdings> (the Portfolio Holdings Website). The Board has approved a policy that provides that portfolio holdings may not be made available to any third party until after such information has been posted on the Portfolio Holdings Website, with limited exceptions noted below. This policy seeks to ensure that the disclosure of information regarding the Funds’ portfolio securities is in the best interests of Fund shareholders, and includes procedures to address conflicts of interest.

Five calendar days after each month end, a list of all portfolio holdings in each Fund as of the end of such month shall be made available on the Portfolio Holdings Website. Beginning on the day after any portfolio holdings information is posted on the Portfolio Holdings Website, such information will be delivered directly to any person that requests it, through electronic or other means. The portfolio holdings information placed on the Portfolio Holdings Website shall remain there until the fifth calendar day of the thirteenth month after the date to which the data relates, at which time it will be permanently removed from the site.

Portfolio holdings information may be provided to independent third-party fund reporting services (e.g., Broadridge Lipper or Morningstar) for a legitimate business purpose, but will be delivered no earlier than the date such information is posted on the Portfolio Holdings Website, unless the reporting service executes a confidentiality agreement with the Trust that is satisfactory to the Trust's officers and that provides that the reporting service will keep the information confidential and will not trade on the information.

Portfolio holdings information may also be provided at any time and as frequently as daily to the Funds' Trustees, service providers, as well as additional contractors and vendors may include, but are not limited to: SIMC, the Sub-Advisers, the Distributor, the Administrator, the custodian and sub-custodian, the transfer agent, attorneys, independent auditors, securities lending agents, tax filing and reclamation vendors, class-action monitoring and filing vendors, and printing and filing vendors, proxy vendors and providers of portfolio monitoring and analytical tools. Service providers will be subject to a duty of confidentiality with respect to any portfolio holdings information, whether imposed by a confidentiality agreement, the provisions of the service provider's contract with the Trust, or by the nature of its relationship with the Trust, and such service providers will be prohibited from trading on the information. Portfolio holdings of a Fund may also be provided to a prospective service provider for that Fund, so long as the prospective service provider executes a confidentiality agreement with the Fund in such form as deemed acceptable by an officer of the Fund. The Board exercises on-going oversight of the disclosure of Fund portfolio holdings by overseeing the implementation of the Funds' policies and procedures by the CCO.

Neither the Funds, SIMC, nor any other service provider to the Funds may receive compensation or other consideration for providing portfolio holdings information.

The Funds file a complete schedule of their monthly portfolio holdings with the SEC 60 days after the end of the Fund's first and third fiscal quarter as exhibits to Form N-PORT and after the end of the Funds' second and fourth fiscal quarters as exhibits to Form N-CSR and N-CSRS.

DESCRIPTION OF SHARES

The Declaration of Trust authorizes the issuance of an unlimited number of shares of each Fund, each of which represents an equal proportionate interest in that Fund. Each share upon liquidation entitles a shareholder to a pro rata share in the net assets of that Fund. Shareholders have no preemptive rights. The Declaration of Trust provides that the Trustees of the Trust may create additional series of shares or separate classes of such series. Share certificates representing the shares will not be issued.

Any series of the Trust may reorganize or merge with one or more other series of the Trust or another investment company. Any such reorganization or merger shall be pursuant to the terms and conditions specified in an agreement and plan of reorganization authorized and approved by the Trustees and entered into by the relevant series in connection therewith. In addition, such reorganization or merger may be authorized by vote of a majority of the Trustees then in office and, to the extent permitted by applicable law, without the approval of shareholders of any series.

LIMITATION OF TRUSTEES' LIABILITY

The Agreement and Declaration of Trust provides that a Trustee shall be liable only for his or her own willful defaults and, if reasonable care has been exercised in the selection of officers, agents, employees or administrators, shall not be liable for any neglect or wrongdoing of any such person. The Agreement and Declaration of Trust also provides that the Trust will indemnify its Trustees and officers against liabilities and expenses incurred in connection with actual or threatened litigation in which they may be involved because of their offices with the Trust unless it is determined in the manner provided in the Agreement and Declaration of Trust that they have not acted in good faith in the reasonable belief that their actions were in the best interests of the Trust. However, nothing in the Agreement and Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties.

CODES OF ETHICS

The Board has adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. In addition, the advisers and the Distributor have adopted Codes of Ethics pursuant to Rule 17j-1. These Codes of Ethics apply to the personal investing activities of trustees, officers and certain employees (“access persons”). Rule 17j-1 and the Codes of Ethics are reasonably designed to prevent unlawful practices in connection with the purchase or sale of securities by access persons. Under each Code of Ethics, access persons are permitted to engage in personal securities transactions, but are required to report their personal securities transactions for monitoring purposes. In addition, certain access persons are required to obtain approval before investing in initial public offerings or private placements or are prohibited from making such investments. Copies of these Codes of Ethics are on file with the SEC, and are available to the public.

VOTING

Each share held entitles the shareholder of record to one vote. Shareholders of each Fund or class will vote separately on matters pertaining solely to that Fund or class, such as any distribution plan. As a Massachusetts business trust, the Trust is not required to hold annual meetings of shareholders, but approval will be sought for certain changes in the operation of the Trust and for the election of Trustees under certain circumstances. In addition, a Trustee may be removed by the remaining Trustees or by shareholders at a special meeting called upon written request of shareholders owning at least 10% of the outstanding shares of the Trust. In the event that such a meeting is requested, the Trust will provide appropriate assistance and information to the shareholders requesting the meeting.

Where the Prospectuses for the Funds or SAI state that an investment limitation or a fundamental policy may not be changed without shareholder approval, such approval means the vote of: (i) 67% or more of the Fund’s shares present at a meeting if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy; or (ii) more than 50% of the Fund’s outstanding shares, whichever is less.

SHAREHOLDER LIABILITY

The Trust is an entity of the type commonly known as a “Massachusetts business trust.” Under Massachusetts law, shareholders of such a business trust could, under certain circumstances, be held personally liable as partners for the obligations of the Trust. Even if, however, the Trust were held to be a partnership, the possibility of the shareholders incurring financial loss for that reason appears remote because the Trust’s Agreement and Declaration of Trust contains an express disclaimer of shareholder liability for obligations of the Trust and requires that notice of such disclaimer be given in each agreement, obligation or instrument entered into or executed by or on behalf of the Trust or the Trustees, and because the Agreement and Declaration of Trust provides for indemnification out of the Trust property for any shareholders held personally liable for the obligations of the Trust.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

As of January 12, 2021, the following persons were the only persons who were record owners (or to the knowledge of the Trust, beneficial owners) of 5% and 25% or more of the shares of a Fund. Persons who own of record or beneficially more than 25% of a Fund’s outstanding shares may be deemed to control the Fund within the meaning of the 1940 Act. Shareholders controlling the Fund could have the ability to vote a majority of the shares of the Fund on any matter requiring the approval of shareholders of the Fund. The Trust believes that most of the shares referred to below were held by the below persons in accounts for their fiduciary, agency, or custodial customers.

CUSTODIAN

Brown Brothers Harriman & Co. (“BBH”), located at 40 Water Street, Boston, Massachusetts, 02109-3661, acts as wire agent and custodian for the assets of the Funds. BBH holds cash, securities and other assets of the Funds as required by the 1940 Act.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

KPMG LLP, located at 1601 Market Street, Philadelphia, Pennsylvania 19103, serves as the Trust’s independent registered public accounting firm.

LEGAL COUNSEL

Morgan, Lewis & Bockius LLP, located at 1701 Market Street, Philadelphia, Pennsylvania 19103, serves as counsel to the Trust.

APPENDIX A DESCRIPTION OF RATINGS

Description of Ratings

The following descriptions of securities ratings have been published by Moody's, S&P, and Fitch Ratings ("Fitch"), respectively.

DESCRIPTION OF MOODY'S GLOBAL RATINGS

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Description of Moody's Global Long-Term Ratings

- Aaa** Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.
- Aa** Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
- A** Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
- Baa** Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.
- Ba** Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.
- B** Obligations rated B are considered speculative and are subject to high credit risk.
- Caa** Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.
- Ca** Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
- C** Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Hybrid Indicator (hyb)

The hybrid indicator (hyb) is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Description of Moody's Global Short-Term Ratings

- P-1** Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.
- P-2** Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.
- P-3** Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.
- NP** Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Description of Moody's U.S. Municipal Short-Term Obligation Ratings

The Municipal Investment Grade ("MIG") scale is used to rate U.S. municipal bond anticipation notes of up to five years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels—MIG 1 through MIG 3—while speculative grade short-term obligations are designated SG.

Moody's U.S. municipal short-term obligation ratings are as follows:

- MIG 1** This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.
- MIG 2** This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.
- MIG 3** This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.
- SG** This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Description of Moody's Demand Obligation Ratings

In the case of variable rate demand obligations ("VRDOs"), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of risk associated with the ability to receive purchase price upon demand ("demand feature"). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade ("VMIG") scale.

Moody's demand obligation ratings are as follows:

- VMIG 1** This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.
- VMIG 2** This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3 This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

Description of S&P's Issue Credit Ratings

An S&P issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P's view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

Issue credit ratings are based, in varying degrees, on S&P's analysis of the following considerations:

The likelihood of payment—the capacity and willingness of the obligor to meet its financial commitments on a financial obligation in accordance with the terms of the obligation;

The nature of and provisions of the financial obligation; and the promise S&P imputes; and

The protection afforded by, and relative position of, the financial obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

An issue rating is an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

NR indicates that a rating has not been assigned or is no longer assigned.

Description of S&P's Long-Term Issue Credit Ratings*

AAA An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

- BBB** An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.
- BB; B; CCC; CC; and C** Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.
- BB** An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitments on the obligation.
- B** An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.
- CCC** An obligation rated 'CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.
- CC** An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred but S&P expects default to be a virtual certainty, regardless of the anticipated time to default.
- C** An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.
- D** An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

*Ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Description of S&P's Short-Term Issue Credit Ratings

- A-1** A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong.
- A-2** A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitments on the obligation is satisfactory.
- A-3** A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor's capacity to meet its financial commitments on the obligation.
- B** A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.
- C** A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.
- D** A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

Description of S&P's Municipal Short-Term Note Ratings

An S&P U.S. municipal note rating reflects S&P's opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P's analysis will review the following considerations:

Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and

Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

S&P's municipal short-term note ratings are as follows:

- SP-1** Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.
- SP-2** Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.
- SP-3** Speculative capacity to pay principal and interest.

- D** 'D' is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Description of Fitch's Credit Ratings

Fitch's credit ratings relating to issuers are an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings relating to securities and obligations of an issuer can include a recovery expectation. Credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested.

The terms "investment grade" and "speculative grade" have established themselves over time as shorthand to describe the categories 'AAA' to 'BBB' (investment grade) and 'BB' to 'D' (speculative grade). The terms investment grade and speculative grade are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. Investment grade categories indicate relatively low to moderate credit risk, while ratings in the speculative categories either signal a higher level of credit risk or that a default has already occurred.

For the convenience of investors, Fitch may also include issues relating to a rated issuer that are not and have not been rated on its webpage. Such issues are denoted 'NR.'

Fitch's credit ratings do not directly address any risk other than credit risk. In particular, ratings do not deal with the risk of a market value loss on a rated security due to changes in interest rates, liquidity and other market considerations. However, in terms of payment obligation on the rated liability, market risk may be considered to the extent that it influences the ability of an issuer to pay upon a commitment. Ratings nonetheless do not reflect market risk to the extent that they influence the size or other conditionality of the obligation to pay upon a commitment (for example, in the case of index-linked bonds).

In the default components of ratings assigned to individual obligations or instruments, the agency typically rates to the likelihood of non-payment or default in accordance with the terms of that instrument's documentation. In limited cases, Fitch may include additional considerations (*i.e.* rate to a higher or lower standard than that implied in the obligation's documentation).

Note: The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' ratings and ratings below the 'CCC' category. For the short-term rating category of 'F1', a '+' may be appended.

Description of Fitch's Long-Term Corporate Finance Obligations Ratings

- AAA** Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
- AA** Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
- A** High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.
- BBB** Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

- BB** Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.
- B** Highly speculative. 'B' ratings indicate that material credit risk is present.
- CCC** Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present.
- CC** Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk.
- C** Exceptionally high levels of credit risk. 'C' ratings indicate exceptionally high levels of credit risk.

Ratings in the categories of 'CCC', 'CC' and 'C' can also relate to obligations or issuers that are in default. In this case, the rating does not opine on default risk but reflects the recovery expectation only.

Defaulted obligations typically are not assigned 'RD' or 'D' ratings, but are instead rated in the 'CCC' to 'C' rating categories, depending on their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Description of Fitch's Short-Term Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as "short term" based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

Fitch's short-term ratings are as follows:

- F1** Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.
- F2** Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.
- F3** Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.
- B** Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.
- C** High short-term default risk. Default is a real possibility.
- RD** Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.
- D** Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.
